Dear SCE Customer:

Helping California businesses save energy and money is a major goal at SCE. As you know, our technical specialists performed a free energy efficiency test on one or more pumps at your facility on August 12, 2009. We thank you for the opportunity to provide this service, and appreciate your interest in the performance of your pumps.

The results of the testing, shown in the table below, indicate that the pump listed above has the potential for improved Overall Plant Efficiency (OPE), lower energy costs, and a cash rebate.

	Plant Efficiency		<u>Savings</u>
	<u>Existing</u>	<u>Improved</u>

Total Annual Cost	\$7,318.72	\$4,604.58	\$2,714.14
Cash Incentive			\$2,080.69

Case studies have shown that repairing, retrofitting, or replacing inefficient pumps can save energy and money, and may even help you avoid serious operational problems. For your business, this could mean the following:

- **Improved Plant Efficiency:** Your OPE can be improved from 37.1% to 59.0%.
- **Lower Energy Costs:** Based on the test data, your past energy usage, and your current rate of PA-2, we estimate that you may save up to 23,119 kWh annually (which translates to a 10-ton decrease in CO<sub>2</sub> emissions). This may result in energy cost savings of \$2,714.14.
- **Cash Incentive:** Through the retrofit and installation of more energy-efficient equipment, you would receive an incentive of \$0.09 per kWh saved, courtesy of SCE's Agricultural Energy Efficiency Program. Based on your estimated kWh savings, you would be eligible for a potential cash incentive of \$2,080.69, capped at 50% of your project cost. (See contract for details.)

You may also be eligible for pump motor incentives. For more information about your test results, options, and incentive opportunities, contact RICK KOCH at (805)654-7312.

We encourage you to review your results and take advantage of SCE's energy efficiency expertise and incentives. Visit [www.sce.com/rebatesandsavings](http://www.sce.com/rebatesandsavings), or give us a call and let us know how we can be of further service to you.

There is a considerable amount of falling water in the well, making it difficult to make an accurate water level measurement. We believe that the ones shown are approximately accurate. This pump is operating inefficiently. The inefficiency is most likely caused by pump wear, the failure of the pump design to meet existing conditions, or a combination of both. Please see the attached pumping cost analysis for possible savings from pump replacement.

Dear SCE Customer:

Helping California businesses save energy and money is a major goal at SCE. As you know, our Technical Specialist performed a free energy efficiency test on one or more pumps at your facility on June 21, 2011. We thank you for the opportunity to provide this service, and appreciate your interest in the performance of your pumps.

The results of the testing, shown in the table below, indicate that the pump listed above has the potential for improved Overall Plant Efficiency (OPE), lower energy costs, and a cash incentive.

Projected Incentive, Energy, and Cost Savings

	<u>Existing</u>	<u>Improved</u>	<u>Savings</u>	<u>Cash Incentive</u>
Total kWh	66,804	26,832	39,972	\$3,597.48
kW Input	9.3	3.7	5.6	
kW on-peak activity factor *			3.6	\$361.70
Acre Feet per Year	43.3			
kWh per Acre Foot	1,545	620	924	
Average Cost per Acre Foot	\$172.99	\$69.48	\$103.51	
Overall Plant Efficiency (%)	23.7	59.0		
<b>Annual Total</b>	<b>\$7,482.05</b>	<b>\$3,005.18</b>	<b>\$4,476.86</b>	<b>\$3,959.18</b>

(\*The kW on-peak activity factor represents how the kW impacts the SCE system during on-peak periods as determined by SCE's agricultural and water pumping customers' average load profiles. By improving efficiency, your expected kW savings is 5.6 kW, and the savings used for incentive calculations is 65% of 5.6, or 3.6 kW.)

Case studies have shown that repairing, retrofitting, or replacing inefficient pumps can save energy and money, and may even help you avoid serious operational problems. For your business, this could mean the following:

- **Improved Plant Efficiency:** Your OPE can be improved from 23.7% to 59.0%.
- **Lower Energy Costs:** Based on the test data, your past energy usage, and your current rate of TOU-PA-A, we estimate that you may save up to 39,972 kWh annually (which translates to a 17-ton decrease in CO<sub>2</sub> emissions). This may result in energy cost savings of \$4,476.86.
- **Cash Incentive:** Through the retrofit and installation of more energy-efficient equipment, you have the potential to receive an incentive of \$0.09 per kWh and \$100 per on-peak activity factored kW reduced, courtesy of SCE's Customized Efficiency Program. Based on your estimated kWh and kW, you would be eligible for a Potential Cash Incentive of \$3,959.18, capped at 50% of your project cost. (See contract for details.)

If you are interested in an incentive for this pump, please contact **CHRISTIAN TORRES** at (626)633-9954 to complete a project application. All applicants must receive a **written approval authorization** before implementing any project; failure to comply will result in forfeiture of incentive funding.

We encourage you to review your results and take advantage of SCE's energy efficiency expertise and incentives. Visit [www.sce.com/rebatesandsavings](http://www.sce.com/rebatesandsavings), or give us a call and let us know how we can be of further service to you.

Sincerely,

Southern California Edison

The following energy efficiency analysis is presented as an aid to your cost accounting. This is an estimate based on the conditions present during the Edison pump test performed on August 2, 2012, billing history for the past 12 months, and your current rate of TOU-PA-A.

Assuming that water requirements will be the same as for the past year, and all operating conditions (annual hours of operation, head above, and water pumping level) will remain the same as they were at the time of the pump test, it is estimated that:

1. Overall plant efficiency can be improved from 44.1% to 59.0%.
2. This can save you up to 12,015 kWh and \$1,466.93 annually.
3. These kWh savings translate to a 5.2-ton decrease in CO<sub>2</sub> emissions.

	<u>Existing</u>	<u>Plant Efficiency Improved</u>	<u>Savings</u>
Total kWh	47,652	35,637	12,015
kW Input	9.3	7.0	2.3
kWh per Acre Foot	918	687	232
Acre Feet per Year	51.9		
Average Cost per kWh	\$0.12		
Average Cost per Acre Foot	\$112.12	\$83.85	\$28.27
Overall Plant Efficiency (%)	44.1	59.0	
<b>Total Annual Cost</b>	<b>\$5,817.83</b>	<b>\$4,350.90</b>	<b>\$1,466.93</b>

It is sincerely hoped that this information will prove helpful to you, and that your concerns over maintaining optimum pumping efficiency will be continued. If you have any questions regarding this report, please contact RICK KOCH at (805)654-7312.

The following analysis is presented as an aid to your cost accounting. This is an estimate based on the conditions present during the Edison pump test performed on June 5, 2008, billing history for the past 12 months, and your current rate of PA-2.

Assuming that water requirements will be the same as for the past year, and all operating conditions (annual hours of operation, head above, and water pumping level) will remain the same as they were at the time of the pump test, it is estimated that:

1. Overall plant efficiency can be improved from 37.3% to 55.0%.
2. This can save you up to 13,319 kWh and \$1,624.02 annually.

We were unable to measure the GPM flow; therefore, the above test results were obtained using your water meter. This pump is running inefficiently. However, upon further inspection with Tony Morrison, it is believed that the flow meter is operating correctly and there is an obstruction in the discharge line past the meter causing the decreased flow.

Dear SCE Customer:

Helping California businesses save energy and money is a major goal at SCE. As you know, our technical specialists performed a free energy efficiency test on one or more pumps at your facility on August 11, 2009. We thank you for the opportunity to provide this service, and appreciate your interest in the performance of your pumps.

The results of the testing, shown in the table below, indicate that the pump listed above has the potential for improved Overall Plant Efficiency (OPE), lower energy costs, and a cash rebate.

	Plant Efficiency		<u>Savings</u>
	<u>Existing</u>	<u>Improved</u>	
Total kWh	44,568	15,721	28,847
kW Input	5.0	1.8	3.2

Average Cost per kWh	\$0.11		
Average Cost per Acre Foot	\$241.56	\$85.21	\$156.35
Overall Plant Efficiency (%)	19.4	55.0	
<hr/>			
Total Annual Cost	\$4,955.96	\$1,748.17	\$3,207.79
Cash Incentive			\$2,596.23

Case studies have shown that repairing, retrofitting, or replacing inefficient pumps can save energy and money, and may even help you avoid serious operational problems. For your business, this could mean the following:

- **Improved Plant Efficiency:** Your OPE can be improved from 19.4% to 55.0%.
- **Lower Energy Costs:** Based on the test data, your past energy usage, and your current rate of TOU-PA-A, we estimate that you may save up to 28,847 kWh annually (which translates to a 13-ton decrease in CO<sub>2</sub> emissions). This may result in energy cost savings of \$3,207.79.
- **Cash Incentive:** Through the retrofit and installation of more energy-efficient equipment, you would receive an incentive of \$0.09 per kWh saved, courtesy of SCE's Agricultural Energy Efficiency Program. Based on your estimated kWh savings, you would be eligible for a potential cash incentive of \$2,596.23, capped at 50% of your project cost. (See contract for details.)

You may also be eligible for pump motor incentives. For more information about your test results, options, and incentive opportunities, contact RICK KOCH at (805)654-7312.

We encourage you to review your results and take advantage of SCE's energy efficiency expertise and incentives. Visit [www.sce.com/rebatesandsavings](http://www.sce.com/rebatesandsavings), or give us a call and let us know how we can be of further service to you.

Sincerely,

Southern California Edison

The following analysis is presented as an aid to your cost accounting. This is an estimate based on the conditions present during the Edison pump test performed on June 5, 2008, billing history for the past 12 months, and your current rate of PA-2.

Assuming that water requirements will be the same as for the past year, and all operating conditions (annual hours of operation, head above, and water pumping level) will remain the same as they were at the time of the pump test, it is estimated that:

1. Overall plant efficiency can be improved from 18.1% to 50.0%.
2. This can save you up to 7,770 kWh and \$1,375.60 annually.

This pump is running inefficiently. The inefficiency is most likely caused by the failure of the pump design to meet existing conditions. The pump is being throttled even though a VFD is in place. It would be advantageous unthrottling the discharge valve and allow the VFD to slow the pump down.

This pump is running inefficiently. The inefficiency is most likely caused by the failure of the pump design to meet existing conditions. The pump is oversized for the well. The VFD is not being utilized properly to maintain a constant pumping level. The pump should be downsized without a VFD.

# Important information

## Rotating outages

A rotating outage is a controlled electric outage that lasts approximately one hour for a group of circuits, which is used during electric system emergency conditions to avoid widespread or uncontrolled blackouts. Each SCE customer is assigned a rotating outage group, shown on the upper part of the SCE bill. If your rotating outage group begins with the letters A, M, R, S, or X, you are subject to rotating outages. If it begins with N or Exempt, you are not. Your rotating outage group may change at any time. For more information, and to see which rotating outage groups are likely to be called in the event of a system emergency, visit [www.sce.com](http://www.sce.com) or call 1-800-655-4555.

## Options for paying your bill

\*The Credit/Debit card payment options are not available for payment of commercial services or security deposits for commercial services.

You may call us for electronic payment options, to make payment arrangements, or for information on agencies to assist you in bill payment. If service has been disconnected, on the day of the service reconnection, be sure all appliances and other electric devices are turned off. For additional home safety tips, visit [www.sce.com/safety](http://www.sce.com/safety) or you may call SCE Customer Service at 1-800-655-4555.

## Past due bills

Your bill was prepared on July 26, 2012. Your bill is due when you receive it and becomes past due 19 days after the date the bill was prepared. You will have 15 days at your new address to pay a bill from a prior address before your service will be terminated. SCE does not terminate residential service for non-payment of bills for other classes of service. Termination of electric service requires a reconnection charge. A field assignment charge may appear on your next bill if SCE visits your premises because of non-payment. If you are a residential customer, and claim an inability to pay and payment arrangements have not been extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission (CPUC).

## Rules and rates

SCE's rules and rates are available in full at [www.sce.com](http://www.sce.com) or upon request.

## Late Payment Charge (LPC)

A late payment charge of 0.9% will be applied to the total unpaid balance on your account if full payment is not received by the due date on this bill (except for CARE and state agency accounts).

## Disputed bills

If you think your bill is incorrect, call us and speak with a customer service representative, or if necessary, with a manager. If you feel unsatisfied with the result of such discussion(s), contact the CPUC, Consumer Affairs Branch by mail at: 505 Van Ness, Room 2003, San Francisco, CA 94102; or at: [www.cpuc.ca.gov](http://www.cpuc.ca.gov), 1-800-649-7570, TTY: 1-800-229-6846. Include a copy of your bill, why you believe SCE did not follow its rules and rates, and a check or money order made out to the CPUC for the disputed amount. You must pay the disputed amount, or send it to the CPUC, before the past-due date to avoid disconnection. The CPUC accepts payment only for matters relating directly to bill accuracy. While the CPUC is investigating your complaint, you must pay any new SCE bills that become due.

## Electronic Fund Transfers (EFT)

When you provide a check as payment, you authorize us either to use information from your check to make a one-time electronic fund transfer from your account or to process the payment as a check transaction. When we use information from your check to make an electronic fund transfer, funds may be withdrawn from your account as soon as the same day we receive your payment. You will not receive your check back from your financial institution, but the transaction will appear on your financial institution statement. If you do not wish to authorize an electronic fund transfer, please call the 800 number on the front of your bill.

## Important information for all customers

### Summer Preparedness Means Safety First

This summer, it's important to save energy on hot days. While you're preparing for summer heat waves and potential outages, remember: your health and safety comes first. Having an emergency plan ready will help you stay safe, comfortable, and secure in case of a power outage.

Some simple but important safety measures will help keep your family members, home, and even pets protected during an outage. Keeping food cold, having a plan for medical emergencies, and even knowing what to unplug and reset are all part of putting safety first.

Power outages also sometimes involve downed power lines. If you see a downed power line, do not approach or touch the line, or anyone or anything in contact with it. Call 911 immediately.

These checklists will help you prepare now for hot days and possible outages:

#### Home Outage Kit Checklist

- ◆ First-aid kit that includes your family's medication
- ◆ Special-needs items for infants, the elderly, and disabled family members
- ◆ Battery-powered or wind-up radio, clock and cell phone
- ◆ Extra batteries
- ◆ Bottled water: at least one gallon per person, per day
- ◆ Non-perishable food that doesn't require cooking
- ◆ Manual can opener
- ◆ Several coolers or ice chests
- ◆ Non-cordless phone
- ◆ Flashlights

#### Home Preparation Checklist

- ◆ Keep important telephone numbers (fire department, paramedics, police, hospital, doctor, relatives, etc.) by the phone.
- ◆ Place flashlights in handy locations, such as near telephones.
- ◆ Install surge protectors to help safeguard valuable electronic equipment.
- ◆ Know where to find each utility box (electricity, water, and gas) and how to turn them off, using the proper tools kept in handy locations.
- ◆ Always back up important work and files on your computer.
- ◆ If you have an automatic garage door or gate, learn how to open them manually.
- ◆ Consider keeping at least one car at least half full with fuel. Gas stations need electricity to pump gas and will be shut down during an outage.
- ◆ Make a safety preparedness plan for your family that includes the list and location of the above items.

Get ready for summer today by being prepared for hot weather and potential outages. For more helpful information about outages, visit [www.sce.com/outage](http://www.sce.com/outage).

## Edison Serves and Supports Our Communities

For more than 125 years, Edison International, SCE's parent company, has served our Southern California region. Recently, we've shown that support by contributing nearly \$17 million to nonprofit organizations, 79% of which was dedicated to helping our customers in areas where our assistance is needed most. We expect to do even more in the future.

Contributions are funded by Edison International shareholders, not through utility rates. To continue our community partnerships, we've extended our reach to areas where we can provide educational information where it's needed, help the environment, promote safety and preparedness, and support civic involvement and economic growth. Our priority is to do our best for our customers and communities.

Our two-year Diversity Initiative gave \$1 million in grants for groups to work directly with four high schools in SCE's service territory. The grants enabled partnerships among schools, families, and the local community. Programs included tutoring and mentoring, safe passage to schools, internship and workforce investment, pathways to college, teacher development, and parental and community programs.

Edison International continues its commitment to the community, especially during these economically challenged times. For more information, please visit [www.edison.com/community](http://www.edison.com/community).

## Important information for our commercial customers

### Get Ready for Summer!

Summer often means higher energy usage. It is also the time when business electricity rates shift from the lower "winter" rate period to the higher "summer" rate period of June through September. The reason for this shift is to align rates with the increased energy demands that come with the summer months, when demand is at its peak and the cost to produce energy is higher.

### Quick Tips for Summer Savings:

#### No-cost

- ◆ Pre-cool building/work areas or cycle air conditioning and ventilation
- ◆ Raise cooling thermostat settings
- ◆ Turn off commercial ice machines
- ◆ Turn off decorative fountains
- ◆ Turn off swimming pool/spa pumps
- ◆ Turn off excess or unused elevator banks or escalators

#### Low-cost

- ◆ Install an insulation blanket on your water heater
- ◆ Install PC network software to automatically control the power setting of networked personal computers
- ◆ Wherever possible, increase insulation level in walls and ceilings
- ◆ Identify and correct any HVAC systems that are fighting each other with simultaneous heating and cooling, such as humidity control fighting a static control
- ◆ Schedule and perform regular maintenance on key HVAC units
- ◆ Clean/replace air filters and dampers, repair/replace damaged ducts and pipe insulation)

# Important information

## Rotating outages

A rotating outage is a controlled electric outage that lasts approximately one hour for a group of circuits, which is used during electric system emergency conditions to avoid widespread or uncontrolled blackouts. Each SCE customer is assigned a rotating outage group, shown on the upper part of the SCE bill. If your rotating outage group begins with the letters A, M, R, S, or X, you are subject to rotating outages. If it begins with N or Exempt, you are not. Your rotating outage group may change at any time. For more information, and to see which rotating outage groups are likely to be called in the event of a system emergency, visit [www.sce.com](http://www.sce.com) or call 1-800-655-4555.

## Options for paying your bill

You can pay your bill by:

On-line electronically	In Person
- <a href="http://www.sce.com">www.sce.com</a>	- Authorized payment locations 1-800-747-8908
- Electronic Fund Transfer	Phone
Mail-in	- QuickCheck 1-800-950-2356
- Check	- Credit Card-MasterCard* 1-800-254-4123
- Money order	- Debit Card-Star/NYCE/Pulse* 1-800-254-4123

\*The Credit/Debit card payment options are not available for payment of commercial services or security deposits for commercial services.

You may call us for electronic payment options, to make payment arrangements, or for information on agencies to assist you in bill payment. If service has been disconnected, on the day of the service reconnection, be sure all appliances and other electric devices are turned off. For additional home safety tips, visit [www.sce.com/safety](http://www.sce.com/safety) or you may call SCE Customer Service at 1-800-655-4555.

## Past due bills

Your bill was prepared on November 28, 2012. Your bill is due when you receive it and becomes past due 19 days after the date the bill was prepared. You will have 15 days at your new address to pay a bill from a prior address before your service will be terminated. SCE does not terminate residential service for non-payment of bills for other classes of service. Termination of electric service requires a reconnection charge. A field assignment charge may appear on your next bill if SCE visits your premises because of non-payment. If you are a residential customer, and claim an inability to pay and payment arrangements have not been extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission (CPUC).

## Rules and rates

SCE's rules and rates are available in full at [www.sce.com](http://www.sce.com) or upon request.

## Late Payment Charge (LPC)

A late payment charge of 0.9% will be applied to the total unpaid balance on your account if full payment is not received by the due date on this bill (except for CARE and state agency accounts).

## Disputed bills

If you think your bill is incorrect, call us and speak with a customer service representative, or if necessary, with a manager. If you feel unsatisfied with the result of such discussion(s), contact the CPUC, Consumer Affairs Branch by mail at: 505 Van Ness, Room 2003, San Francisco, CA 94102; or at: [www.cpuc.ca.gov](http://www.cpuc.ca.gov), 1-800-649-7570, TTY: 1-800-229-6846. Include a copy of your bill, why you believe SCE did not follow its rules and rates, and a check or money order made out to the CPUC for the disputed amount. You must pay the disputed amount, or send it to the CPUC, before the past-due date to avoid disconnection. The CPUC accepts payment only for matters relating directly to bill accuracy. While the CPUC is investigating your complaint, you must pay any new SCE bills that become due.

## Electronic Fund Transfers (EFT)

When you provide a check as payment, you authorize us either to use information from your check to make a one-time electronic fund transfer from your account or to process the payment as a check transaction. When we use information from your check to make an electronic fund transfer, funds may be withdrawn from your account as soon as the same day we receive your payment. You will not receive your check back from your financial institution, but the transaction will appear on your financial institution statement. If you do not wish to authorize an electronic fund transfer, please call the 800 number on the front of your bill.

## Definitions

- DWR Bond Charge: Bonds issued by the Department of Water Resources (DWR) to cover the cost of buying power for customers during the energy crisis are being repaid through this charge.
- SCE Generation: These charges recover energy procurement and generation costs for that portion of your energy provided by SCE. Beginning April 11, 2010, pursuant to CPUC Decision 10-03-022, Direct Access (DA) is again open to all non-residential customers, subject to annual limits during a four year phase-in period, and absolute limits following the phase-in. All residential customers currently returning to Bundled Service may not elect to return to DA service.

**NOTICE OF PUBLIC PARTICIPATION HEARINGS  
REGARDING PROPOSED RATE CHANGES BY  
SOUTHERN CALIFORNIA EDISON COMPANY (SCE)  
Application (A.) 11-03-014, et al.**

The California Public Utilities Commission (CPUC) would like to hear from you! Public Participation Hearings (PPH's) on Phase 2 of the CPUC Smart Meter Opt-Out proceedings are being held at various locations throughout California and will be facilitated by a CPUC Administrative Law Judge. The dates, times and locations of the PPH's are listed below:

Date and Time	Location
December 14, 2012 3:00 p.m.	County Administration Building Board Hearing Room 105 East Anapamu Street, 4th Floor Santa Barbara, CA 93101
December 17, 2012 6:00 p.m.	Junipero Serra State Office Building Carmel Room - Auditorium 320 West 4th Street, 1st Floor Los Angeles, CA 90013
December 18, 2012 6:00 p.m.	San Clemente Community Center Ole Hanson Fireside Room 100 N. Calle Seville San Clemente, CA 92672

The purpose of the PPH is to accept public comment from electric utility customers regarding the Phase 2 issues of the CPUC Smart Meter Opt-Out proceeding. These Phase 2 issues include:

- 1) Should more than one opt-out option be offered to customers who do not wish to have a wireless SmartMeter (e.g., a digital, non-communicating meter)? Should different fees be assessed based on the type of opt-out meter selected by the customer and, if so, what is an appropriate level for such fees?
- 2) Should all costs associated with the opt-out option be paid by only those customers electing the option, or should some portion of these costs be allocated to all ratepayers and/or to utility shareholders?
- 3) What fees should be assessed on customers who elect the opt-out option and should the fees be assessed on a per meter or per location basis?
- 4) Should there be an "exit fee" imposed on customers who elect the opt-out option and later return to a wireless SmartMeter?
- 5) Should the opt-out option be extended to local governments and communities?

SCE Representatives will be present at each site listed above to assist with individual customer concerns.

**BACKGROUND**

On February 1, 2012, the Commission issued Decision (D.) 12-02-014, which modified PG&E's SmartMeter Program to include an option for those residential customers who did not wish to have a wireless smart meter (as used in this proceeding, a wireless smart meter is a digital electric or gas meter that transmits customer usage data through radio transmission). Similar decisions were issued for SDG&E in D.12-04-019 and for SCE in D.12-04-018 (D.12-02-014, D.12-04-018 and D.12-04-019 are collectively referred to as the "Opt-Out Decisions"). The Opt-Out Decisions adopted interim fees for those customers electing to participate in the opt-out option and directed that a separate phase be initiated to consider cost and cost allocation issues associated with opt-out options. The decisions also directed that the second phase consider whether the opt-out option should be extended to communities, such as local governments and residents of apartment buildings or condominium complexes.

On June 8, 2012, CPUC Assigned Commissioner, Michael Peevey, issued a Ruling adding this required separate phase – Phase 2 – to the smart meter opt-out proceedings.

**SCE's PROPOSED RATE CHANGE**

SCE projects that its Opt-Out Program will require approximately \$21 million in revenue (\$15.010 million in operations & maintenance expenses and \$5.979 million in capital expenditures) over the 2012 through 2014 period, and requests CPUC approval to recover 100 percent of this forecasted revenue requirement through opt-out fees.

SCE proposes to recover the incremental costs associated with the Opt-Out Program from those residential customers exercising the option. The proposal includes an initial fee and monthly charges. These costs include the labor associated with the removal of the opt-out meter and the installation of the

Edison SmartConnect® meter when a customer leaves the Opt-Out Program. These fees will be discounted by 20 percent for those customers enrolled in the CARE program (the CARE discount will be allocated to all ratepayers, except Street Lighting customers, on an equal-cents-per-kilowatt hour basis pursuant to CA Public Utilities Code Section 327(a)(7) and consistent with Commission practice).

The following table presents SCE's proposed fees for opt-out customers, based on the forecast revenue requirements and estimates of opt-out participants:

Customer Group	Initial Fee	Monthly Fee
Non-CARE	\$98	\$24
CARE	\$78	\$19

Any actual changes in rates, or approval of any additional opt-out fees, will be determined by the Commission.

## Empowering Young People Through Education

High school seniors planning to enroll full-time in an undergraduate study program in the fields of math, science, engineering or technology at a college or university are eligible for the Edison Scholars program. Yearly, 30 Edison Scholars are selected to receive a \$40,000 scholarship each to be disbursed in annual increments of \$10,000 for four years. We focus on helping minority, low-income and underrepresented students.

Our support of charitable causes, including the Edison Scholars program, is entirely funded by Edison International shareholders. We see our community donations as part of our commitment to be a leading corporate citizen. Southern California Edison (SCE) customers do not pay for our donations in their utility bills.

To be eligible for the program, students must live in or attend a public or private high school in our service area or attend an eligible high school in the designated area surrounding SCE's San Onofre Nuclear Generating Station.

To apply, visit [www.scholarshipamerica.org/edisonscholars](http://www.scholarshipamerica.org/edisonscholars). The application deadline is January 10, 2013.

\*Dependents of Edison International employees are not eligible for the Edison Scholars Program.
