REQUEST 1.(J):

If the responding party contends the parcel has groundwater rights based upon something other than groundwater production or use, please state the amount of that claim for each of the

calendar years 2000, 2001, 2002, 2003, 2004, 2011, and 2012, and its legal and factual basis therefor.

RESPONSE TO REQUEST 1.(J):

Please see Response to Question 1(K)(a) below. Additionally, as explained more completely in the General Response and Objections stated above, WDS has not fully completed its investigation of the facts relating to this case, has not completed discovery in this action, and has not completed preparation for the Phase 4 Trial. These responses have been prepared by WDS in a good faith effort to supply as much factual information and as much specification as possible given the time requirements but WDS reserves the right to change and supplement its answers as additional facts are ascertained and analyses are made.

REQUEST 1.(K)a:

State the amount of water rights claimed as the reasonable and beneficial use for each such parcel.

RESPONSE TO REQUEST 1.(K)a:

WDS asserts to the fullest extent provided by law a prior and paramount overlying water right to any native groundwater existing in the aquifer underlying the real property it owns, occupies or otherwise controls. (*Katz v. Walkinshaw* (1903) 141 Cal. 116, 135-136; *City of Barstow v. Mojave Water Agency* (2000) 23 Cal. 4th 1224, 1240-41). WDS California II claims the maximum amount of groundwater capable of being pumped from the native groundwater supply underlying the real property identified in these Responses for any past, present or future reasonable beneficial use to the fullest extent authorized by the California Constitution, Article X, Section 2 and other applicable law.

For example, but without any limitation whatsoever, such maximum amount (annually) in consideration of all the years referenced in the Court Ordered Discovery (2000-2004, 2011 and 2012) is shown in Table 1 below and amounts to 8,345 acre-feet per year.

Likewise, the maximum amount (annually) for each of the years referenced in the Court Ordered Discovery (2000-2004, 2011 and 2012) was as shown in Table 2 below:

Table 2

	2000	2001	2002	2003	2004	2011	2012

Historic reasonable beneficial use is indicative of potential future reasonable beneficial use of available groundwater underlying the real property identified in these Responses. Any such maximum amounts may be used on any or all overlying parcels identified in these Responses to the fullest extent physically and legally possible.

REQUEST 1.(K)b:

At the responding party's election any other facts that the responding party contends will assist the Count in determining the amount of groundwater produced from each parcel of land

owned or controlled by the responding party in any or all calendar years 2000, 2001, 2002, 2003, 2004, 2011, and 2012.

RESPONSE TO REQUEST 1.(K)b:

Please see Response to Question 3(A), (B) and (C) below. Additionally, as explained more completely in the General Response and Objections stated above, WDS has not fully completed its investigation of the facts relating to this case, has not completed discovery in this action, and has not completed preparation for the Phase 4 Trial. These responses have been prepared by WDS in a good faith effort to supply as much factual information and as much specification as possible given the time requirements but WDS reserves the right to change and supplement its answers as additional facts are ascertained and analyses are made.

REQUEST 2.(A):

Whether the responding party leased any or all of the parcel.
