

JUNE ANN OBERDORFER

7160 Via Vico
San Jose, California 95129
408-257-1803

Education:

Ph.D., Geology and Geophysics, May 1983
University of Hawaii, Honolulu, Hawaii
Dissertation: "Wastewater Injection: Near-well
Processes and Their Relationship to Clogging"

Fil. Kand., Geology, June 1977
University of Stockholm, Sweden

B.A., English and American Literature, June 1970
Brown University, Providence, Rhode Island

Registration:

Registered Geologist, State of California, Number: 6103
Certified Hydrogeologist, State of California, Number: 100

Professional Experience:

San Jose State University, Department of Geology, San Jose, California
Assistant Professor, August 1983 to July 1986
Associate Professor, August 1986 to July 1991
Professor, August 1991 to present

Duties: Develop hydrogeology program within the department. Teaching of introductory (senior level) and advanced (graduate level) groundwater courses plus an introductory course in environmental geology for non-majors. Develop an experimental course in groundwater contamination (Spring 1985). Develop a portion of a team-taught course with the College of Engineering on hazardous wastes. Taught four graduate seminars related to contaminant hydrogeology.

Lawrence Livermore National Laboratory
Consultant to Environmental Protection Division
Site 300, Pit 7 Complex Contamination Study and other Operable Unit Investigations
October 1984 to February 2001

Duties: Advise on monitoring installation (vadose and saturated zone), aquifer testing, and data interpretation for a study on a landfill and firing table contaminant plumes consisting of radioactive elements and solvents in porous media and fractured rock aquifers at CERCLA site. Model plume movement and transformations.

AECOM (formerly EarthTech, RUST E & I, and Wahler Associates), Oakland, California
Consultant on Multiple Projects

August 1992 to January 1996, June 1999 to present

Duties: Formulation of hydrogeologic conceptual models, analytical and numerical modeling of landfill sites and contaminant sites for risk assessment and remedial action planning, aquifer test analysis. Also provided expert witness support to the Department of Justice for the Antelope Valley Groundwater Adjudication trial.

Lowney Associates, Mountain View, California

Consultant on Multiple Projects

February 2001 to present

Duties: Aquifer testing, including under tidally-influenced and stream-influenced conditions. Numerical modeling of water development to evaluate potential impacts as part of an EIR.

U.S. EPA – Region 9, San Francisco, CA

Instructor for Multiple Short Courses

September 2002 to present

Duties: Taught short courses to EPA professionals on hydrogeology, numerical modeling, well installation, aquifer testing, and vadose zone monitoring and transport.

On-Site Technologies, Inc., Campbell, CA

Consultant on Multiple Projects

June 1989 to May 1997

Duties: Hydrogeologic evaluation of contaminant sites, particularly related to petroleum hydrocarbon releases but also including two major solvent cases, remedial action modeling, performed and analyzed numerous aquifer tests and soil vapor tests.

Lee Gardner and Associates, Sunnyvale, California

Consultant to the Navajo Nation on Uranium Mill Tailing Sites

May 1995 to May 2001

Duties: Document review of hydrogeology and contaminant transport at four former uranium mills, confirmation modeling of site remediation and landfill leachate migration.

Leland R. Gardner and Associates, Palo Alto, California

Consultant to Plumas County Dept. of Public Works

June 1998 to March 1999

Duties: Synthesize conceptual model of ground water movement in the vicinity of Lake Davis, CA and estimate potential migration rates and pathways for fish toxins in a fractured, granitic aquifer.

California State Board of Registration for Geologists and Geophysicists
Volunteer Consultant to Certified Hydrogeology Evaluation
November 1998 to February 1999

Duties: Development of a list of tasks and knowledge base for hydrogeologists as part of the formulation of the examination for Certified Hydrogeologists.

National Academy of Science
Volunteer Member of Committee to Review Specific Scientific and Technical Safety
Issues Related to the Ward Valley, California Low-Level Radioactive Waste Site
May 1994 to March 1995

Duties: Evaluate the potential for vadose zone and ground water transport of radionuclides for a proposed landfill in the eastern Mojave Desert, CA

Purcell, Rhoades, & Associates, Hayward, California
Consultant on Proposed Municipal Landfill Site
May 1987 to March 1988

Duties: Evaluate site hydrogeology (including aquifer testing and water chemistry) and potential for offsite leachate transport in a fractured granitic rock, canyon site.

Science Applications International Corporation
Pleasanton, California Office
Consultant on Environmental Impact Report
February to July 1986

Duties: Write description of site hydrogeology and evaluate present and future effects of site activities on soil and groundwater quality for a major environmental impact report for Lawrence Livermore National Laboratory, Site 300

Lawrence Livermore National Laboratory
Consultant to Earth Sciences Division
Nuclear Waste Package Project
June to December 1983

Duties: Review existing studies on the hydrogeology of a proposed high level nuclear waste repository site and advise on further relevant studies.

Australian Institute of Marine Science
Townsville, Queensland, Australia
Visiting Researcher, January to March 1983

Duties: Plan, execute and interpret data for a project to study water movement and geochemistry through a submerged reef in the Great Barrier Reef.

University of Hawaii
Research Assistant, Water Resources Research Center
January 1980 to September 1982

Duties: Plan, execute and interpret data for a project studying the clogging effects of wastewater on injection wells. Field work included pumping tests, tracer tests, and water quality sampling.

Teaching Assistant, Department of Geology and Geophysics
January 1979 to January 1980

Duties: Teach general geology labs and a lab in structural geology.

Professional Organizations:

American Geophysical Union
Association of Engineering Geologists
National Ground Water Association

Languages:

English, Spanish, Swedish, Portuguese, French, Italian
