

Antelope Valley Adjudication Area Proposed Adjudication Boundary

The base map was created using GIS shape files available through agencies of the state of California.

Transportation layers were obtained from [www.gis.ca.gov/data.ep]. These files are typically in a Teale Albers Projection.

The original DWR groundwater basin file was obtained at [www.groundwater.ca.gov/bulletin118/basin_maps/index.cfm] in a UTM 10, NAD 27 Projection. The shapefile has been reprojected into a UTM 11, NAD 83 Projection.

This map was compiled and created by EDE Consultants, Bruce N. Nelson, P.E. representing Rio Tinto Minerals, Boron Operations.
