IN AND FOR THE COUNTY OF LOS ANGELES

Coordination Proceeding
Special Title (Rule 1550(b))

) Judicial Council Coordination
) Proceeding No. 4408

**ANTELOPE VALLEY GROUNDWATER
CASES**

) Santa Clara Case No. 1-05-CV-049053
) Assigned to the Honorable Jack Komar
) Department 17C

Including Consolidated Actions:

**Los Angeles County Waterworks District
No. 40 v. Diamond Farming Co.**
Superior Court of California, County of Los
Angeles, Case No. BC 325 201

) **CROSS-DEFENDANT, ST. ANDREW'S
ABBHEY, INC.'S [ROE 623]
DESIGNATION OF EXPERT
WITNESSES PURSUANT TO
DECEMBER 12, 2012 CASE
MANAGEMENT ORDER;
DECLARATION IN SUPPORT
THEREOF**

**Los Angeles County Waterworks District
No. 40 v. Diamond Farming Co.**
Superior Court of California, County of Kern,
Case No. S-1500-CV-254-348

) [Code of Civil Procedure § 2034.210 et seq.]

**Wm. Bolthouse Farms, Inc. v. City of
Lancaster**
Diamond Farming Co. v. City of Lancaster
**Diamond Farming Co. v. Palmdale Water
Dist.**
Superior Court of California, County of
Riverside, consolidated actions, Case Nos. RIC
353 840, RIC 344 436, RIC 344 668

) Phase 4 Trial Date: February 11, 2013
) Time: 9:00 A.M.
) Dept.: LA County Superior Court., Dept. 1
) Judge: Hon. Jack Komar

AND RELATED ACTIONS.

1 TO ALL PARTIES AND TO THEIR ATTORNEYS OF RECORD:

2 Pursuant to section 2034.210, et seq., of the *Code of Civil Procedure*, Cross-Defendant,
3 **ST. ANDREW'S ABBEY, INC. [ROE 623]** ("St. Andrew's Abbey" or the "Abbey"), by and
4 through its attorneys of record, Gresham Savage Nolan & Tilden, PC, by Michael Duane Davis,
5 Marlene L. Allen-Hammarlund, and Derek R. Hoffman hereby makes its designation of expert
6 witnesses as required by the December 12, 2012 *Case Management Order For Phase 4 Trial*,
7 issued by the Honorable Jack Komar, Trial Judge.

8 A. St. Andrew's Abbey designates the following as expert witnesses who may be
9 called to testify at the time of trial:

- 10 1. Robert A. Krieger
11 California Licensed Professional Engineer (RCE 15255)
12 Krieger & Stewart, Inc.
13 3602 University Ave.
Riverside, CA 92501
(951) 684-6900

14 B. St. Andrew's Abbey further reserves the right to call in rebuttal any expert
15 witness on issues which have not yet been disclosed by discovery as well as the right to
16 designate further experts prior to the trial pursuant to 2034.210, et seq. of the *Code of Civil*
17 *Procedure* and this Court's December 12, 2012 *Case Management Order For Phase 4 Trial*.

18 C. St. Andrew's Abbey further reserves the right to designate expert witnesses in
19 response to any expert witnesses designated by any other party to the above-referenced matter or
20 to impeach the testimony of an expert witness offered by any other party at trial pursuant to *Code*
21 *of Civil Procedure* section 2034.310 et seq. and this Court's December 12, 2012 *Case*
22 *Management Order For Phase 4 Trial*.

23 ///

24 ///

25 ///

26 ///

27 ///

1 D. St. Andrew's Abbey further reserves the right to supplement, augment, modify or
2 change this expert designation as allowed under the *Code of Civil Procedure* and this court's
3 December 12, 2012 *Case Management Order For Phase 4 Trial*.

4
5 Respectfully submitted,

**Professional Record
of
ROBERT A. KRIEGER**

2012

I. PERSONAL DATA

A. Professional Registration (Civil Engineering)

California, Arizona, Nevada, Oregon, Washington

B. Professional Affiliations

1. Member – American Society of Civil Engineers, National Organization, Los Angeles Section, and Local Chapter
2. Member – National Society of Professional Engineers and California Society of Professional Engineers. Past President of Riverside-San Bernardino Chapter of the latter.
3. Member – American Council of Engineering Companies
4. Member – American Public Works Association
5. Member – American Water Works Association, National Organization and California Section
6. Member – Water Environment Federation and California Water Environment Association
7. Member – National and California Ground Water Associations
8. Member – Groundwater Resources Association of California
9. Member – United States Committee on Irrigation, Drainage, and Flood Control
10. Member – Western Coalition of Arid States
11. Member – WaterReuse Association of California
12. Member – Southern California Water Utilities Association
13. Member, Past Chairman – Southern California Water Committee
14. Associate Member – Association of California Water Agencies
15. Member – Colorado River Water Users Association
16. Member – American Ground Water Trust

C. Formal Education

1. Bachelor of Science in Engineering (Civil Option)
University of California, Berkeley (1962)
2. Graduate Courses:
 - a. Advanced Sanitary Engineering Design - Water Treatment
University of Southern California, Los Angeles (1965)
 - b. Advanced Sanitary Engineering Design - Sewage Treatment
University of Southern California, Los Angeles (1967)
 - c. Biological Unit Processes
California State Polytechnic University, Pomona (1974)

D. Continuing Education

1. Economics
University of California Extension, Riverside (1958)
2. Water Resources Engineering
University of California Extension, Riverside (1965)
3. Street and Highway Drainage
University of California Extension, Riverside (1966)
4. Hydrologic Design Methods
University of California Extension, Riverside (1966)
5. Legal Aspects of Water Resource Allocation
University of California Extension, San Francisco (1968)
6. Ground Water Pollution
University of California Extension, San Francisco (1973)
7. Water Supply Wells and Pumps
University of California Extension, Davis (1981)
8. Hydraulics of Flood Works
California State University, Long Beach (1983)
9. California Water Law
University of California Extension, Riverside (1988)
10. Water Marketing: Current Issues and Opportunities
University of California Extension, Santa Barbara (1993)

II. EXPERIENCE RECORD

A. Testimony as Expert Witness (Excluding Depositions)

1. California Public Utilities Commission

Riverside (City of) vs. Southwest Water Company on behalf of Riverside (City of):
Water System Valuation
2. State Water Resources Control Board

Elmore vs. Imperial Irrigation District on behalf of Elmore: Water Use and Irrigation
Efficiency (Board Decision 1600, 1984)
3. Superior Courts of Kern, Los Angeles, Riverside, Sacramento, and San Bernardino
Counties
 - a. Barstow, et al. vs. Adelanto, et al. on behalf of Jess Ranch and Lenwood
Ranch: Mojave River Water Rights Adjudication (1995)
 - b. Cabazon County Water District vs. TAIFU Properties on behalf of Cabazon
County Water District: Reservoir Site Condemnation (1995)
 - c. Caltrans vs. Brookhurst Mill on behalf of Brookhurst Mill: Highway Right-of-
Way Condemnation (1996)
 - d. Clark vs. Riverside (City of) on behalf of Riverside (City of): Irrigation
Reservoir Operation (Storm Release Damage) (1983)
 - e. Coachella Valley Water District vs. Southern California Water Company on
behalf of Coachella Valley Water District: Water System Condemnation
(1988)
 - f. Cochran vs. Cedarpines Park Mutual Water Company on behalf of Cochran:
Groundwater Well Interference and Water Rights (1999)
 - g. Colton (City of) vs. Grand Terrace (City of) on behalf of (City of) Colton:
Wastewater Treatment Plant Capacity Allocation (1980)
 - h. Construction Leasing/Parks vs. Ibbetson/Stevens on behalf of Ibbetson: Rainfall
Runoff and Flooding Damage Including Water Course Blockage. (1989)
 - i. Corona (City of) vs. Lipari on behalf of Wetzel: Flood Control Right-of-Way
Condemnation (1990)
 - j. Culligan vs. San Bernardino (City of) Redevelopment Agency on behalf of
Culligan: Water Quality, Rainfall Runoff, and Flooding Damage (1983)
 - k. Davis vs. Santa Fe on behalf of Davis: Rainfall Runoff and Flooding Damage,
including Channel Bank Failure and Property Erosion and Encroachment
(1980)

- l. Deckert vs. Riverside (County of) on behalf of Riverside (County of): Rainfall Runoff and Flooding Damage (1981)
- m. Donsback vs. Townson on behalf of Townson: Site and Building Construction Deficiencies (1998)
- n. Eastern Municipal Water District vs. Tajik on behalf of Eastern Municipal Water District: Recycled Water Pipeline Rights of Way Condemnation (2008)
- o. Eischen vs. County of San Bernardino on behalf of Eischen: Flooding related to Storm Channel Construction (1994)
- p. Furdui vs. Riverside (County of), et al., on behalf of Glen Avon Mutual Water Company: Rainfall Runoff and Flooding Damage (2000)
- q. Goad vs. Deseret on behalf of Goad: Irrigation Water System Facilities Defects (1988)
- r. Goldmann vs. Knox on behalf of Knox: Storm Water Diversion and Flooding Damages as well as Site Grading Deficiencies (1996)
- s. Johnson vs. Riverside (City of) on behalf of Riverside (City of): Rainfall Runoff and Flooding Damage (1981)
- t. Liedtke, et al. vs. Indian Wells Valley Water District on behalf of Indian Wells Valley Water District: Waterline Inverse Condemnation (1992)
- u. Markoulis vs. Cook on behalf of Markoulis: Recreation Lake Grading Deficiencies (1994)
- v. Metropolitan Water District vs. Stubblefield on behalf of Stubblefield: Aqueduct Tunnel Right of Way Condemnation (2000)
- w. Mitchell Pacific vs. City of San Buena Ventura on behalf of Mitchell Pacific: Reservoir Construction Document Dispute (1998)
- x. Morger vs. Western Waste Industries on behalf of Western Waste Industries: Fee Land and Road Easement Dispute (1997)
- y. Moss vs. Kelly on behalf of Kelly: Storm Water Discharge and Associated Property Flooding Damages (1999)
- z. Myers vs. Four Point Contractors on behalf of Four Point Contractors: Storm Drain Construction Deficiencies (1990)
- aa. Nastronero vs. Ashley on behalf of Ashley: Subdivision Site Grading Deficiencies (1983)
- bb. Opotowsky vs. Riverside (City of) on behalf of Riverside (City of): Irrigation Reservoir Operation (Storm Release Damage) (1983)

- cc. Phillipi v. Ault, Meadowview Community Association, et al, on behalf of Meadowview Community Association: Rainfall Runoff and Flooding Damage (2011)
 - dd. Riverside (City of) vs. Robinson on behalf of Robinson: Highway Right-of-Way Condemnation (1999)
 - ee. Riverside County Flood Control and Water Conservation District vs. Rodriquez, et al, on behalf of Richardson: Flood Control Right-of-Way Condemnation (1985)
 - ff. San Bernardino County Flood Control District vs. Olson on behalf of Olson: Flood Control Right-of-Way Condemnation (1996)
 - gg. Smith vs. Domenigoni on behalf of Smith: Rainfall Runoff and Flooding Damage (1983)
 - hh. Sungate Country Owners Association vs. Sungate Country on behalf of Sungate Country: Development Construction Deficiencies (1994)
 - ii. Tamarisk Country Club vs. Coachella Valley Water District on behalf of Coachella Valley Water District: Water Well Pumping Unit Failure (1981)
 - jj. Wehunt vs. Andrew on behalf of Andrew: Water Course Alteration and Flooding Damages (1996)
 - kk. Wiseman vs. Pegg on behalf of Wiseman: Site and Building Construction Deficiencies (1986)
 - ll. Zimmerman vs. San Bernardino County Flood Control District on behalf of Zimmerman: Inverse Condemnation, Flood Damage (1999)
4. United States Court of Federal Claims
- Tulare Lake Basin Water Storage District, et al., vs. The United States on behalf of Tulare Lake Basin Water Storage District, et al.: Valuation of Water Taken by the Federal Government, Inverse Condemnation (2002)

B. Testimony as Other than Expert Witness (Excluding Depositions)

Superior Courts of Riverside and Sacramento Counties

- 1. Alameda County Flood Control & Water Conservation District, et al. vs. State of California Department of Water Resources as Person Most Knowledgeable on behalf of certain (southern) State Water Project Contractors: State Water Project Power & Energy Cost and Revenue Allocation (2008)
- 2. Belair, et al. vs. Riverside County Flood Control & Water Conservation District as a Percipient Witness on behalf of Belair: Flood Control Channel Levee Failure (1988)

C. Work History

July 1971 to 2012

Chairman of the Board, Krieger & Stewart, Incorporated, Riverside, California with representative assignments including:

Consultant to numerous cities, counties, and special districts on public works projects, particularly water, wastewater, and flood control.

Service as expert witness in litigated matters involving property condemnation, water rights, ground water, surface water, irrigation, drainage, flooding, and construction.

Investigation of alternative aqueduct systems for a State Water Project Contractor (110 CFS capacity, 100 miles in length).

Investigation of the effect of a flood control project on recharge of surface water runoff (18,000 CFS peak discharge) in a natural streambed and downstream flood plain.

Investigation of potential flooding which would result from sudden and complete failure of a concrete arch dam as required by State mandated program (250,000 CFS peak discharge).

Preparation of engineering appraisals of water and wastewater systems based on cost, earnings, income, and rates.

Preparation of water and wastewater General Plans for communities with projected populations to 200,000 persons.

Preparation of Environmental Impact Reports for water and wastewater projects for communities with projected populations to 100,000 persons.

Preparation of contract documents for and administration and management of water system construction projects including extraction wells (to 24" diameter and to 2,000' deep), pumping plants (to 2400 hp), gravity and pressure pipelines (to 78" diameter), storage tanks (to 12 MG), and ancillary facilities such as buildings and roads.

Determination of Warren Groundwater Basin safe (perennial) yield and advice to court on same.

Determinations and verifications of water rights for Jess Ranch and for Lenwood Ranch in Mojave River water rights adjudication.

Participation in various groundwater projects especially in the Coachella Valley, the Indian Wells Valley, the Mojave and Santa Ana River systems, and the San Geronio Pass.

Participation in Imperial Irrigation District/Metropolitan Water District Water Conservation Program (conservation of 110,000 acre feet of water/year through specific water conservation projects) as a member of Water Conservation Measurement Committee representing Coachella Valley Water District and, currently, Chairman of the Conservation Program Coordinating Committee.

Valuation of water taken by the United States from the Sacramento San Joaquin Delta which otherwise would have been diverted by the State Water Project for delivery to Kern County Water Agency and Tulare Lake Basin Water Storage District.

February 1962 to July 1971

Engineer to Senior Engineer, Albert A. Webb Associates, Riverside, California with representative assignments as follows:

Preparation of construction drawings for streets and highways, street and pad grading, and water and sewer line installations for small subdivisions.

Preparation of water and wastewater feasibility reports including studies on population, water requirements, sewage contributions, facilities design, construction costs, and project financing.

Preparation of inventories and appraisals of water and sewage systems to 10,000 connections. Preparation of reports on water resources (entitlement, production, quantity, quality, supply, use, reuse, and disposal).

Engineering design of facilities, preparation of Contract Documents (including drawings and specifications), and supervision of construction inspection for water and wastewater systems, including source plants, pumping plants, treatment plants, transmission facilities, distribution and collection systems, storage facilities, and disposal facilities.

Participation in investigation, design, and inspection of water and wastewater facilities including aqueducts consisting of pipelines and open channels.

June 1958 to January 1961

Engineering Aide, Matich Corporation, Colton, California with representative assignments as follows:

Participation in cost comparisons of alternative construction methods for specific project functions. Preparation of time and motion studies related to same. Testing of construction materials and participation in construction surveying. Participation in project cost estimating.

Supervision of construction, including street and pad grading, street paving, curb and gutter installation, and water and sewer line construction for small subdivisions.

May 1957 to May 1958

Engineering Technician, Hugh M. Gallaher, Incorporated, Riverside, California with representative assignments as follows:

Part-time work while student at University of California, Riverside, under the direction of Hugh M. Gallaher. Work included soils investigations including borings, sampling, density determinations, laboratory tests, concrete sampling and testing, and related analyses.

January 1956 to April 1957

Engineering Technician, Albert A. Webb Associates, Riverside, California with representative assignments as follows:

Part-time work while student at University of California, Riverside, under the direction of Hugh M. Gallaher. Work included preliminary soils investigations including borings, sampling, density determinations, laboratory tests, concrete sampling and testing, and related analyses.

WATER RELATED APPRAISAL EXPERIENCE

Water related appraisals prepared by Robert A. Krieger while employed by both Krieger & Stewart and Albert A. Webb Associates:

During Employment with Krieger & Stewart, Incorporated (1971 - Present):

- Antelope Valley Water Company (China Lake and Inyokern Systems) on behalf of the Indian Wells Valley Water District for acquisition by the District (1983)
- California American Water Company (Felton District System) on behalf of San Lorenzo Valley Water District for acquisition by the District (2007)
- California American Water Company (Montara System) on behalf of the Montara Sanitary District for acquisition by the District (2003)
- HLM Water Company System on behalf of the Indian Wells Valley Water District for acquisition by the District (1984)
- Panorama Heights Water Company System on behalf of the Joshua Basin Water District for acquisition by the District.
- Patton State Hospital Water System on behalf of the East Valley Water District for acquisition by the District (1988)
- Santiago Water Company System on behalf of the City of Orange for acquisition by the City (1972)
- Southern California Water Company (La Quinta System) on behalf of the Coachella Valley Water District for acquisition by the District (1987)
- Southern California Water Company (Morongo Valley System) on behalf of the San Bernardino County Special Districts Department for acquisition by the County of San Bernardino (1985).
- Southern California Water Company (Morongo Valley System) on behalf of the Morongo Valley Community Services District for acquisition by the District (1990)
- Southern California Water Company (San Bernardino District System) on behalf of the Highland Delmann Heights Water Quality Supply Authority, a joint powers authority of the City of San Bernardino and East Valley Water District, for acquisition by the Authority (1986)
- Sunnymead Mutual Water Company on behalf of the Eastern Municipal Water District for acquisition by the District (1989)
- Tri Palms Wastewater System on behalf of the Coachella Valley Water District for acquisition by the District (1986)
- Tulare Lake Basin Water Storage District, et al. (State Water Project water taken by the United States) on behalf of Tulare Lake Basin Water Storage District, et al. in preparation for litigation in the United States Court of Federal Claims (2002)

- Whitewater Mutual Water Company Water System, including water rights and water facilities, on behalf of Whitewater Mutual Water Company and Desert Water Agency (2007)
- Wilson Creek (Vail Lake) Water Rights for acquisition on behalf of Riverside Land Conservancy (2010)

During Employment with Albert A. Webb Associates (1964 - 1971):

- Cathedral City Water Company System on behalf of the Desert Water Agency for acquisition by the Agency (1967)
- Escondido Water System on behalf of Escondido Mutual Water Company in connection with acquisition by the City of Escondido (1968)
- Joshua Tree Service Company (Joshua Tree and Friendly Hills Water Systems) on behalf of the Joshua Basin County Water District for acquisition by the District (1964)
- Oro Grande water and sewage systems on behalf of Riverside Cement Company in connection with the County of San Bernardino's acquisition of same (1968)
- Palm Springs Water Company System on behalf of the Desert Water Agency for acquisition by the Agency (1967)
- Rancho Ramon Water Company (Hidden River Ranchos, Sun Fun Ranchos, and Paradise Valley Water Systems) on behalf of the Joshua Basin County Water District for acquisition by the District (1964)
- Sun Fair Water Company, Panorama Heights Water Company, and Joshua Terrace Water Company Systems on behalf of the Joshua Basin County Water District for acquisition by the District (1964)
- Southwest Water Company (La Sierra System) on behalf of the City of Riverside for acquisition by the City (1965)
- Sunnyslope Heights Water Company System on behalf of Jurupa Community Services District for acquisition by the District.

NOTE: LOS ANGELES COUNTY ASSESSOR'S PARCELS (SHOWN IN RED) HAVE BEEN ADJUSTED TO APPROXIMATELY AND REASONABLY MATCH UNITED STATES GEOLOGICAL SURVEY (USGS) TOPOGRAPHIC MAP DATA FOR GUIDANCE AS TO GENERAL LOCATION OF SAINT ANDREW'S ABBEY LAND (PARCELS SHOWN IN GREEN). THE JURISDICTIONAL BOUNDARY (LINE SHOWN IN BLUE) OF THE ANTELOPE VALLEY GROUNDWATER BASIN HAS BEEN SUPERIMPOSED (BEST FIT) ON THE AFOREMENTIONED TOPOGRAPHIC MAP TO APPROXIMATE THE LOCATION OF SAINT ANDREW'S ABBEY LAND WITH RESPECT TO THE GROUNDWATER BASIN. THE ADOPTED JURISDICTIONAL BOUNDARY MAP APPEARS TO BE IMPRECISE IN AND AROUND SAINT ANDREW'S ABBEY.

Saint Andrew's Abbey Land Ownership Map prepared by Krieger & Stewart, dated March 2, 2102.

Assessor's records are included herein for each real property shown on the land ownership map included

All 29 parcels are owned by the Saint Andrew's Abbey/Saint Andrew's Priory.

Saint Andrew's Abbey Wells 4N/10W-11A1 and 4N/10W-11A2 are located on APN 3060-016-002.

Saint Andrew's Abbey Well 4N/10W-2Q1 is located on APN 3060-008-017.

All three wells described here are located within the BASIN and have been active since January 1, 1951.

See the land ownership map [\[link\]](#) for the well locations.

Essentially zero groundwater produced on APN 3060-016-002 is used thereon. All water is conveyed from the wells through underground pipelines to an above ground storage tank on APN 3061-025-010 and to several other parcels owned by Saint Andrew's Abbey for domestic and irrigation uses.

All groundwater produced on APN 3060-008-017 is used on the parcel for landscape irrigation and caretaker residence domestic uses.

The general historic use for all parcels owned by Saint Andrew's Abbey within the BASIN has been used for support of a religious institution with related teaching and agriculture.

Included herein are the Google images depicting the land use from 1994 to present day.

Included herein are the annual production quantities and supporting data as prepared by Krieger & Stewart utilizing electrical consumption records and Southern California Edison (SCE) hydraulic pump test reports for tests performed on Saint Andrew's Abbey Wells 4N/10W-11A1 and 4N/10W-11A2 between 1985 and 2011.

No SCE hydraulic pump tests were performed on Saint Andrew's Abbey Well 4N/10W-2Q1 prior to March 2012 and no groundwater recordation notices have been found. Therefore, production data from that well is unknown.

Production from Wells 4N/10W-11A1 and 4N/10W-11A2 occurs on APN 3060-016-002. Production from Well 4N/10W-2Q1 occurs on APN 3060-008-017.

Subject: Saint Andrew's Abbey
Groundwater Extractions

Dear Mr. Davis:

By email dated March 16, 2012, we provided you with the data set forth in Table 1, attached. The annual groundwater extraction quantities are based on the Annual Notices of Groundwater Extraction filed by the Abbey with the State Water Resources Control Board, Water Rights Division.

The reported quantities for Wells 1 and 2 for 2000, 2001, and 2002 are based on Southern California Edison Company (Edison) historical energy use records; however, the unit energy use factors used to derive the groundwater extraction quantities are not supported by hydraulic test report data. They are therefore suspect. The reported quantities for Wells 1 and 2 for 2003 and 2004 are based on the water meter readings.

Subsequent to providing you with the above, we obtained and reviewed Edison historical energy use data and hydraulic pump test reports. We then calculated the quantities of water pumped from Wells 1 and 2 and the Nickel's Ranch Well based on the Edison data.

Wells 1 and 2 are each equipped with a separate, independent electric meter; however, the electric meters for Nickel's Ranch and the caretaker's cabin measure combined electric energy use for both the well pumping unit and the residential unit. The groundwater extractions for Wells 1 and 2 are based on calculations using the Edison data. The groundwater extractions for the Nickel's Ranch and caretaker's cabin are each based on average use for domestic water and landscape irrigation for a single residential unit. The quantities for these wells are set forth in Table 2.

The water meter was installed in 2000. During 2001, Edison hydraulically tested the pumping units for Wells 1 and 2 and determined pump discharges to be 6.5% higher than the water meter indicated. In 2012, Edison hydraulically tested the same two pumping units and determined pump discharges to be 6.4% higher than the water meter indicated. For some reason, the Abbey did not use the water meter to determine groundwater extractions for 2001 and 2002, but did for 2003 and 2004.

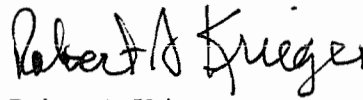

Since Edison pump capacity or discharge measurements were consistently higher than the water meter measurements and since the Abbey did not use the water meter measurements for 2001 and 2002 as they had for 2003 and 2004, we have more confidence in the groundwater extraction quantities set forth in Table 2, attached, than those set forth in Table 1. We hereby opine that the groundwater extractions set

Michael Duane Davis

Page 2

forth in Table 2 accurately and reasonably represent the water pumped and put to beneficial use by Saint Andrew's Abbey.

Sincerely,

KRIEGER & STEWART

A handwritten signature in black ink, appearing to read "Robert A. Krieger". The signature is fluid and cursive, with the first name "Robert" and last name "Krieger" being the most prominent parts.

1. Kilowatt-hour/AF conversion factors : 239 (1983 - 1990), 220 (1991), 200 (1992), 197 (1993 - 1994), 243 (1995), 259 (1996 - 1999), 126 (2001), and 134 (2012). kWh/AF factors interpolated between late 2001 and 2012.

2. In the year 2000, the Kilowatt-hour/AF conversion factors are 259 (January - August) and 126 (September - December). Change is a result of new pump installation at well site.

DATA PROVIDED BY RICK KOCH OF SOUTHERN CALIFORNIA EDISON.

* ELECTRICAL USAGE DATA UNAVAILABLE FOR NOVEMBER AND DECEMBER IN 2012. FOR WELLS 1 & 2, THE AVERAGE USAGE FROM THE LAST 10 YEARS OF ACTUAL RECORDED DATA IN EACH MONTH WAS USED IN THE ABSENCE OF ACTUAL RECORDED DATA IN THE PRESENT YEAR.

Subject: Saint Andrew's Abbey Groundwater Production

Mr. Davis,

We have collected, and are continuing to collect, electrical data for the analysis of groundwater production at Saint Andrew's Abbey from 2000 to 2004.

We have acquired, from Southern California Edison (SCE), the hydraulic pump test reports prepared in 1996 and 2001 for Wells 1 and 2. In addition to the hydraulic pump test reports, we have also requested the annual electrical use data for each well. We should receive that data from SCE within a week or so.

We have also requested new hydraulic pump tests for Wells 1 and 2, and the well located at the former Nickel's Ranch, to obtain the current pumping conditions. We will update you on when those tests are to be performed once we are notified.

In review of the previous pump test reports, we believe them to be fairly reliable. Using the Kilowatt-hour (KWh) figures reported therein, the annual production quantities during this time period will vary from the previously reported quantities.

With this information, we will revise the annual production quantities using the annual electrical use data, and the appropriate KWh figure determined from the hydraulic pump test reports.

If you have any questions regarding this information please give me a call.

Thank you,

Kimberly J. Luker

Subject: Saint Andrew's Abbey Reported Groundwater Extractions
Importance: High

Mr. Mark Davis,

Attached is a summary table which includes the annual reported groundwater extractions for the two wells owned by Saint Andrew's Abbey. We are in the process of verifying and/or revising these figures appropriately.

Before 2002, the groundwater extractions were estimated using the Southern California Edison power meters. We are currently working to determine the appropriate KWh factor per acre-feet of water during this period.

The Abbey used 163 KWh per acre feet from late 2000 through 2002. It is unclear how the 163 figure was determined. In an Edison hydraulic test report (dated August 27, 2001) found on file at the Abbey, the KWh per acre-feet was reported as 126. This test was conducted on the new pump that was installed in late 2000.

Using the Edison figure, which we believe to be reasonable, the groundwater extractions for late 2000 through 2002 may be higher than what was originally reported.

Also, we have water meter records starting in August 2002, as well as the power meter records used in the annual reporting that year. In a preliminary comparison of the power usage and water meter records the later half of the year, we estimate that the KWh figure was approximately 180 per acre-feet, which is a decrease in the quantity than what was reported.

We will report our findings as we review further review this material and determine the appropriate KWh figure for 2000 - 2002. The groundwater extractions for 2003 and 2004 were determined from the water meter records only.

In addition to the these two wells owned by the Abbey, it is uncertain what quantity of groundwater was extracted from the Nickel's Ranch well and the Abbey caretaker's residence well. We are assigning a preliminary estimate for these wells at 1 acre-foot each per year. We will report any information regarding the groundwater extractions for these wells as they become available.

If you have any questions regarding the information I have provided you here, please let me know.

Thank you,

Kimberly J. Luker

[FINAL SUBMITTED VERSION]**ANNUAL NOTICE OF GROUNDWATER EXTRACTION AND DIVERSION FOR 2011**

Primary Owner: ST ANDREWS ABBEY

Recordation Number: G192295

Date Submitted: 2012-06-25

1. Reporting to a Local Agency	
Local Agency	Submitter does not report to a local agency.

2. Type(s) of Diversion	
a. Groundwater Extraction	> 25 acre-feet
b. Surface Diversion	None

3. Ownership Type of Owner(s) on Record	
Ownership Type	Owner of land on which well or point of diversion is located, and is extracting/diverting water

4. Amount of Groundwater Extracted During Calendar Year	
Amount Extracted	142.0 Acre-Feet

5. Amount of Surface Water Diverted or Used	
Not applicable; Surface Diversion was not chosen as a type of diversion.	

5d. Maximum Rate of Surface Water Diversion	
Not applicable; Surface Diversion was not chosen as a type of diversion.	

6. Method of Measurement	
Method of Measurement	Power Meter

7. Type(s) of Use	
Other	See Supplemental Information
Domestic	22 Permanent Residents
Irrigation	10.0 Acres Tree Fruit (Other)

8. Action Requested	
Action Requested	Record my water use

9. Supplemental Information	
Supplemental Information	The Abbey conducts 1 day and 2 night (overnight) retreats throughout the year. 1 day retreats average 60 to 80 visitors 1 to 2 times per week. There are 125 overnight (2 night) retreats throughout the year at the Abbey that average approximately 7,000 people per year, and it irrigates approximately 13 acres of turf, tree, shrub, and floral landscaping throughout the Abbey property. Also, please note that the well location description is incorrect. This well is located in Section 11 of said township and range, not Section 2.

MAY 29 2009

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles, and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Notice of Groundwater Extraction and Diversion is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) if annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices that are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write to the address on the top of this form, or telephone (916) 341-5300.

TABLE 1: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) to applied water depth (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

CROP	COLUMN 1	COLUMN 2	COLUMN 3
	ACRES	AVERAGE APPLIED WATER DEPTH (acre-feet per acre)	AMOUNT PUMPED (acre-feet) (column 1 X column 2)
CONVERSION FACTORS One acre-foot (af) = 43,560 cubic feet = 325,900 gallons One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, one foot deep			TOTAL IRRIGATION USE

TABLE II: AVERAGE DEPTH OF WATER APPLIED TO IRRIGATE EACH CROP (acre-feet per acre)¹

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles, and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Notice of Groundwater Extraction and Diversion is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) if annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices that are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write to the address on the top of this form, or telephone (916) 341-5300.

TABLE 1: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) to applied water depth (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

CROP	COLUMN 1	COLUMN 2	COLUMN 3
	ACRES	AVERAGE APPLIED WATER DEPTH (acre-feet per acre)	AMOUNT PUMPED (acre-feet) (column 1 X column 2)
CONVERSION FACTORS One acre-foot (af) = 43,560 cubic feet = 325,900 gallons One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, one foot deep			TOTAL IRRIGATION USE

Arnold Schwarzenegger
Governor

TO ALL WATER USERS FILING ANNUAL NOTICES OF GROUNDWATER EXTRACTION AND DIVERSION OF WATER

April 2004

Enclosed is your Annual Notice of Groundwater Extraction and Diversion form (Notice) for 2003. Water Code sections 4999 et seq., with few exceptions, require persons who extract groundwater from all wells located in Riverside, San Bernardino, Los Angeles, and Ventura Counties in excess of 25 acre-feet in any year to file a Notice. In addition, Water Code section 5100 allows you to use this annual report to record riparian and pre-1914 surface diversions of water in these counties in lieu of filing a Statement of Water Diversion and Use.

California Code of Regulations, title 23, section 1070 increased the fee for filing a Notice to \$115. **All Notices must be completed and returned with the required \$115 filing fee, by the close of business on June 30, 2004, in order to be recorded by the State Water Resources Control Board (SWRCB).** Notices received after June 30, 2004, notices that are not complete, or notices received without the accompanying \$115 filing fee constitute noncompliance with the provisions of Water Code section 5004 and will be deemed equivalent to nonuse of water for the indicated year. In such case, your water use will not be recorded, and the Notice will be returned to you.

If you do not file a Notice for five consecutive years, the use will be considered inactive, and the SWRCB will no longer mail you a Notice for that well. Nonuse of water over an extended period may lead to the loss of water rights. If you wish to reactivate an inactive recordation, you must notify us in writing and submit the required \$115 record reactivation fee.

We ask for your assistance in correcting any errors that may exist in our database. Please review the information in the upper half of the Notice and make any corrections or additions that may be needed in red (e.g., current ownership, address, assigned agent, etc.).

To summarize, please complete and return the Notice to the SWRCB at the address shown on the form with the \$115 filing fee. The form must be received by the close of business on June 30, 2004. We regret that we are unable to provide the option of online filing this year.

Please contact Koso Nodohara of this office at (916) 341-5366 if you need assistance or additional information.

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles, and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Notice of Groundwater Extraction and Diversion is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) if annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 341-5300.

TABLE 1: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) to applied water depth (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

CROP	COLUMN 1	COLUMN 2	COLUMN 3
	ACRES	AVERAGE APPLIED WATER DEPTH (acre-feet per acre)	AMOUNT PUMPED (acre-feet) (column 1 X column 2)
CONVERSION FACTORS One acre-foot (af) = 43,560 cubic feet = 325,900 gallons One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, 1 foot deep			TOTAL IRRIGATION USE

TABLE II: AVERAGE DEPTH OF WATER APPLIED TO IRRIGATE EACH CROP (acre-feet per acre)*

LOCALITY	ALFALFA	AVOCADOS	BEANS	DATES	LEMONS	LETTUCE	PERMANENT PASTURE	TOMATOES

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles, and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Notice of Groundwater Extraction and Diversion is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) if Annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 341-5300.

TABLE 1: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) to applied water depth (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

CROP	COLUMN 1	COLUMN 2	COLUMN 3
	ACRES	AVERAGE APPLIED WATER DEPTH (acre-feet per acre)	AMOUNT PUMPED (acre-feet) (column 1 X column 2)
CONVERSION FACTORS One acre-foot (af) = 43,560 cubic feet = 325,900 gallons One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, 1 foot deep			TOTAL IRRIGATION USE

TABLE II: AVERAGE DEPTH OF WATER APPLIED TO IRRIGATE EACH CROP (acre-feet per acre)*

NOTICE TO THE PERSON WHO FILES THE ANNUAL NOTICE OF GROUNDWATER EXTRACTION AND DIVERSION

May 2002

This year you may file your Annual Notice of Groundwater Extraction and Diversion (Notice) on-line if you have access to the Internet. **If you file your Notice on-line, you do not have to send in the enclosed Notice.** To file your Notice on-line, go to the Division of Water Rights (Division) website at:

<http://www.waterrights.ca.gov>

Click on the link line **Annual Water Use Reports** (Electronic Filing of Report of Licensee, Progress Report of Permittee, Supplemental Statement of Water Diversion and Use, and Annual Notice of Groundwater Extraction and Diversion) and follow the instructions. You need your **Username** and **Password** to log on to the website. Your **Username** is the Recordation Number printed on the enclosed Notice form and your **Password** is printed immediately below the Recordation Number. You must enter your **Username** and **Password** exactly the same as they are printed on the enclosed Notice. You have ten working days to amend your Notice after you submit your Notice on-line.

If you do not file your Notice on-line, please complete the enclosed Notice to the best of your knowledge and return it to this office. However, you can still change your owner or agent information on-line if there are any changes since your last report. Thank you for your cooperation.

Please file on-line or return the completed enclosed form to the Division by 5 p.m. on June 30, 2002. If you have any questions or need assistance with completing the Notice form, please contact Bill Rigby at (916) 341-5376 or Koso Nodohara at (916) 341-5366.

Sincerely,

Larry L. Attaway
Program Manager

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Notice of Groundwater Extraction and Diversion is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) if Annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 341-5300

TABLE 1: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) times applied water depth (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

CROP	COLUMN 1	COLUMN 2	COLUMN 3
	ACRES	AVERAGE APPLIED WATER DEPTH (acre-feet per acre)	AMOUNT PUMPED (acre-feet) (column 1 X column 2)
CONVERSION FACTORS One acre-foot (a. f.) = 43,560 cubic feet = 325,900 gallons One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, 1 foot deep			TOTAL IRRIGATION USE

TABLE II: AVERAGE DEPTH OF WATER APPLIED TO IRRIGATE EACH CROP (acre-feet per acre)*

LOCALITY	ALFALFA	AVOCADOS	BEANS	DATES	LEMONS	LETTUCE	PERMANENT PASTURE	TOMATOES

NOTICE TO THE PERSON WHO FILES ANNUAL NOTICE OF GROUNDWATER EXTRACTION AND DIVERSION

This year you may file your Annual Notice of Groundwater Extraction and Diversion (Notice) on-line if you have access to the World Wide Web (WWW). **If you file your Notice on-line, you do not have to send in the enclosed Notice.** To file your Notice on-line go to the Division of Water Rights (Division) website at:

<http://www.waterrights.ca.gov>

Click the first link line **Annual Water Use Reports (Report of Licensee, Progress Report of Permittee, Supplemental Statement of Water Diversion and Use, Annual Notice of Groundwater Extraction and Diversion)**. Follow the instruction on the Water Right Reports Program Web page. You need your **Username** and **Password** to log on to fill out your Notice. Your **Username** is the Recordation No. printed on the enclosed Notice form and your **Password** is printed immediately below the Recordation No.. You must enter your **Username** and **Password** exactly the same as they are printed on the enclosed Notice.

If you file your Notice on-line, you have ten working days to amend your Notice after you submit your Notice on-line.

If you do not file your Notice on-line please complete the enclosed Notice to the best of your knowledge and return it to this office. Thank you for your cooperation.

If you have any questions or need assistance with completing the Notice, please call Koso Nodohara at (916) 341-5366.

Sincerely,

Larry L. Attaway
Program Manager

This year you may file your Annual Notice of Groundwater Extraction and Diversion (Notice) on-line if you have access to the World Wide Web (WWW). **If you file your Notice on-line, you do not have to send in the enclosed Notice.** To file your Notice on-line go to the Division of Water Rights (Division) website at:

<http://www.waterrights.ca.gov>

Click the first link line **Annual Water Use Reports (Report of Licensee, Progress Report of Permittee, Supplemental Statement of Water Diversion and Use, Annual Notice of Groundwater Extraction and Diversion)**. Follow the instruction on the Water Right Reports Program Web page. You need your **Username** and **Password** to log on to fill out your Notice. Your **Username** is the Recordation No. printed on the enclosed Notice form and your **Password** is printed immediately below the Recordation No.. You must enter your **Username** and **Password** exactly the same as they are printed on the enclosed Notice.

If you file your Notice on-line, you have ten working days to amend your Notice after you submit your Notice on-line.

If you do not file your Notice on-line please complete the enclosed Notice to the best of your knowledge and return it to this office. Thank you for your cooperation.

If you have any questions or need assistance with completing the Notice, please call Koso Nodohara at (916) 341-5366.

Sincerely,

Larry L. Attaway
Program Manager

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Notice of Groundwater Extraction and Diversion is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) if Annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 341-5300

TABLE 1: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) times applied water depth (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

CROP	COLUMN 1	COLUMN 2	COLUMN 3
	ACRES	AVERAGE APPLIED WATER DEPTH (acre-feet per acre)	AMOUNT PUMPED (acre-feet) (column 1 X column 2)
CONVERSION FACTORS One acre-foot (a. f.) = 43,560 cubic feet - 325,900 gallons One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, 1 foot deep			TOTAL IRRIGATION USE

TABLE II: AVERAGE DEPTH OF WATER APPLIED TO IRRIGATE EACH CROP (acre-feet per acre)*

LOCALITY	ALFALFA	AVOCADOS	BEANS	DATES	LEMONS	LETTUCE	PERMANET PASTURE	TOMATOES

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Notice of Groundwater Extraction or Diversion is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) if Annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 657-2170

TABLE 1: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) times applied water depth (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

CROP	COLUMN 1	COLUMN 2	COLUMN 3
	ACRES	AVERAGE APPLIED WATER DEPTH (acre-feet per acre)	AMOUNT PUMPED (acre-feet) (column 1 X column 2)
CONVERSION FACTORS One acre-foot (a. f.) = 43,560 cubic feet = 325,900 gallons One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, 1 foot deep			TOTAL IRRIGATION USE

TABLE II: AVERAGE DEPTH OF WATER APPLIED TO IRRIGATE EACH CROP (acre-feet per acre)*

Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 657-2170.

TABLE I: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) times applied water depth (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

CROP	COLUMN 1	COLUMN 2	COLUMN 3
	ACRES	AVERAGE APPLIED WATER DEPTH (acre-feet per acre)	AMOUNT PUMPED (acre-feet) (column 1 X column 2)
CONVERSION FACTORS One acre-foot (a. f.) = 43,560 cubic feet = 325,900 gallons One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, 1 foot deep.			TOTAL IRRIGATION USE

TABLE II: AVERAGE DEPTH OF WATER APPLIED TO IRRIGATE EACH CROP (acre-feet per acre)*

GENERAL INFORMATION

dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Recordation Notice is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Recordation Notice is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

The following conversion factors are provided for your information:

One acre-foot (a.f.) = 43,560 cubic feet = 325,851 gallons

One miner's inch is approximately 9 gallons per minute.

An acre-foot covers one acre of land, 1 foot deep.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 657-2170

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Recordation Notice is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

The following conversion factors are provided for your information:

One acre-foot (a.f.) = 43,560 cubic feet = 325,851 gallons
One miner's inch is approximately 9 gallons per minute.
An acre-foot covers one acre of land, 1 foot deep.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 657-2170

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Recordation Notice is required to establish a record of water use which can assist the court in determining your rights.

The State Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extraction of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered non-use of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice. (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 924-2445.

TABLE I: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for the crop using Table II. Multiply acres (column 1) times irrigation requirement (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

	COLUMN 1	COLUMN 2	COLUMN 3
CROP	ACRES	AVERAGE IRRIGATION REQUIREMENT PER ACRE	AMOUNT PUMPED IN ACRE-FEET
One acre-foot (a.f.) = 43,560 cubic feet = 325,900 gallons. One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, 1 foot deep.			TOTAL IRRIGATION USE

STATE WATER RESOURCES
CONTROL BOARD
DIV. OF WATER RIGHTS
SACRAMENTO
1990 FEB 28 PM 1:13

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Recordation Notice is required to establish a record of water use which can assist the court in determining your rights.

The State Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extraction of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered non-use of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice. (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 924-2445.

Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice. (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 924-2445.

TABLE I: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) times irrigation requirement (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Recordation Notice is required to establish a record of water use which can assist the court in determining your rights.

The State Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extraction of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered non-use of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice. (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 924-2445.

STATE WATER RESOURCES
CONTROL BOARD
DIV. OF WATER RIGHTS
SACRAMENTO
1988 MAR -3 AM 11:11

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Recordation Notice is required to establish a record of water use which can assist the court in determining your rights.

The State Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extraction of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered non-use of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice. (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 924-2445.

TABLE I: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) times irrigation requirement (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

SACRAMENTO

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Recordation Notice is required to establish a record of water use which can assist the court in determining your rights.

The State Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extraction of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered non-use of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice. (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 924-2445.

TABLE I: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) times irrigation requirement (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

	COLUMN 1	COLUMN 2	COLUMN 3
CROP	ACRES	AVERAGE IRRIGATION REQUIREMENT PER ACRE	AMOUNT PUMPED IN ACRE-FEET
One acre-foot (a.f.) = 43,560 cubic feet = 325,900 gallons. One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, 1 foot deep.			TOTAL IRRIGATION USE

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Recordation Notice is required to establish a record of water use which can assist the court in determining your rights.

The State Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extraction of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice. (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 924-2445.

TABLE I: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) times irrigation requirement (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

	COLUMN 1	COLUMN 2	COLUMN 3
CROP	ACRES	AVERAGE IRRIGATION REQUIREMENT PER ACRE	AMOUNT PUMPED IN ACRE-FEET
One acre-foot (a.f.) = 43,560 cubic feet = 325,900 gallons. One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, 1 foot deep.			TOTAL IRRIGATION USE

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Recordation Notice is required to establish a record of water use which can assist the court in determining your rights.

The State Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extraction of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on-record, and you are exempt from the requirement of filing a notice. (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 924-2445.

TABLE I: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) times irrigation requirement (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

	COLUMN 1	COLUMN 2	COLUMN 3
CROP	ACRES	AVERAGE IRRIGATION REQUIREMENT PER ACRE	AMOUNT PUMPED IN ACRE-FEET

One acre-foot (a.f.) = 43,560 cubic feet = 325,900 gallons.
One miner's inch is approximately 9 gallons per minute.
An acre-foot covers one acre of land, 1 foot deep.

GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Recordation Notice is required to establish a record of water use which can assist the court in determining your rights.

The State Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extraction of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice. (2) If annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices which are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write us or telephone (916) 924-2445.

TABLE I: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) times irrigation requirement (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

	COLUMN 1	COLUMN 2	COLUMN 3
CROP	ACRES	AVERAGE IRRIGATION REQUIREMENT PER ACRE	AMOUNT PUMPED IN ACRE-FEET
One acre-foot (a.f.) = 43,560 cubic feet = 325,900 gallons. One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, 1 foot deep.			TOTAL IRRIGATION USE

TABLE II: AVERAGE IRRIGATION REQUIREMENT OF CROPS* (In acre-feet per acre)

INSTRUCTIONS

THIS FORM IS PROVIDED FOR FILING OF ANNUAL NOTICE OF EXTRACTIONS OR DIVERSIONS PURSUANT TO SECTION 5002 OF PART 5, DIVISION 2 OF THE CODE FOR THE CALENDAR YEAR SHOWN.

A SATISFACTORY ANNUAL NOTICE MUST CONTAIN: NAME OF PERSON EXTRACTING OR DIVERTING THE WATER (ITEM 1 OR ADDRESSEE); ANNUAL EXTRACTIONS OR DIVERSIONS FOR CALENDAR YEAR (ITEM 2); CHANGES SINCE LAST REPORT (ITEM 3); SIGNATURE OF PERSON FILING NOTICE, WITH DATE AND PLACE WHERE SIGNED; AND FILING FEE.

Identification of the source is provided by the Recordation Number shown opposite the name of addressee on reverse side. This number together with the owner's designation of the source was forwarded to the person originally filing the First Notice. If this cross reference to your recordation number or name has been lost or is unknown to you, another will be furnished upon request to this office.

ITEM NO.

1. Must be completed only if different than name of person reporting on source shown at the top of first page.
2. This must be completed. Indicate units used if other than acre-feet.
- 2a. Information must be supplied under this item to confirm the amount extracted or diversion shown in item 2.
3. Complete only if changes have occurred in ownership or interest, method of estimating extraction or diversion or place of use since last report.

SUPPLEMENTAL INFORMATION

4. Information may be supplied under this item by those desiring to record facts about this source.

Note: Where space provided is insufficient, supplemental sheets may be attached. These should be identified by Recordation Number and Item Number.

TO ALL WATER USERS FILING ANNUAL RECORDATION NOTICES:

All Annual Recordation Notices MUST BE POSTMARKED ON OR BEFORE JUNE 30th TO BE RECORDED. Notices postmarked LATER THAN JUNE 30th WILL BE RETURNED UNRECORDED. This is in accordance with Section 5004 of the Water Code.

It is the water users responsibility to notify us if you do not receive an annual notice for each of your previously recorded wells no later than April 1st. This will allow us to send additional notices in time for them to be completed and postmarked by the June 30th due date.

In an effort to reduce costs, recordations on which annual notices have not been filed for five consecutive years will be considered inactive. Notices will no longer be sent for those recordation numbers. Be sure to file this notice if you have not been filing and do not wish this recordation to become inactive. If you wish to reactivate an inactive recordation, you must notify us in writing. No fee will be required to reactivate a recordation.

All inquiries should be directed to:

The following are included herein:

- Southern California Edison hydraulic pump test reports dated March 30, 2012 and August 27, 2001
- SCE hydraulic pump test summaries for test performed in 1990, 1991, 1992, 1993, 1995, 1996, and 2001 for Wells 4N/10W-11A1 and 4N/10W-11A2
- SCE electrical billing histories for Wells 4N/10W-11A1, 4N/10W-11A2, and 4N/10W-2Q1

All groundwater recordation notices available for printing from the State Water Resources Control Board, Division of Water Rights. All data prior to 1979 is only available on microfiche. Board staff did not have sufficient personnel to provide data. First notices could not be located in available records.

Note that some recordation years include handwritten calculations used by Saint Andrew's Abbey to prepare the notices.

These calculations utilized the energy consumption and kilowatt-hour/ac-ft factor that is determined from SCE's hydraulic pumps tests. Krieger & Stewart reviewed these calculations and factors, but found some kilowatt-hour/ac-ft factors to be questionable in comparison with what was provided in the SCE pump test reports. Refer to Interrogatory No. 6 and the SCE hydraulic pump test summaries included herein for the kilowatt-hour/ac-ft factors Krieger & Stewart determined to be appropriate for each annually reported groundwater extraction.

Confidential/Proprietary Information

March 30, 2012

FR. FRANCIS BENEDICT
ST. ANDREW'S ABBEY
P.O. BOX 40
VALYERMO, CA 93563

PUMPING COST ANALYSIS,	UPPER WELL
Location: 31001 VALYERMO RD	HP: 10
Cust #: 0-010-0924	Serv. Acct. #: 003-4219-94
Meter: 232-7064	Pump Ref. #: 2569

The following energy efficiency analysis is presented as an aid to your cost accounting. This is an estimate based on the conditions present during the Edison pump test performed on March 29, 2012, billing history for the past 12 months, and your current rate of PA-1.

Assuming that water requirements will be the same as for the past year, and all operating conditions (annual hours of operation, head above, and water pumping level) will remain the same as they were at the time of the pump test, it is estimated that:

1. Overall plant efficiency can be improved from 56.7% to 62.0%.
2. This can save you up to 1,687 kWh and \$309.31 annually.
3. These kWh savings translate to a 0.7-ton decrease in CO₂ emissions.

	Plant Efficiency		
	<u>Existing</u>	<u>Improved</u>	<u>Savings</u>
Total kWh	19,620	17,933	1,687
kW Input	6.0	5.5	.5
kWh per Acre Foot	134	122	11
Acre Feet per Year	146.9		
Average Cost per kWh	\$0.18		
Average Cost per Acre Foot	\$24.49	\$22.38	\$2.11
Overall Plant Efficiency (%)	56.7	62.0	
Total Annual Cost	\$3,597.33	\$3,288.02	\$309.31

It is sincerely hoped that this information will prove helpful to you, and that your concerns over maintaining optimum pumping efficiency will be continued. If you have any questions regarding this report, please contact RICK KOCH at (805)654-7312.

RUSS JOHNSON
Manager

Save Energy,

Save Money. . .

Your test results show that you can!

March 30, 2012

FR. FRANCIS BENEDICT
ST. ANDREW'S ABBEY
P.O. BOX 40
VALYERMO, CA 93563

PUMPING COST ANALYSIS, Plant: UPPER WELL
Location: 31001 VALYERMO RD HP: 10
Cust #: 0-010-0924 Serv. Acct. #: 003-4219-94
Meter: 232-7064 Pump Ref. #: 2569

Dear SCE Customer:

Helping California businesses save energy and money is a major goal at SCE. As you know, our Technical Specialist performed a free energy efficiency test on one or more pumps at your facility on March 29, 2012. We thank you for the opportunity to provide this service, and appreciate your interest in the performance of your pumps.

The results of the testing, shown in the table below, indicate that the pump listed above has the potential for improved Overall Plant Efficiency (OPE), lower energy costs, and a cash incentive.

	Projected Incentive, Energy, and Cost Savings			
	<u>Existing</u>	<u>Improved</u>	<u>Savings</u>	<u>Cash Incentive</u>
Total kWh	19,620	17,933	1,687	\$151.83
kW Input	6.0	5.5	.5	
kW on-peak activity factor *			0.3	\$33.53
Acre Feet per Year	146.9			
kWh per Acre Foot	134	122	11	
Average Cost per Acre Foot	\$24.49	\$22.38	\$2.11	
Overall Plant Efficiency (%)	56.7	62.0		
Annual Total	\$3,597.33	\$3,288.02	\$309.31	\$185.36

(*The kW on-peak activity factor represents how the kW impacts the SCE system during on-peak periods as determined by SCE's agricultural and water pumping customers' average load profiles. By improving efficiency, your expected kW savings is .5 kW, and the savings used for incentive calculations is 65% of .5, or 0.3 kW.)

Case studies have shown that repairing, retrofitting, or replacing inefficient pumps can save energy and money, and may even help you avoid serious operational problems. For your business, this could mean the following:

- **Improved Plant Efficiency:** Your OPE can be improved from 56.7% to 62.0%.
- **Lower Energy Costs:** Based on the test data, your past energy usage, and your current rate of PA-1, we estimate that you may save up to 1,687 kWh annually (which translates to a 0.7-ton decrease in CO₂ emissions). This may result in energy cost savings of \$309.31.
- **Cash Incentive:** Through the retrofit and installation of more energy-efficient equipment, you have the potential to receive an incentive of \$0.09 per kWh and \$100 per on-peak activity factored kW reduced, courtesy of SCE's Customized Efficiency Program. Based on your estimated kWh and kW, you would be eligible for a Potential Cash Incentive of \$185.36, capped at 50% of your project cost. (See contract for details.)

If you are interested in an incentive for this pump, please contact **Beatriz Arriaga** at to complete a project application. All applicants must receive a **written approval authorization before** implementing any project; failure to comply will result in forfeiture of incentive funding.

We encourage you to review your results and take advantage of SCE's energy efficiency expertise and incentives. Visit www.sce.com/rebatesandsavings, or give us a call and let us know how we can be of further service to you.

Sincerely,

Southern California Edison

Program funded by California utility ratepayers, and administered by Southern California Edison under the auspices of the California Public Utilities Commission.

PUMPING COST ANALYSIS,	LOWER WELL
Location: 14600 PALLETT CRK RD	HP: 7.5
Cust #: 0-010-0924	Serv. Acct. #: 000-7400-68
Meter: 3412-8996	Pump Ref. #: 2570

The following energy efficiency analysis is presented as an aid to your cost accounting. This is an estimate based on the conditions present during the Edison pump test performed on March 29, 2012, billing history for the past 12 months, and your current rate of GS-1.

Assuming that water requirements will be the same as for the past year, and all operating conditions (annual hours of operation, head above, and water pumping level) will remain the same as they were at the time of the pump test, it is estimated that:

1. Overall plant efficiency can be improved from 55.1% to 58.0%.
2. This can save you up to 101 kWh and \$32.13 annually.

	<u>Existing</u>	<u>Plant Efficiency Improved</u>	<u>Savings</u>
Total kWh	1,992	1,891	101
kW Input	5.9	5.6	.3
kWh per Acre Foot	263	249	13
Acre Feet per Year	7.6		
Average Cost per kWh	\$0.32		
Average Cost per Acre Foot	\$83.57	\$79.33	\$4.24
Overall Plant Efficiency (%)	55.1	58.0	
Total Annual Cost	\$633.83	\$601.70	\$32.13

It is sincerely hoped that this information will prove helpful to you, and that your concerns over maintaining optimum pumping efficiency will be continued. If you have any questions regarding this report, please contact RICK KOCH at (805)654-7312.

In accordance with your request, an energy efficiency test was performed on your submersible well pump on March 29, 2012. If you have any questions regarding the results which follow, please contact RICK KOCH at (805)654-7312.

Equipment

Pump:	N/A	No:	NO PLATE
Motor:	N/A	No:	NO PLATE

Results

Discharge Pressure, PSI	5.5
Standing Water Level, Feet	45.9
Drawdown, Feet	1.8
Discharge Head, Feet	12.7
Pumping Water Level, Feet	47.7
Total Head, Feet	60.4
Capacity, GPM	136
GPM per Foot Drawdown	75.6
Acre Feet Pumped in 24 Hours	.601
kW Input to Motor	4.6
HP Input to Motor	6.2
Motor Load (%)	65.8
Customer Meter, GPM	142
kWh per Acre Foot	184
Overall Plant Efficiency (%)	33.6

At the time of the test, it was noted that the well would not stay running for an extended period of time and the starter would trip. The motor protection was adjusted to 10 amps and seemed to correct the problem. Throttle points were not performed because the reservoir was full.

Meter: 3416-36343 Pump Ref. #: 25281

Dear SCE Customer:

Helping California businesses save energy and money is a major goal at SCE. As you know, our Technical Specialist performed a free energy efficiency test on one or more pumps at your facility on March 29, 2012. We thank you for the opportunity to provide this service, and appreciate your interest in the performance of your pumps.

The results of the testing, shown in the table below, indicate that the pump listed above has the potential for improved Overall Plant Efficiency (OPE), lower energy costs, and a cash incentive.

	Projected Incentive, Energy, and Cost Savings			
	<u>Existing</u>	<u>Improved</u>	<u>Savings</u>	<u>Cash Incentive</u>
Total kWh	15,348	9,384	5,964	\$536.77
kW Input	4.6	2.8	1.8	
kW on-peak activity factor *			1.2	\$116.19
Acre Feet per Year	83.6			
kWh per Acre Foot	184	112	71	
Average Cost per Acre Foot	\$31.75	\$19.41	\$12.34	
Overall Plant Efficiency (%)	33.6	55.0		
Annual Total	\$2,653.06	\$1,622.10	\$1,030.96	\$652.96

(*The kW on-peak activity factor represents how the kW impacts the SCE system during on-peak periods as determined by SCE's agricultural and water pumping customers' average load profiles. By improving efficiency, your expected kW savings is 1.8 kW, and the savings used for incentive calculations is 65% of 1.8, or 1.2 kW.)

Case studies have shown that repairing, retrofitting, or replacing inefficient pumps can save energy and money, and may even help you avoid serious operational problems. For your business, this could mean the following:

- **Improved Plant Efficiency:** Your OPE can be improved from 33.6% to 55.0%.
- **Lower Energy Costs:** Based on the test data, your past energy usage, and your current rate of GS-1, we estimate that you may save up to 5,964 kWh annually (which translates to a 2.6-ton decrease in CO₂ emissions). This may result in energy cost savings of \$1,030.96.
- **Cash Incentive:** Through the retrofit and installation of more energy-efficient equipment, you have the potential to receive an incentive of \$0.09 per kWh and \$100 per on-peak activity factored kW reduced, courtesy of SCE's Customized Efficiency Program. Based on your estimated kWh and kW, you would be eligible for a Potential Cash Incentive of \$652.96, capped at 50% of your project cost. (See contract for details.)

If you are interested in an incentive for this pump, please contact **Beatriz Arriaga** at to complete a project application. All applicants must receive a **written approval authorization before** implementing any project; failure to comply will result in forfeiture of incentive funding.

We encourage you to review your results and take advantage of SCE's energy efficiency expertise and incentives. Visit www.sce.com/rebatesandsavings, or give us a call and let us know how we can be of further service to you.

Sincerely,

Southern California Edison

Program funded by California utility ratepayers, and administered by Southern California Edison under the auspices of the California Public Utilities Commission.

SUBJECT: HYDRAULIC TEST RESULTS - UPPER WELL
31001 VALYERMO RD
CUST #: 0-010-0924 SERV ACCT #: 003-4219-94
DATE OF TEST: August 20, 2001

In accordance with your request, a test was made on your turbine well pump on the date listed above. If you have any questions regarding the results which follow, please contact GARY PARDUE at (661)726-5662.

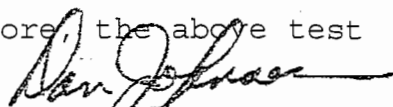

EQUIPMENT

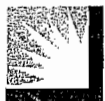

PUMP: ID NO: NO PLATE
MOTOR: US NO: 1057226003F 10 HP
METER: S232-6165
HYDRAULIC TEST REFERENCE NUMBER: 2569

TEST RESULTS

Discharge Pressure, PSI	13.1 ✓
Standing Water Level, Ft.	30.7 ✓
Drawdown, Ft.	13.5 ✓
Discharge Head, Ft.	30.3 ✓
Pumping Water Level, Ft.	44.2 ✓
Total Head, Ft.	74.5 ✓
Capacity, GPM	259.0 ✓
GPM per Ft. Drawdown	19.2 ^{DR=13.5}
Acre Ft. Pumped in 24 Hrs.	1.145 ✓
kW Input to Motor	6.0 ✓
HP Input to Motor	8.0 ✓
Motor Load (%)	72.6 ✓
Measured Speed of Pump, RPM	1769 ✓
kWh per Acre Ft.	126 ✓
Overall Plant Efficiency (%)	60.6 ✓
Customer Meter, GPM	259.0 ✓

We were unable to measure the GPM flow; therefore, the above test results were obtained using your water meter.

SUBJECT: PUMPING COST ANALYSIS
HP: 10 - PLANT: UPPER WELL
CUST #: 0-010-0924 SERV ACCT #: 003-4219-94
HYDRAULIC TEST REFERENCE NUMBER: 2569

The following Pumping Cost Analysis is presented as an aid to your cost accounting. This analysis is an estimate prepared from operating criteria supplied from the Edison Pump Test performed August 20, 2001 and billing history for the past 12 months.

EXISTING PLANT EFFICIENCY

PA-1

Current Rate

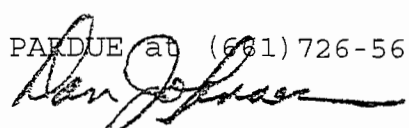

Total kWh	37320
kW Input	6.0
kWh per Acre Ft.	126
Acre Ft. per Year	296.6
Avg. Cost per kWh	\$0.11
Avg. Cost per Acre Ft.	\$14.42
Overall Plant Eff. (%)	60.6

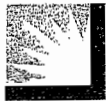

TOTAL ANNUAL COST	\$4,278.74

The hydraulic test results indicate that this pump is operating in an efficient manner.

It is sincerely hoped that this information will prove helpful to you, and that your concerns over maintaining optimum pump efficiency will be continued.

If you have any questions, please contact GARY PARDEE at (661) 726-5662.

Each well on APN 3060-016-002 has an independent electrical meter. The combined production is also measured by a water meter which was installed in 2002 downstream of the discharge point for Well 4N/10W-11A2. Since the water meter reading has not been consistently documented and since the water meter cannot provide each well's individual production, Krieger & Stewart determined that the electrical meter data, coupled with the results of the SCE hydraulic pump tests was the more accurate method for calculating the groundwater production.

For Well 4N/10W-2Q1 on APN 3060-008-017, the water meter readings had not been recorded prior to 2012, and the electrical meter serves the well and the caretaker's residence. Since production from this well could not be determined, Krieger & Stewart has assumed that the annual groundwater production to be 1 ac-ft per year for irrigation and domestic use.

]

Included herein are the available water meter data for the combined flow of wells 4N/10W-11A1 and 4N/10W-11A2 and for the flow from well 4N/10W-2Q2.

Note that the water meter data were not utilized in Krieger & Stewart's estimation of annual groundwater production for the Saint Andrew's Abbey.

All water meter data was documented by Saint Andrew's Abbey, except where specifically noted otherwise.

Recorded by K.J.L. (Krieger & Stewart)

The horsepower for each well is as follows:

4N/10W-11A1 - 10Hp

4N/10W-11A2 - 7.5Hp

4N/10W-2Q1 - 7.5Hp

Horsepower data was obtained from the SCE hydraulic pump test reports, dated March 30, 2012, included in Interrogatory No. 9.

The well casing sizes for each well are as follows:

4N/10W-11A1 - 12 in

4N/10W-11A2 - 12 in

4N/10W-2Q1 - Unknown

Well casing data was obtained from the California Department of Water Resources Bulletin No. 91-12, dated December 1966.

Excerpts from said bulletin are included herein.

WELL-NUMBERING SYSTEM

The well-numbering system used in the eastern part of the Antelope Valley area has been used by the Geological Survey in California since 1940. The system has been adopted by the California Department of Water Resources and by the California Water Quality Control Board for use throughout the state.

Wells are assigned numbers according to their location in the rectangular system for the subdivision of public land. For example, in the number 7N/12W-34E1, the part of the number preceding the slash indicates the township (T. 7 N.), the part between the slash and the hyphen is the range (R. 12 W.), the number between the hyphen and the letter indicates the section (sec. 34), and the letter indicates the 40-acre subdivision of the section, as shown in the accompanying diagram.

D	C	B	A
E	F	G	H
M	L	K	J
N	P	Q	R

Within the 40-acre tract the wells are numbered serially as indicated by the final digit. Thus, well 7N/12W-34E1 is the first well to be listed in the SW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 34, San Bernardino base line and meridian.

FIGURE 1

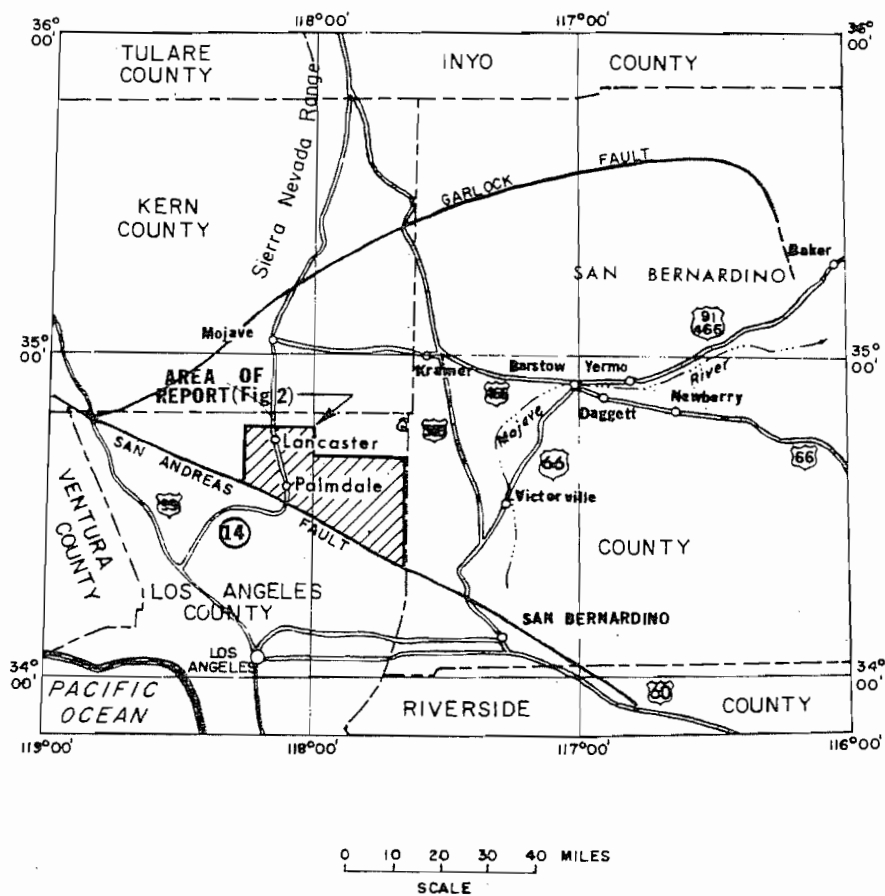

FIGURE 1.-Part of southern California, showing area described in this report

Table 1.--Descriptions of wells in the eastern part of the Antelope Valley area, California

State well number: The number given is the number assigned to the well according to the method described in the section on the well-numbering system.

Other numbers and source of data: The source of data on each line is indicated by the following

symbols: B Smith (1959); D driller; DWR California Department of Water Resources;

FC Los Angeles County Flood Control District; GS U.S. Geological Survey; J Johnson (1911);

M Munger Oilgram; O owner; P pump service contractor; SCE Southern California Edison Co.;

T Thompson (1929); WRB California Water Rights Board. A number following the letter symbol is the well number used by that person or agency. For well numbers assigned by the California

Department of Water Resources prior to adoption of the uniform state well-numbering system, the township and range numbers and letters are omitted and the section and letter are given.

Date of observation: The date given is the date on which the well was visited.

Owner or user: The name given is that of the owner or user of the well on the date indicated. If data are given for more than one date, previous owners may be listed.

Year completed: The completion date was obtained from the driller's log or reported by the owner or others.

Depth: Depths of wells given in whole feet were reported by owners, drillers or others; where a logged well (table 4) was not cased for the full drilled depth, the reported depth is the depth of the bottom of the casing; depths given in feet and tenths of a foot were measured below land-surface datum by the Geological Survey or others as indicated.

Type and diameter: The type of well construction is indicated by the following symbols: A auger; C cable tool; D dug by hand; R rotary. The number following the letter is the diameter of the casing or pit, in inches. For an unsymmetrically dug well, only the maximum dimension is given. The symbol N indicates no casing visible at surface.

Type of pump and power: The pump type or method of lift is indicated as follows: A air lift; C centrifugal; J jet; L lift; N none; S submersible; Si siphon; T turbine. The type of power is indicated as follows: D diesel; E electric motor of undetermined horsepower (a number in this column indicates the rated horsepower of an electric motor); G gasoline engine; Gr gravity; H hand operated; N none; S steam engine; W windmill.

Yield: The yield or output of the pump, in gallons per minute, as reported by the Southern California Edison Co., owners, or drillers. It is not necessarily the maximum capacity of the well or installed pump.

Use: The use of the well is indicated by the following symbols: Dm domestic; Ds destroyed or dry; In industrial; Ir irrigation; O observation; Ps public supply; RR railroad; S stock; T test hole; Un unused.

Measuring point: The point from which water-level measurements are made is described as follows:

Bhc bottom of hole in casing; Bpb bottom of pump base; Hpb hole in pump base; Ls land surface; Na no access either to or into the well; Tap top of access pipe; Tc top of casing; Tcc top of casing cover; Tf top of flange; Tpb top of pump base. The distance of the measuring point above or below (-) land-surface datum is given in feet, tenths of a foot, and sometimes hundredths of a foot. All measurements listed in table 1 are from the same measuring point unless otherwise indicated in the column for measuring points.

Altitude: The figure given indicates the altitude, in feet above mean sea level, of the land-surface datum. Land-surface datum is an arbitrary plane that closely approximates land surface at the time of the first measurement and is the fixed plane of reference for all subsequent measurements. Altitudes, given in whole feet, were interpolated from Geological Survey topographic maps having 5-, 25-, and 40-foot contour intervals. Altitudes, given to the nearest tenth or hundredth of a foot, were taken from Los Angeles County Flood Control District data.

Water level: Measured depths to water are given in feet, tenths of a foot, and hundredths of a foot, or feet and tenths of a foot; reported or approximate depths to water are given in whole feet. The distance between land-surface datum and the measuring point has been subtracted from or added to the measured water level. Thus, all water levels are referenced to land-surface datum. Water levels with a plus (+) symbol are those above land-surface datum.

Other data: C chemical analyses of water are given in table 5; E electric log of well in files of the Geological Survey; L driller's log of well is given in table 4; P pumping test data are given in table 3; W additional water-level measurements are given in table 2.

Table 3.--Pumping tests of wells

Source of data: D driller; DGT Thompson (1929); DWR California Department of Water Resources; FC Los Angeles County Flood Control District; O owner; P pump service contractor; SCE Southern California Edison Co.; and WRB California Water Rights Board.

Depth of well: The depth shown is the depth of the well, in feet, as shown in table 1, and is not necessarily the depth on the date of the pumping test.

Pumping rate: The pumping rate, reported in gallons per minute (gpm), does not necessarily indicate the maximum capacity of the well, but is the rate at which the well was pumped at the time of the test.

Static water level: The static, or standing, water level is the reported depth to water at the time of the test. In some cases, the static water level may be higher than that listed because the standing water-level measurement was made minutes after completion of the test and reflects the water level during recovery, not the static level. Because the reported static water level is not always precise, the drawdown and specific-capacity values may not be exact.

Drawdown: The drawdown is the difference, in feet, between the static water level and the pumping water level.

Specific capacity: The specific capacity is a measure of the physical condition of the well and the aquifer or aquifers which it penetrates. A well with a large specific capacity is capable of a greater yield than a well with a small specific capacity. Specific capacity is obtained by dividing the pumping rate, in gallons per minute, by the drawdown, in feet, after an extended period of pumping.

Table 6.--Cross index of state numbers and other numbers

Table 6 lists the official state well numbers assigned to wells by the Geological Survey, cross indexed with the old numbers assigned to the well as follows: DWR California Department of Water Resources; FC Los Angeles County Flood Control District; J Johnson (1911); O owner; T Thompson (1929); and WRB California Water Rights Board. For well numbers assigned by the California Department of Water Resources prior to adoption of the uniform state well-numbering system, the township and range numbers and letters are omitted.

A lowercase letter preceding the well number indicates a footnote.

Refer to the SCE hydraulic pump test summaries and SCE hydraulic pump test results included for the pump efficiencies of Wells 4N/10W-11A1 and 4N/10W-11A2.

Efficiency information for Well 4N/10W-2Q1 is only available from the SCE hydraulic pump test report dated March 30, 2012.

Included herein is available water level data provided by the Los Angeles Department of Public Works - Water Resources Division, USGS, and the California Department of Water Resources.

Groundwater Level Data for Well 04N10W03A002S

Your selection returned a total of 23 records. Wells in the Department of Water Resources monitoring network are identified by a State Well Number, which is based on the Public Land Grid System. The table headings and records contain several codes and abbreviations. Press the New Search or Nearby Search buttons at the bottom of this page to begin a new data request. Data for this well can also be downloaded in [CSV Format](#) or [Web Formatted Format](#).

Groundwater Levels in Well 04N10W03A002S

Antelope Valley Groundwater Basin

NOTE: All values are approximate measurements. Please refer to the data table below for specific values.

Note that the electrical use for Well 4N-10W-2Q1 includes the electrical use for the caretaker's residence.

Saint Andrew's Abbey production wells are all powered by electricity. There are no diesel records

Groundwater production at Saint Andrew's Abbey has mainly been calculated by using the electrical consumption and hydraulic pump test data provided by SCE.

A water meter was installed downstream of Well 4N/10W-11A2 that measures the combined flows of both wells 4N/10W-11A1 and 4N/10W-11A2.

Since the water meter has less consistency in water use documentation and cannot provide the quantity produced from each well, Krieger & Stewart determined that the electrical data was a more accurate method to calculate groundwater production.

Krieger & Stewart has provided groundwater production quantities for Saint Andrew's Abbey's groundwater wells, including one well used to provide domestic water supply to a caretaker's cabin. Since there were no records for the caretaker's cabin well, Krieger & Stewart provided Gresham, Savage, Nolan & Tilden an estimated annual production of 1 AF/year.

ATTN: GEORGE NICKEL
PALLETT CREEK RANCH
P. O. BOX 60679
BAKERSFIELD, CA 93386-0679

July 3, 1996

SUBJECT: HYDRAULIC TEST RESULTS - WELL
ACCT: 64-36-983-2925-06
13050 PALLETT CREEK RD
DATE OF TEST: July 2, 1996

In accordance with your request, a test was made on your turbine well pump on the date listed above. If you have any questions regarding the results which follow, please contact GARY PARDUE at (805)726-5662.

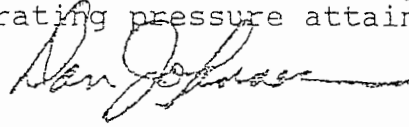

EQUIPMENT

PUMP: FM NO: PK5093
MOTOR: US NO: 898590 50 HP
METER: 732-3429
HYDRAULIC TEST REFERENCE NUMBER: 17965

TEST RESULTS

	TEST 1	TEST 2
Discharge Pressure, PSI	40.7	32.5
Standing Water Level, Ft.	46.6	46.6
Drawdown, Ft.	5.1	5.7
Discharge Head, Ft.	94.0	75.1
Pumping Water Level, Ft.	51.7	52.3
Total Head, Ft.	145.7	127.4
Capacity, GPM	410.0	456.0
GPM per Ft. Drawdown	80.4	80.0
Acre Ft. Pumped in 24 Hrs.	1.812	2.016
kW Input to Motor	28.4	28.0
HP Input to Motor	38.1	37.5
Motor Load (%)	68.6	67.6
Measured Speed of Pump, RPM	1789	
kWh per Acre Ft.	376	333
Overall Plant Efficiency (%)	39.6	39.1

The above test results indicate various operating conditions of this pump. Test #1 was taken near the mid-point of this pump's operating range of 32 to 49 PSI. Test #2 was taken near the beginning of the pressure range, and was the lowest operating pressure attainable during this test.

DAN JOHNSON
Hydraulic/Industrial Test Supervisor

July 3, 1996

ATTN: GEORGE NICKEL
 PALLETT CREEK RANCH
 P. O. BOX 60679
 BAKERSFIELD, CA 93386-0679

SUBJECT: PUMPING COST ANALYSIS
 HP: 50 - PLANT: WELL
 ACCT: 64-36-983-2925-06
 HYDRAULIC TEST REFERENCE NUMBER: 17965

The following Pumping Cost Analysis is presented as an aid to your cost accounting. This analysis is an estimate prepared from operating criteria supplied from the Edison Pump Test performed July 2, 1996 and billing history for the past 12 months. *⑤ USAGE BELOW INCLUDES*

MOBILE HOME ON THE SAME METER.

It is recommended and assumed that:

1. Overall plant efficiency can be improved to 68.0%.
2. Water requirements will be the same as for the past year.
3. All operating conditions (annual hours of operation, head above, and water pumping level) will remain the same as they were at the time of the pump test.

	EXISTING PLANT EFFICIENCY PA-1 <i>(at 30R)</i>	IMPROVED PLANT EFFICIENCY PA-1	
	Current Rate	Current Rate	Savings
Total kWh	<i>(*)</i> 28368	16524	11844
kW Input	28.4	16.5	11.9
kWh per Acre Ft.	376	219	157
Acre Ft. per Year	75.4	75.4	
Avg. Cost per Acre Ft.	\$51.32	\$29.89	\$21.43
Overall Plant Eff (%)	39.6	68.0	

GEORGE,

IT LOOKS LIKE YOU HAVE A REALLY STRONG WELL HERE, EVEN THOUGH THE PUMP EFFICIENCY IS NOT TOO GOOD.

I HAVE 2 ITEMS TO CALL TO YOUR ATTENTION:

- 1) THE MOTOR IS A 50 HP AND YOU HAVE BEEN BEING BILLED FOR A 30 HP. IF I ADD 20 HP TO YOUR BILLING HORSEPOWER, THE BILL WOULD GO UP ABOUT \$500 PER YEAR.
- 2) BECAUSE THE MOBILE HOME AND OTHER SINGLE PHASE LOAD IS ON THE SAME ACCOUNT WITH THE PUMP, I'LL NEED TO SWITCH THE RATE FROM PA-1 TO DOMESTIC. (PA-1 RATE DOES NOT PERMIT DOMESTIC USAGE). THE GOOD NEWS IS THAT THE DOMESTIC RATE WILL INCREASE YOUR BILL BY LESS THAN \$400 PER YEAR.

SO GOING TO THE DOMESTIC RATE WILL SAVE YOU ABOUT \$100 PER YEAR OVER THE PA-1 RATE AT 50 HP.

IF YOU PLAN TO USE THE PUMP FOR IRRIGATION/AG, YOU MAY NEED TO REMOVE THE DOMESTIC LOAD FROM THE CURRENT ACCOUNT TO RE-QUALIFY FOR A PUMPING RATE.

ANY QUESTIONS, PLEASE CALL.
GARY PARQUE

Hi Kim,

Here is the paper work I mentioned earlier. As soon as we have it back we can proceed with the work.
Please let me know if you have any other questions.

Warmest Regards,
Anthony Farnworth

PROOF OF SERVICE
STATE OF CALIFORNIA, COUNTY OF RIVERSIDE

Re: *ANTELOPE VALLEY GROUNDWATER CASES*
Los Angeles County Superior Court Judicial Council Coordinated
Proceedings No. 4408; Santa Clara County Superior Court Case No. 1-05-CV-049053

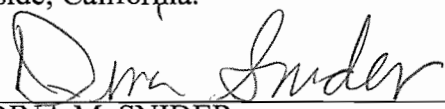

I am employed in the County of Riverside, State of California. I am over the age of 18 years and not a party to the within action; my business address is: 3750 University Avenue, Suite 250, Riverside, CA 92501-3335.

On January 4, 2013, I served the foregoing document(s) described as **CROSS-DEFENDANT, ST. ANDREW'S ABBEY, INC.'S [ROE 623] DESIGNATION OF EXPERT WITNESSES PURSUANT TO DECEMBER 12, 2012 CASE MANAGEMENT ORDER; DECLARATION IN SUPPORT THEREOF** on the interested parties in this action in the following manner:

(X) **BY ELECTRONIC SERVICE** – I posted the document(s) listed above to the Santa Clara County Superior Court website, <http://www.scefiling.org>, in the action of the Antelope Valley Groundwater Cases,

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed on January 4, 2013, at Riverside, California.
