Mr. Robert Larson
Assistant Deputy Director
Waterworks and Sewer Maintenance Division
Department of Public Works
P. O. Box 4039
Los Angeles, CA 90051

Re: Waterworks District No. 39
Emergency Water Supply

Dear Mr. Larson:

We appreciate your apprising us of the emergency water supply situation that required your interconnection of Waterworks District Nos. 24 and 39.

Inasmuch as the service area of Waterworks District No. 39 is not within the boundaries of AVEK, any delivery of State Project Water to WWD 39 is subject to prior approval of the Director of the Department of Water Resources in accordance with the terms of our Water Supply Contract with the State of California. The State Contract is part of the Water Service Agreement between AVEK and Waterworks District No. 24.

In addition, the pricing policy of AVEK requires a water rate for deliveries outside the Agency service area that reflects full recovery of costs, including capital for associated capacity in Agency facilities, that are otherwise received from property taxes within the Agency service Area.

Therefore, it is necessary to determine whether any portion of the water being supplied to WWD 39 via WWD 24 is State Project Water delivered at your T 6-116 E pumping station. In this regard, we would appreciate your furnishing the following records:

- a) The amount of water metered from WWD 24 to WWD 39 with the dates of meter readings.
- b) The amount of water metered from the wells at T 6-116 E pumping station during the corresponding time periods.
- c) Total water usage in WWD 24 and in WWD 39 during corresponding time periods.

See ANSWER LETTER TO AVEK 9-18-87

(See Second Page for copy)

Mr. Robert Larson

Page 2-

If it is determined that State Project Water has been delivered outside the Agency service area, we would impose the charge set forth in Section 12(a-2) of the Rules and Regulations for Distribution of Water.

You should also be aware that in the event State Project Water is delivered outside the Agency boundary this year, a condition of Department of Water Resources approval would be that AVEK assume an additional deficiency on its 1988 entitlement delivery requests, equivalent to the water delivered outside the service area, in the event that drought conditions require imposition of State Water Contract deficiency provisions. We would expect WWD 24 to assume this added deficiency so as not to affect other Agency water users adversely.

Very truly yours,

Wallace G. Spinarski
