**Subject:** RE: 20th Street West and Avenue N Turnout

Hey Jorge,

Here are the answers to your questions:

1. AVEK can provide the requested letter as to min/max flows but keep in mind, as with all of our turnouts, supply is secondary and interruptible with no guarantee as to flow rate or quantity. I'm required to include these facts in the letter. I'll send a draft over shortly.
2. Upon reviewing the Water Service Agreement, there is no language as to specific turnouts but only generically "connections". I believe this was done on purpose so that additional turnouts could be added without having to amend the original agreement. We have added many connections with various customers over the years without amending the original agreements thus no amendment will be necessary.

I just gave AECOM clearance to obtain the title report to move forward with negotiations on the easement. I'll send along the results of their negotiations as soon as they are available.

Thanks! – Mike Flood - AVEK

Hi Mike,

Thank you for your time and this email is just a follow up with our phone discussion regarding the turnout. As discussed, AVEK will request AECOM to contact the property owner and negotiate the procurement of the proposed easement base on the approved turnout drawings. On November 1, 2013, AVEK will provide Cal Water with the price breakdown related to acquiring easement.

Could you kindly update us with the following action items from our last meeting on September 18, 2013:

1. AVEK will provide Cal Water a letter confirming that the information submitted at that time (min/max flows etc.) is still valid for California Department of Public Health and we are moving forward with this project. (please see attachment)
2. AVEK will provide a draft addendum to Cal Water existing water supply agreement at Leona Valley system.

If there is/are correction, please do not hesitate to provide comment/s. Thank you.

Jorge Cabradilla

Carmelo ,

Attached is AECOM's recommendation after giving the 'South of Ave N' option. This is provided at no charge to allow Calwater to make a decision on how to move forward. All options we discussed are on the table however. It's really just a matter of how much risk of increased costs your company is comfortable with. Give me a call when you have a chance so we can discuss next steps. Thanks! - Mike Flood - AVEK (661) 943-3201
