Solano Irrigation Dist. The Names of All Appropriative Water Rights Holders in Upper Basin (Sup. Ct., County of Sacramento, 1993, No. 2565.)	5,1
--	-----

1 **I. Summary**

2 The Antelope Valley Groundwater Agreement Association ("AGWA") opposes the
3 establishment of a defendants' class as proposed by the public water suppliers in their January 10,
4 2007 Motion for Class Certification, and opposes the establishment of a plaintiffs' class as proposed
5 by Rebecca Willis in her February 22, 2007 Response to the public water suppliers' Motion. Both
6 of these classes as proposed are inappropriately broad and would be impossible for any one class
7 representative to adequately represent. Instead, there must be, at a minimum, two classes of
8 landowners: one for those who possess presently-exercised overlying rights, and one for those who
9 possess dormant overlying rights.

10 Furthermore, the purposes of using the class action structure (whether a defendants' class or
11 a plaintiffs' class), do not justify the inclusion of *all* landowners within the classes. Due process and
12 the interests of justice will be better satisfied if the public water suppliers are required to
13 individually name and serve all landowners above a certain acreage threshold. AGWA recommends
14 that an appropriate threshold is the ownership of 20 acres or more. Any classes that are certified
15 should be composed only of landowners who own land below the 20 acre threshold.

16 Finally, individual notice must be provided by the public water suppliers to all members of
17 any class that is certified.

18 **II. Discussion**

19 **A. Defendants' Class Actions are Authorized in California But Only Pursuant to**
20 **Strict Due Process Protections Which Suggest hat the Class Mechanism Posses**
21 **Significant Procedural Risk**

22 There is precedent in California for the use of a defendants' class. (Code of Civ. Pro. § 382;
23 *Simons v. Horowitz* (1984) 151 Cal.App.3d 834, 844 [199 Cal.Rptr. 134]; *see also Rosicrucian*
24 *Fellow. v. Rosicrucian Etc. Ch.* (1952) 39 Cal.2d 121, 139-40 [245 P.2d 481]; *Wheelock v. First*
25 *Presb. Church* (1897) 119 Cal. 477, 481.)

26 At least one California trial court has certified a defendants' class action in a water rights
27 adjudication. (*See Solano Irrigation Dist. v. The Names of All Appropriative Water Rights Holders*
28

1 in Upper Basin (Sup. Ct., County of Sacramento, 1993, No. 2565).) However, defendants' class
2 actions are rare, in part because of special due process concerns. As explained in the *Simons*
3 opinion:

4 "in theory a class suit is permissible against defendants too numerous to be joined,
5 where there is a common interest and common relief is sought. But a court may
6 refuse to entertain it, or, in a later collateral attack refuse to hold the judgment
7 binding on the absent parties, if it concludes that the persons made defendants did
8 not sufficiently represent the class."

9 . . .

10 "A defendant class should be certified and such an action tried only after the most
11 careful scrutiny is given to preserving the safeguards of adequate representation,
12 notice and standing. (Citation.) Failure to insure any one of these essentials would
13 require reversal of a judgment against a defendant class."

14 (*Simons*, 151 Cal.App.3d at 844-45.)

15 Thus, certification of a defendants' class requires many of the same showings as a plaintiffs'
16 class (e.g., numerous parties, community of interest, typical claims (defenses), etc.), but with a
17 special emphasis on the adequacy of representation. "[D]efendants' class actions involve the
18 serious danger of fraudulent or calculated selection of defendants who might not fully and fairly
19 represent the interests of the class." (*Id.* at 844.) Greater scrutiny is further justified by the fact that
20 a defendants' class stands to lose a right they already have from the action, as opposed to gaining
21 some benefit. (*See Thillens, Inc. v. Community Currency Exchange Association of Illinois* (1983)
22 97 F.R.D. 668 (N.D.Ill) [36 Fed.R.Serv.2d 657].)

23 However, because of the nature of the present case, even the members of a plaintiffs' class
24 face the risk of losing a right through a finding of prescription if the case is not adequately
25 prosecuted by the class representative. Thus, in this case, a plaintiffs' class is deserving of the same
26 careful scrutiny as is a defendants' class.

27 The careful scrutiny that is given to the use of the class action structure suggests that there is
28 a fair degree of procedural risk associated with this approach. Whether the class is a plaintiffs' class

1 or a defendants' class, due process concerns create the risk that the approach will be invalidated at a
2 later time, and thus that the approach should be applied sparingly. For this reason AGWA believes
3 it would be in the best interests of the case if any class that is certified includes only landowners
4 who own land below a certain acreage threshold. While AGWA does not have precise landowner
5 statistics available to it at this time, based on information and belief we believe that a threshold of
6 20 acres or more would be a reasonable threshold above which landowners must be individually
7 named and served. The use of such a threshold would minimize the procedural risk by including in
8 the litigation all of the major landowners in the Antelope Valley through normal direct service,
9 while still providing significant procedural benefits to the public water suppliers by including the
10 many tens of thousands of parcels that exist below the 20 acre threshold through the class action
11 mechanism.

12 **B. Dormant Overlying Rights and Presently-Exercised Overlying Rights Are Two**
13 **Distinct Classes That Cannot be Represented by a Single Class Representative.**

14 **1. Nature of the Claims**

15 The pool of overlying rights in the Antelope Valley consists of dormant and presently-
16 exercised overlying rights spread amongst agricultural interests, developers, industrial water uses
17 such as aggregate operations, and municipal use through mutual water companies. Different legal
18 claims will be applied against each.

19 For example, prescriptive claims have been brought against both dormant and presently-
20 exercised rights, but with different consequences between the two forms should the claim succeed.
21 Subordination of the dormant overlying rights pursuant to Article X, Section 2 of the California
22 Constitution may be the outcome on the one hand, while for presently-exercised overlying rights
23 self help will serve to mitigate the effects of a showing of prescription. (*See In re Long Valley*
24 *Creek Stream System* (1979) 25 Cal.3d 339 [599 P.2d 656]; *Wright v. Goleta Water Dist.* (1985)
25 174 Cal.App.3d 74 [219 Cal.Rptr. 740].)

26 If dormant overlying rights may be exercised in the future because they are not bound to the
27 judgment, they can potentially upset the careful balance of pre-existing rights. In fact, the
28 California Supreme Court has recognized that unexercised riparian rights (analogous to dormant

1 overlying rights) are a principal source of uncertainty, which disrupts proper water management.
2 (See *In re Long Valley Creek Stream System* (1979) 25 Cal.3d 339, 355 [599 P.2d 656].) *Long*
3 *Valley's* solution to this problem was to allow subordination of unexercised riparian rights within an
4 over-appropriated stream system pursuant to Article X, Section 2.

5 In *Wright v. Goleta*, an effort was made to extend *Long Valley's* precedent to groundwater to
6 subordinate unexercised overlying rights. Although the *Wright* court recognized that the same
7 perverse consequences attached to unexercised overlying rights as they do to unexercised riparian
8 rights, it did not subordinate the unexercised overlying rights, in part, because the action did not
9 seek to join all necessary parties within the basin. (*Wright v. Goleta Water Dist.* (1985) 174 Cal.
10 App.3d 74 [219 Cal.Rptr. 740].) Certification of a class of dormant overlying rights will eliminate
11 this concern in an efficient manner by properly joining all interests in a single action. *Long Valley's*
12 approach could then be extended to judicial groundwater basin adjudications.

13 Accordingly, the creation of a class that includes dormant overlying rights makes it very
14 likely that the interests of the presently-exercised overlying rights will come in to conflict with the
15 dormant overlying rights because the presently-exercised right holders will have an opportunity to
16 cure the deficiency in *Wright* and seek to apply the *Long Valley* approach to the Antelope Valley.
17 This distinction thus calls for the use of multiple classes or subclasses within the overlying owners
18 class. (*Richmond v. Dart Industries, Inc.* (1981) 29 Cal.3d 462, 473 [174 Cal.Rptr. 515]
19 (subclasses justified to ensure representation of differing viewpoints within full class); *Vasquez v.*
20 *Superior Court* (1971) 4 Cal.3d 800, 821 (court may divide class into subclasses for expediency);
21 *Osborne v. Subaru of America, Inc.* (1988) 198 Cal.App.3d 646 (court has obligation to consider the
22 use of subclasses and other innovative procedural tools proposed by a party to certify a manageable
23 class).)

24 **2. The Classes of Dormant Overlying Owners and Presently Exercised**
25 **Overlying Owners are Each Ascertainable Classes and Each Have**
26 **Community of Interests but Only Within Their Separate Classes**

27 To sustain any class action there must be: (1) an ascertainable class, and (2) a well-defined
28

1 community of interest in the questions of law or fact. (*Linder v. Thrifty Oil Co.* (2000) 23 Cal.4th
2 429, 435 [97 Cal.Rptr.2d 179]; *Richmond*, 29 Cal.3d at 470; *Daar v. Yellow Cab Co.* (1967) 67
3 Cal.2d 695 [63 Cal.Rptr.724].) In other words, the class must be substantially similarly situated.
4 The element of ascertainable class is satisfied in a plaintiffs' class where all members have a similar
5 cause of action against the defendant. (*In American Suzuki Motor Corp. v. Superior Court* (1995)
6 37 Cal.App.4th 1291 [4 Cal.Rptr.2d 526].) By analogy, a defendants' class is ascertainable where
7 all members of the class can utilize a common defense.

8 The community of interest element is satisfied where there are: 1) predominant common
9 questions of law or fact; (2) class representatives with claims or defenses typical of the class; and
10 (3) class representatives who can adequately represent class. (*Reese v. Wal-Mart Stores* (1999) 73
11 Cal.App.4th 1225, 1234, [87 Cal.Rptr.2d 346]; *Block v. Major League Baseball* (1998) 65
12 Cal.App.4th 538, 542, 76 [Cal.Rptr.2d 567].) Moreover, the common claims or defenses must
13 predominate over individual claims. (*Block*, 65 Cal.App.4th at 544.) Common issues are
14 predominant when they would be the principal issues in any individual action, both in terms of time
15 to be expended in their proof and of their importance. (*Caro v. Procter & Gamble Co.* (1993) 18
16 Cal.App.4th 644, 667-68 [22 Cal.Rptr.2d 419].) However, there is not commonality of interest if
17 each member of the class would be required to litigate numerous and substantial issues affecting his
18 individual right to recover damages after the common questions have been determined. (*Rose v.*
19 *Medtronics, Inc.* (1980) 107 Cal.App.3d 150, 154-55 [Cal.Rptr. 16].)

20 As noted above, a defendants' class was certified in the Putah Creek adjudication. (*See*
21 *Solano Irrigation Dist. The Names of All Appropriative Water Rights Holders in Upper Basin* (Sup.
22 Ct., County of Sacramento, 1993, No. 2565).) There, the plaintiff irrigation district sued all
23 overlying owners and appropriators to determine its own obligations to release water into Putah
24 Creek. The plaintiff argued that the sole issue to be determined was how much water was required
25 to be released to mimic the state of nature, thereby satisfying an earlier court decree requiring such
26 releases. Because this question of fact was common to all defendants, the plaintiffs argued that no
27 individual relief was sought against any particular defendant, and therefore, a defendants' class was
28 an efficacious means to adjudicate the issue.

1 The primary claims in this case are for prescription against all overlying owners, and
2 potentially, subordination of the priority of dormant overlying rights pursuant to Article X, Section
3 2 of the California Constitution. (*See City of Los Angeles v. City of San Fernando* (1975) 14 Cal.3d
4 199 [123 Cal.Rptr. 1]; *City of Pasadena v. City of Alhambra*, (1949) 33 Cal.2d 908 [207 P.2d 17]
5 (prescription); *In re Long Valley Creek Stream System* (1979) 25 Cal.3d. 339 [599 P.2d 656];
6 *Wright v. Goleta Water Dist.* (1985) 174 Cal.App.3d 74 [219 Cal.Rptr. 740] (subordination pursuant
7 to Article X, Section 2.) To be amenable to class status, the defenses available against these claims
8 must be the same for all defendants. More precisely, the legal outcome must be substantially
9 similar among each member of the class, and therefore, can not be dependent on the individual
10 circumstances of fact or law. (*See State of California v. Rank* (1961) 293 F.2d 340, 348 (9th Cir.)
11 and discussion below.) As previously discussed, because of the differences between dormant
12 overlying rights and presently-exercised overlying rights there is no commonality between these
13 two classes of landowners.

14 3. Adequacy of Representation

15 As noted by the *Simons* opinion, adequacy of representation is usually given greater scrutiny
16 in defendants' class actions than plaintiffs' class actions because of the danger that plaintiffs will
17 strategically choose defendants who will not adequately defend the class. (*Simons*, 151 Cal.App.3d
18 at 844.) However, because of the nature of the present litigation, even a plaintiffs' class will run the
19 risk of losing a significant property right if the class is not adequately represented. The Court
20 should give great scrutiny also to the adequacy of representation of a plaintiffs' class.

21 In *Simons*, the trial court's judgment against a defendants' class was overturned because
22 there was: (1) no evidence that any of the members of the class were actually served with class
23 notification, and (2) the only two defense counsel that appeared in court expressly disclaimed any
24 intention to represent the class, did not present any defense, and instead stipulated to a judgment for
25 their own clients that was substantially more favorable to them than the defendants' class. (*Id.* at
26 846-47.)

27 A defendants' class was attempted in two subsequent opinions following *Simons*, but
28 because the cause of action brought against the defendants' class was found to be without merit,

1 these courts did not address the merits of certifying the requested classes. (*Pinnacle Holdings, Inc.*
2 *v. Simon* (1995) 31 Cal.App.4th 1430, 1436-37 [37 Cal.Rptr.2d 778]; *Kaye v. Mount La Jolla*
3 *Homeowners Assn.* (1988) 204 Cal.App.3d 1476, 1494 [252 Cal.Rptr. 67].)

4 Only one California opinion has been found that actually approved of a suit against certain
5 named defendants as representatives for a broader class. (*See Wheelock v. First Presb. Church*
6 (1897) 119 Cal. 477, 481 [51 P. 841].) *Wheelock* allowed an action to be brought by certain
7 representatives of one church against certain representatives of another church. (*Id.*) The interest of
8 the defendants' class members was clearly homogenous, and the court did not analyze the issue of
9 adequate representation.

10 Since there is limited California precedent on this issue, it is appropriate to look elsewhere
11 for guidance. (*See Vasquez v. Superior Court* (1971) 4 Cal.3d 800, 821 (federal class action
12 relevant where California authority is lacking).) Federal precedent pursuant to Rule 23 of the
13 Federal Rules of Civil Procedure has held that an adequate representative must have: (1) a sufficient
14 stake in the outcome to cause the representative to vigorously defend the common interest and raise
15 all available defenses, and (2) have the financial resources and skills to pursue those defenses. (*See*
16 *Thillens, Inc. v. Community Currency Exchange Association of Illinois* (1983) 97 F.R.D. 668
17 (N.D.Ill.) [36 Fed.R.Serv.2d 657].) Where these standards are met, due process requirements are
18 satisfied. (*Sam Fox Publishing Co. v. United States* (1961) 366 U.S. 683, 691 [81 S.Ct. 1309]. *Res*
19 *judicata* may then be applied against any subsequent challenge to any judgment entered against the
20 defendants. (*Id.*; *see also Chance v. Superior Court* (1962) 58 Cal.2d 275, 288 [23 Cal.Rptr. 761]
21 (*res judicata* in a plaintiffs' class).)

22 (1) Sufficient Stake to Vigorously Defend Outcome

23 The plaintiffs' class representative Rebecca Willis appears to be a dormant overlying
24 landowner. The pleadings filed on her behalf have indicated that she owns ten-acres on which she
25 *intends* to build a nursery. (Willis Response 3:7.) Thus, this plaintiff has a sufficient stake in the
26 outcome that she will vigorously defend the rights of dormant overlying landowners. However,
27 because of the very nature of her claim, it is highly unlikely that she will vigorously press the claim
28 that dormant overlying rights should be subordinated pursuant to Article X, Section 2.

28

1 providing significant benefits for the litigation by including well over 150,000 parcels that would
2 not need to be individually brought in to the litigation.

3 **C. Secondary Interests in the Land Should be Considered as Class Members.**

4 Plaintiffs are typically free to chose which parties to name in water rights adjudications, but
5 those not named will not be bound by any judgment entered. (*See Long Valley*, 25 Cal.3d at 347-
6 48; *Wright*, 174 Cal.App.3d at 87-9.) However, where the action seeks to adjudicate and fix all
7 rights amongst all users of the water system, all users should be deemed indispensable parties
8 because their interests, rights, and duties will inevitably be affected by any decree entered. (Code of
9 Civil Procedure § 389; *Bank of California v. Superior Court* (1940) 16 Cal.2d 516, 521 [106 P.2d
10 879].) Entities holding security interest in the subject lands and other secondary interests may be
11 considered necessary parties since they possess interests that will undoubtedly be affected by the
12 resolution of the action. (*Bowles v. Superior Court of City and County of San Francisco* (1955) 44
13 Cal.2d 574 [283 P.2d 704].) Indeed, a lien is a compensable property interest protected by the Fifth
14 Amendment. (*Carson Redevelopment Agency v. Adam* (1982) 136 Cal.App.3d 608, 613 [186
15 Cal.Rptr. 615] (deed of trust); *People Ex Rel. Dept. of Transportation v. Redwood Baseline Ltd.*
16 (1978) 84 Cal.App.3d 662, 670 [149 Cal.Rptr. 11].) (deed of trust); *Armstrong v. United States*,
17 (1960) 364 U.S. 40, 44 [80 S.Ct. 1563] (materialman's lien).)

18 However, it is relevant to note that the procedure provided by Water Code, sections 2500 et
19 seq., for comprehensive adjudication of surface water rights does not require individual notice to
20 such secondary property interests, but nonetheless results in a final determination of all rights to the
21 system. (*See discussion below.*) Presumably, the statute's requirement for publication of the notice
22 of the adjudication is intended to notify any interested party not already notified by the
23 requirements for notice by mail. (*See Water Code* § 2527.) Accordingly, it could be argued that
24 while these secondary property interests should be made parties to the action, notice by publication
25 akin to that required by the statutory adjudication procedure is sufficient. (*See discussion below.*)
26
27
28

1 **D. Notice Must be Provided to all Members of the Defendants’ Class**

2 **1. Individual Notice is Likely to be Required in Our Action**

3 In order to satisfy the due process protections of any class (plaintiffs’ or defendants’),
4 meaningful notice must be provided to all members of the class. (*See City of San Jose v. Superior*
5 *Court* (1974) 12 Cal.3d 447, 454-55 [115 Cal. Rptr. 797].) Notice to the class members should be
6 made as soon as possible after the court determines the class action appropriate. (*Id.*) The
7 acceptable method for providing such notice is unclear under California precedent. Reviewing an
8 action brought pursuant to Rule 23, the United States Supreme Court has held that class members
9 must be provided the best notice practicable under the circumstances including individual notice to
10 all members who can be identified through reasonable efforts. (*Eisen v. Calisle & Jacquelin* (1974)
11 417 U.S. 156, 173 [94 S.Ct. 2140]; *see also Phillips Petroleum Co. v. Shutts* (1985) 472 U.S. 797,
12 812 [105 S.Ct. 2965]; *Mullane v. Central Hanover Tr. Co.* (1950) 339 U.S. 306, 314 [70 S.Ct.
13 652].)

14 This rule is partly at odds with certain state opinions. (*See Cooper v. American Sav. & Loan*
15 *Assn.* (1976) 55 Cal.App.3d 274, 285 [127 Cal.Rptr. 579].) *Cooper* explained that where the class
16 is huge and the damages are minimal, service by publication may be adequate. (*Id.*) On the other
17 hand, it also provided that “where members of a class have a substantial claim, individual notice is
18 required because it is essential for them to decide whether to remain as members of the class and
19 become bound by the rule of res judicata; whether to intervene with their own counsel; or whether
20 to ‘opt out’ and pursue their independent remedies.” (*Id.*) California courts have further held that
21 “the representative plaintiff in a California class action is not required to notify individually every
22 readily ascertainable member of his class without regard to the feasibility of such notice; he need
23 only provide meaningful notice in a form that ‘should have a reasonable chance of reaching a
24 substantial percentage of the class members.’” (*Archibald v. Cinerama Hotels* (1976) 15 Cal.3d
25 853, 861 [126 Cal.Rptr. 811] citing *Cartt v. Superior Court* (1975) 50 Cal.App.3d 960, 974 [124
26 Cal.Rptr. 376].)

27 More recently, the California Supreme Court acknowledged the tension between the federal
28

1 precedent and the more liberal standards set forth in these state opinions:

2 “Thrifty contends that *Eisen*, [citation] and *Phillips Petroleum Co. v. Shutts* [citation]
3 support the Court of Appeal's conclusion that the putative class members here are readily
4 identifiable and therefore must be given notice by first class mail in order to satisfy
5 constitutional due process concerns. Conversely, Linder relies on California authorities to
6 argue that notice by publication may be constitutionally permissible whether or not the
7 names and addresses of class members are readily ascertained.”

8 (*Linder v. Thrifty Oil Co.* (2000) 23 Cal.App.4th 429, 444 [97 Cal.Rptr.2d 179].) Ultimately, the
9 *Linder* Court held that it did not have to resolve the issue because the issue remained factually
10 undeveloped regarding the necessity, feasibility and costs of any particular form of notice. (*Id.*) It
11 therefore declined to speculate whether or not notice by first class mail may be constitutionally
12 required. (*Id.*)

13 Although this issue remains outstanding, it is likely that constitutional due process
14 protections indeed require individual notice where the names are readily ascertainable. The U.S.
15 Supreme Court's reasoning does not appear to be limited to an interpretation of Rule 23, but extends
16 to due process concerns in general. In *Eisen*, the court acknowledged an earlier opinion, which held
17 that “publication notice [can] not satisfy due process where the names and addresses of the
18 beneficiaries are known. In such cases, ‘the reasons disappear for resort to means less likely than
19 the mails to apprise them of [an action's] pendency.’” (*Eisen*, 417 U.S. at 175 citing *Mullane*, 339
20 U.S. 306, at 318.) The *Eisen* Court also dismissed an argument that the costs of individual notice
21 should be taken into consideration in such circumstances: “There is nothing in Rule 23 to suggest
22 that the notice requirements can be tailored to fit the pocketbooks of particular plaintiffs.” (*Id.* at
23 176.)

24
25 **2. Individual Notice is Required Under Statutory Stream Adjudications**
26 **Pursuant to Water Code §§ 2500, Et Seq.**

27 A relevant comparison concerning this issue of notice is the procedure adopted by Water
28 Code, section 2527, as used to notice claimants of surface water rights in a statutory stream

1 adjudication brought by the State Water Resources Control Board (SWRCB) to determine and fix
2 surface water rights pursuant to Water Code, section 2500, et. seq. Section 2527 provides as
3 follows:

4 “The notice shall be published at least once a week for four consecutive weeks, commencing
5 within 20 days of the date of issuance of the notice, in one or more newspapers of general
6 circulation published in each county in which any part of the stream system is situated, and,
7 within the same 20-day period, the notice shall be mailed to all persons known to the board
8 who own land that appears to be riparian to the stream system or who divert water from the
9 stream system.”

10 (Water Code § 2527.) The statute originally only required a system of publication, but was
11 amended in 1976 to require individual mailing to known riparians.

12 The procedure required by section 2527 is relevant to our analysis because our defendants’
13 class action seeks similar results through a similar procedure, albeit by the courts instead of the
14 SWRCB. (*See City of Barstow v. Mojave Water Agency* (2000) 23 Cal.4th 1224 [99 Cal.Rptr.2d
15 294] (f.n. 13); *Long Valley*, 25 Cal.3d at 359; and *Wright*, 174 Cal.App.3d at 88.) Accordingly, the
16 comparison suggests that individual notice to the owners of the subject parcels will be required.
17 However, section 2527 does not require individual notice to secondary interests. Thus, should it be
18 decided to create a separate class of secondary interests, the class proponents might rely on the
19 procedure in section 2527 to argue that notice by publication is adequate for noticing the secondary
20 interests. Still, this approach is susceptible to a counter argument based on the issues of due process
21 and substantial property interest, as discussed above.

22 Ultimately, the court will decide and instruct what method and form of notice will be
23 required. (*See Simons*, 151 Cal.App.3d at 839, 846.) The form of the notice must be approved by
24 the court and be of neutral content, explaining the right of each member to opt out of the class. (*See*
25 *Gainey v. Occidental Land Research* (1986) 186 Cal.App.3d 1051, 1057-58 [231 Cal.Rptr. 249].)
26 The order issued in the Putah Creek adjudication required individual notice to all class member that
27 could be determined by the county tax assessor’s records as well as publication in local newspapers
28

1 of general circulation.

2 **3. The Public Water Suppliers Must Provide An Accounting of Their**
3 **Success in Notification to Class Members**

4 On December 11, 2006, the public water suppliers posted a list of the names and addresses
5 of those landowners who have been named and served in the case so far so that AGWA, as liaison
6 counsel, could communicate with those parties. AGWA attempted to communicate via letter with
7 these parties and 17% of those letters were returned as undeliverable. (*See Declaration of Rachel*
8 *Robledo attached hereto.*) If this is the return rate on parties who have actually already been served,
9 AGWA is concerned that the mass notification to the classes will fail to notify a significant
10 percentage of the landowners.

11 **III. Conclusion**

12 For the reasons stated above, AGWA respectfully requests the Court to:

13 1. Find that the defendants' class proposed by the purveyors and the plaintiffs' class
14 proposed by Rebecca Willis, are both overbroad.

15 a. Find that, at a minimum, there must be two classes of landowners: those who
16 possess presently -exercised overlying rights and those who possess dormant overlying rights.

17 b. Find that the purposes of using the class action structure (whether a
18 defendants' class or a plaintiffs' class), do not justify the inclusion of *all* landowners within the
19 classes. Due process and the interests of justice will be better satisfied if the public water suppliers
20 are required to individually name and serve all landowners who own greater than 20 acres of
21 property.

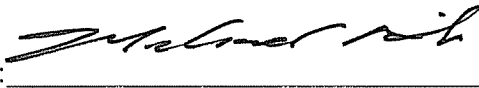

22 2. Find that since the names and addresses of all landowners are readily ascertainable
23 through public records, all class members must be individually notified of the class action, at least
24 through first-class mail by the public water suppliers with the content of the notice approved in
25 advance by the Court. The public water suppliers must supply the Court and the parties with a list of
26 the names and addresses of those who are so notified, and must provide the Court and the parties
27
28

1 with statement of which of these notices are returned as undeliverable.

2 3. Find that any party can opt-out of the class within six months of class certification
3 and adopt specific opt-out procedures.

3 **PROOF OF SERVICE**

4
5 **STATE OF CALIFORNIA,
COUNTY OF SANTA BARBARA**

6 I am employed in the County of Santa Barbara, State of California. I am over the
7 age of 18 and not a party to the within action; my business address is: 21 E. Carrillo Street, Santa
8 Barbara, California 93101.

9 On February 27, 2007, I served the foregoing document described as:

10
11 **ANTELOPE VALLEY GROUNDWATER AGREEMENT ASSOCIATION'S OBJECTION
12 TO MOTIONS FOR CLASS CERTIFICATION AND DECLARATION OF RACHEL
13 ROBLEDO IN SUPPORT OF ANTELOPE VALLEY GROUNDWATER AGREEMENT
ASSOCIATION'S OBJECTION TO MOTIONS FOR CLASS CERTIFICATION**

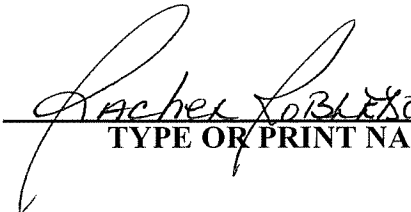

14 on the interested parties in this action.

15 By posting it on the website at 4:00 p.m./a.m. on February 27, 2007.

16 This posting was reported as complete and without error.

17 (STATE) I declare under penalty of perjury under the laws of the State of California
18 that the above is true and correct.

19 Executed in Santa Barbara, California, on February 27, 2007.
