

Antelope Valley Groundwater Basin

This map was created generally using GIS shape files available through the State of California. Transportation and Hydrology layers were obtained from [www.gis.ca.gov/data/epl]. These source files are typically in Teale Albers projection. The original DWR Groundwater Basin file was obtained at [www.groundwater.water.ca.gov/bulletin118/basin_maps/index.cfm] in UTM 10, NAD27 projection. This shape file has been reprojected to UTM 11 NAD83. Stream gauge locations and average flow were obtained from the USGS website [www.waterdata.usgs.gov/nwis]. This map is subject to change given the availability of additional information. California Department of Water Resources, Southern District, June 2006.
