THE RESOURCES AGENCY
Department of Water Resources

BULLETIN No. 91-12

WATER WELLS IN THE EASTERN PART
OF THE
ANTELOPE VALLEY AREA
LOS ANGELES COUNTY, CALIFORNIA

Prepared by
United States Department of Interior
Geological Survey

FEDERAL-STATE COOPERATIVE GROUNDWATER INVESTIGATIONS

DECEMBER 1966

HUGO FISHER
Administrator
The Resources Agency

EDMUND G. BROWN
Governor
State of California

WILLIAM E. WARNE
Director
Department of Water Resources

WELL-NUMBERING SYSTEM

The well-numbering system used in the eastern part of the Antelope Valley area has been used by the Geological Survey in California since 1940. The system has been adopted by the California Department of Water Resources and by the California Water Quality Control Board for use throughout the state.

Wells are assigned numbers according to their location in the rectangular system for the subdivision of public land. For example, in the number 7N/12W-34E1, the part of the number preceding the slash indicates the township (T. 7 N.), the part between the slash and the hyphen is the range (R. 12 W.), the number between the hyphen and the letter indicates the section (sec. 34), and the letter indicates the 40-acre subdivision of the section, as shown in the accompanying diagram.

D	C	B	A
E	F	G	H
M	L	K	J
N	P	Q	R

Within the 40-acre tract the wells are numbered serially as indicated by the final digit. Thus, well 7N/12W-34E1 is the first well to be listed in the SW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 34, San Bernardino base line and meridian.

FIGURE 1

FIGURE 1.-Part of southern California, showing area described in this report

Table 1.--Descriptions of wells in the eastern part of the Antelope Valley area, California

State well number: The number given is the number assigned to the well according to the method described in the section on the well-numbering system.

Other numbers and source of data: The source of data on each line is indicated by the following

symbols: B Smith (1959); D driller; DWR California Department of Water Resources;
FC Los Angeles County Flood Control District; GS U.S. Geological Survey; J Johnson (1911);
M Munger Oilgram; O owner; P pump service contractor; SCE Southern California Edison Co.;
T Thompson (1929); WRB California Water Rights Board. A number following the letter symbol
is the well number used by that person or agency. For well numbers assigned by the California
Department of Water Resources prior to adoption of the uniform state well-numbering system, the
township and range numbers and letters are omitted and the section and letter are given.

Date of observation: The date given is the date on which the well was visited.

Owner or user: The name given is that of the owner or user of the well on the date indicated. If
data are given for more than one date, previous owners may be listed.

Year completed: The completion date was obtained from the driller's log or reported by the owner
or others.

Depth: Depths of wells given in whole feet were reported by owners, drillers or others; where a logged well (table 4) was not cased for the full drilled depth, the reported depth is the depth of the bottom of the casing; depths given in feet and tenths of a foot were measured below land-surface datum by the Geological Survey or others as indicated.

Type and diameter: The type of well construction is indicated by the following symbols: A auger; C cable tool; D dug by hand; R rotary. The number following the letter is the diameter of the casing or pit, in inches. For an unsymmetrically dug well, only the maximum dimension is given. The symbol N indicates no casing visible at surface.

Type of pump and power: The pump type or method of lift is indicated as follows: A air lift; C centrifugal; J jet; L lift; N none; S submersible; Si siphon; T turbine. The type of power is indicated as follows: D diesel; E electric motor of undetermined horsepower (a number in this column indicates the rated horsepower of an electric motor); G gasoline engine;

Gr gravity; H hand operated; N none; S steam engine; W windmill.

Yield: The yield or output of the pump, in gallons per minute, as reported by the Southern

California Edison Co., owners, or drillers. It is not necessarily the maximum capacity of the well or installed pump.

Use: The use of the well is indicated by the following symbols: Dm domestic; Ds destroyed or dry; In industrial; Ir irrigation; O observation; Ps public supply; RR railroad; S stock; T test hole; Un unused.

Measuring point: The point from which water-level measurements are made is described as follows:

Bhc bottom of hole in casing; Bpb bottom of pump base; Hpb hole in pump base; Ls land surface; Na no access either to or into the well; Tap top of access pipe; Tc top of casing; Tcc top of casing cover; Tf top of flange; Tpb top of pump base. The distance of the measuring point above or below (-) land-surface datum is given in feet, tenths of a foot, and sometimes hundredths of a foot. All measurements listed in table 1 are from the same measuring point unless otherwise indicated in the column for measuring points.

Altitude: The figure given indicates the altitude, in feet above mean sea level, of the land-surface datum. Land-surface datum is an arbitrary plane that closely approximates land surface at the time of the first measurement and is the fixed plane of reference for all subsequent measurements. Altitudes, given in whole feet, were interpolated from Geological Survey topographic maps having 5-, 25-, and 40-foot contour intervals. Altitudes, given to the nearest tenth or hundredth of a foot, were taken from Los Angeles County Flood Control District data.

Water level: Measured depths to water are given in feet, tenths of a foot, and hundredths of a foot, or feet and tenths of a foot; reported or approximate depths to water are given in whole feet. The distance between land-surface datum and the measuring point has been subtracted from or added to the measured water level. Thus, all water levels are referenced to land-surface datum. Water levels with a plus (+) symbol are those above land-surface datum.

Other data: C chemical analyses of water are given in table 5; E electric log of well in files of the Geological Survey; L driller's log of well is given in table 4; P pumping test data are given in table 3; W additional water-level measurements are given in table 2. ;

Table 3.--Pumping tests of wells

Source of data: D driller; DGT Thompson (1929); DWR California Department of Water Resources; FC Los Angeles County Flood Control District; O owner; P pump service contractor; SCE Southern California Edison Co.; and WRB California Water Rights Board.

Depth of well: The depth shown is the depth of the well, in feet, as shown in table 1, and is not necessarily the depth on the date of the pumping test.

Pumping rate: The pumping rate, reported in gallons per minute (gpm), does not necessarily indicate the maximum capacity of the well, but is the rate at which the well was pumped at the time of the test.

Static water level: The static, or standing, water level is the reported depth to water at the time of the test. In some cases, the static water level may be higher than that listed because the standing water-level measurement was made minutes after completion of the test and reflects the water level during recovery, not the static level. Because the reported static water level is not always precise, the drawdown and specific-capacity values may not be exact.

Drawdown: The drawdown is the difference, in feet, between the static water level and the pumping water level.

Specific capacity: The specific capacity is a measure of the physical condition of the well and the aquifer or aquifers which it penetrates. A well with a large specific capacity is capable of a greater yield than a well with a small specific capacity. Specific capacity is obtained by dividing the pumping rate, in gallons per minute, by the drawdown, in feet, after an extended period of pumping.

Table 6.--Cross index of state numbers and other numbers

Table 6 lists the official state well numbers assigned to wells by the Geological Survey, cross indexed with the old numbers assigned to the well as follows: DWR California Department of Water Resources; FC Los Angeles County Flood Control District; J Johnson (1911); O owner; T Thompson (1929); and WRB California Water Rights Board. For well numbers assigned by the California Department of Water Resources prior to adoption of the uniform state well-numbering system, the township and range numbers and letters are omitted.

A lowercase letter preceding the well number indicates a footnote.

- LEGEND:
- SAINT ANDREW'S ABBEY LAND OWNERSHIP
 - LOS ANGELES COUNTY ASSESSOR'S PARCELS
 - JURISDICTIONAL BOUNDARY OF THE ANTELOPE VALLEY GROUNDWATER ADJUDICATION
 - UNITED STATES GEOLOGICAL SURVEY TOPOGRAPHIC MAP DATA (USGS 7.5 MIN. QUADRANGLES OF JUNIPER HILLS, CA. AND VALVERMO, CA.)

NOTE:

LOS ANGELES COUNTY ASSESSOR'S PARCELS (SHOWN IN RED) HAVE BEEN ADJUSTED TO APPROXIMATELY MATCH UNITED STATES GEOLOGICAL SURVEY (USGS) TOPOGRAPHIC MAP DATA FOR GUIDANCE AS TO GENERAL LOCATION OF SAINT ANDREW'S ABBEY LAND (PARCELS SHOWN IN GREEN). THE JURISDICTIONAL BOUNDARY (LINE SHOWN IN BLUE) OF THE ANTELOPE VALLEY GROUNDWATER BASIN HAS BEEN SUPERIMPOSED (BEST FIT) ON THE AFOREMENTIONED TOPOGRAPHIC MAP TO APPROXIMATE THE LOCATION OF SAINT ANDREW'S ABBEY LAND WITH RESPECT TO THE GROUNDWATER BASIN. THE ADOPTED JURISDICTIONAL BOUNDARY MAP APPEARS TO BE IMPRECISE IN AND AROUND SAINT ANDREW'S ABBEY.

PROOF OF SERVICE
STATE OF CALIFORNIA, COUNTY OF RIVERSIDE

Re: *ANTELOPE VALLEY GROUNDWATER CASES*
Los Angeles County Superior Court Judicial Council Coordinated
Proceedings No. 4408; Santa Clara County Superior Court Case No. 1-05-CV-049053

I am employed in the County of Riverside, State of California. I am over the age of 18 years and not a party to the within action; my business address is: 3750 University Avenue, Suite 250, Riverside, CA 92501-3335.

On December 21, 2012, I served the foregoing document(s) described as **CROSS-DEFENDANT, ST. ANDREW'S ABBEY, INC.'S [ROE 623] INFORMATION AND MATERIALS RESPONSIVE TO DECEMBER 12, 2012 DISCOVERY ORDER FOR PHASE 4 TRIAL** on the interested parties in this action in the following manner:

(X) **BY ELECTRONIC SERVICE** – I posted the document(s) listed above to the Santa Clara County Superior Court website, <http://www.sccfiling.org>, in the action of the Antelope Valley Groundwater Cases,

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed on December 21, 2012, at Riverside, California.

DINA M. SNIDER
