Cross-Complainants California Water Service Company, City of Lancaster, City of Palmdale, Littlerock Creek Irrigation District , Los Angeles County Water Works District No. 40, Palmdale Water District, Rosamond Community Services District, Palm Ranch Irrigation District and Quartz Hill Water District (collectively, the “Public Water Suppliers”) allege:

INTRODUCTION

1. This cross-complaint seeks a judicial determination of rights to all water within the adjudication area of the Antelope Valley Groundwater Basin as determined by the Court’s Orders in this case (the “Basin”). An adjudication is necessary to protect and conserve the limited water supply that is vital to the public health, safety and welfare of all persons and entities that depend upon water from the Public Water Suppliers. For these reasons, the Public Water Suppliers file this cross-complaint to promote the general public welfare in the Antelope Valley; protect the Public Water Suppliers’ rights to pump groundwater and provide water to the public; protect the Antelope Valley from a loss of the public’s water supply; prevent degradation of the quality of the public groundwater supply; stop land subsidence; and avoid higher water costs to the public.

CROSS-COMPLAINANTS

2. California Water Service Company is a California corporation which extracts groundwater from the Basin to serve customers within the Basin.

3. The City of Lancaster is a municipal corporation located in the County of Los Angeles, and which produces and receives water for reasonable and beneficial uses, including overlying uses. The City of Lancaster further provides ministerial services to mutual water companies that produce groundwater from the Basin.

4. The City of Palmdale is a municipal corporation in the County of Los Angeles. The City of Palmdale receives water from the Basin.

6. Los Angeles County Waterworks District No. 40 is a public agency governed by the Los Angeles County Board of Supervisors. District 40 has been lawfully organized to perform numerous functions, including providing Basin groundwater to the public in a large portion of the Antelope Valley. To this end, District 40 has constructed, maintained and operated a public waterworks system to supply water to the public.

7. Palmdale Water District is an irrigation district organized and operating under Division 11 of the California Water Code. Palmdale Water District extracts groundwater from the Basin for delivery to customers.

8. Palm Ranch Irrigation District Palm Ranch Irrigation District is a public agency which extracts groundwater from the Basin to serve customers within the Basin.

9. Rosamond Community Services District provides water to more than 3,500 residents of Kern County for domestic uses, fire protection, and irrigation. Rosamond has drilled and equipped wells to pump groundwater from the Basin. Rosamond has constructed, maintained and operated a public waterworks system to supply water to the public.

10. Quartz Hill Water District is a county water district organized and operating under Division 12 of the California Water Code. Quartz Hill extracts groundwater from the Lancaster Sub-basin of the Antelope Valley Groundwater Basin for delivery to customers.

CROSS-DEFENDANTS

11. The following persons and/or entities are the owners of, and/or are beneficial interest holders in real property within the geographic boundaries of the Basin. These persons

1 and/or entitles claim overlying rights to extract water from the Basin, whether or not they have
2 heretofore exercised such overlying rights: ABC Williams Enterprises LP, ACEH Capital, LLC,
3 Jacqueline Ackermann, Cenon Advincula, Oliva M. Advincula, Mashallah Afshar, Antonio U.
4 Agustines, Airtrust Singapore Private Limited, Marwan M. Aldais, Allen Alevy, Allen Alevy and

7 Inc.

8
9 12. The Public Water Suppliers are informed and believe, and thereon allege, that
10 cross-defendant Roes 1 through 100,000 are the owners, lessees or other persons or entities
11 holding or claiming to hold ownership or possessory interests in real property within the
12 boundaries of the Basin; extract water from the Basin; claim some right, title or interest to water
13 located within the Basin; or that they have or assert claims adverse to the Public Water Suppliers'
14 rights and claims. The Public Water Suppliers are presently unaware of the true names and
15 capacities of the Roe cross-defendants, and therefore sue those cross-defendants by fictitious
16 names. The Public Water Suppliers will seek leave to amend this cross-complaint to add names
17 and capacities when they are ascertained.

18
19 **CLASS ACTION ALLEGATIONS**

20 13. The Public Water Suppliers bring this action against all persons similarly situated.
21 The class will be composed of all owners of land within the adjudication area that is not within
22 the service area of a public entity, public utility, or mutual water company. The persons in this
23 class are so numerous, consisting of approximately 65,000 parcels, that the joinder of all such
24 persons is impracticable and that the disposition of their claims in a class action rather than in
25 individual actions will benefit the parties and the court.

26
27 14. There is a well-defined community of interests in the questions of law and fact
28 affecting the defendant class members in that they each allege an identical overlying right to take

1 native groundwater from a common supply for their reasonable and beneficial use. As they each
2 seek a common right, they have predominantly common issues of fact and law. Additionally,
3 each class member will have common defenses against competing water rights including a claim
4 by the United States that it has a Federal Reserved right. These questions of law and fact
5 predominate over questions that affect only the individual class members. The claims and
6 defenses of the class members and the class representative are typical of those of the class and the
7 class representative will fairly and adequately represent the interests of the class.
8

9 **THE UNITED STATES IS A NECESSARY PARTY TO THIS ACTION**

10 15. This is an action to comprehensively adjudicate the rights of all claimants to the
11 use of a source of water located entirely within California, *i.e.*, the Basin, and for the ongoing
12 administration of all such claimants' rights.
13

14 16. The Public Water Suppliers are informed and believe, and on that basis allege, that
15 the United States claims rights to the Basin water subject to adjudication in this action by virtue
16 of owning real property overlying the Basin, including Edwards Air Force Base.
17

18 17. For the reasons expressed in this cross-complaint, the United States is a necessary
19 party to this action pursuant to the McCarran Amendment, 43 U.S.C. § 666.
20

21 18. Under the McCarran Amendment, the United States, as a necessary party to this
22 action, is deemed to have waived any right to plead that the laws of California are not applicable,
23 or that the United States is not subject to such laws by virtue of its sovereignty.
24

25 19. Under the McCarran Amendment, the United States, as a necessary party to this
26 action, is subject to the judgments, orders and decrees of this Court.
27
28

HISTORY OF THE ANTELOPE VALLEY GROUNDWATER BASIN

20. For over a century, California courts have used the concept of a groundwater basin to resolve groundwater disputes. A groundwater basin is an alluvial aquifer with reasonably well-defined lateral and vertical boundaries.

21. The Antelope Valley Groundwater Basin is located in an arid valley in the Mojave Desert, about 50 miles northeast of the City of Los Angeles. The Basin encompasses about 1,000 square miles in both Los Angeles and Kern Counties, and is separated from the northern part of the Antelope Valley by faults and low-lying hills. The Basin is bounded on the south by the San Gabriel Mountains and on the northwest by the Tehachapi Mountains. The Basin generally includes the communities of Lancaster, Palmdale and Rosamond as well as Edwards Air Force Base.

22. Various investigators have studied the Antelope Valley and some have divided the Basin into "sub-basins." According to the Public Water Suppliers' information and belief, to the extent the Antelope Valley is composed of such "sub-basins," they are sufficiently hydrologically connected to justify treating them as a single source of water for purposes of adjudicating the parties' water rights.

23. Before public and private entities began pumping water from the Basin, its natural water recharge balanced with water discharged from the Basin. Its water levels generally remained in a state of long-term equilibrium. In approximately 1915, however, agricultural uses began to pump groundwater and since then, greatly increased agricultural pumping has upset the Basin's groundwater equilibrium causing a continuous decline in the Basin's groundwater storage.

24. Although private agricultural entities temporarily curtailed their pumping activities when groundwater levels were extremely low, agricultural pumping has increased overall during

1 the past decade. During the same time, urbanization of the Antelope Valley has resulted in
2 increased public demand for water.

3
4 25. Groundwater pumping in the Basin has never been subject to any limits. This lack
5 of groundwater management caused the Basin to lose an estimated eight million acre feet of water
6 over the past eighty years.

7
8 26. Uncontrolled pumping caused repeated instances of land subsidence. It is the
9 sinking of the Earth's surface due to subsurface movement of earth materials and is primarily
10 caused by groundwater pumping. The Public Water Suppliers are informed and believe, and
11 thereupon allege, that portions of the Basin have subsided as much as six feet because of
12 chronically low groundwater levels caused by unlimited pumping. The harmful effects of land
13 subsidence observed in the Basin include loss of groundwater storage space, cracks and fissures
14 on the ground's surface, and damage to real property. Land subsidence problems continue and
15 will continue because of unlimited pumping.

16
17 27. The declining groundwater levels, diminished groundwater storage, and land
18 subsidence damage the Basin, injure the public welfare, and threaten communities that depend
19 upon the Basin as a reliable source of water. These damaging effects will continue, and likely
20 worsen until the court establishes a safe yield for the Basin and limits pumping to the safe yield.

21
22 **PUBLIC WATER SUPPLIERS SUPPLEMENT AND COMMINGLE THEIR**
23 **SUPPLEMENTAL SUPPLY OF WATER WITH BASIN WATER**

24 28. Due to the shortage of water in the Basin, certain Public Water Suppliers purchase
25 State Water Project water from the Antelope Valley-East Kern Water Agency. State Project
26 water originates in northern California and would not reach the Basin absent the Public Water
27 Suppliers purchases.

1 29. Public Water Suppliers purchase State Project water each year. They deliver the
2 State Project water to their customers through waterworks systems. The Public Water Suppliers'
3 customers use the State Project water for irrigation, domestic, municipal and industrial uses.
4 After the Public Water Suppliers' customers use the water, some of the imported State Project
5 water commingles with other percolating groundwater in the Basin. In this way, State Project
6 water augments the natural supply of Basin water.

7
8 30. Public Water Suppliers depend on the Basin as their source of water. But for the
9 Public Water Suppliers' substantial investment in State Project water, they would need to pump
10 additional groundwater each year. By storing State Project water or other imported water in the
11 Basin, Public Water Suppliers can recover the stored water during times of drought, water supply
12 emergencies, or other water shortages to ensure a safe and reliable supply of water to the public.

13
14 **THE BASIN HAS BEEN IN A STATE OF OVER-DRAFT FOR OVER FIVE YEARS**

15 31. The Public Water Suppliers are informed and believe, and upon that basis allege,
16 that the Basin is and has been in an overdraft condition for more than five (5) consecutive years
17 before the filing of this cross-complaint. During these time periods, the total annual demand on
18 the Basin has exceeded the supply of water from natural sources. Consequently, there is and has
19 been a progressive and chronic decline in Basin water levels and the available natural supply is
20 being and has been chronically depleted. Based on the present trends, demand on the Basin will
21 continue to exceed supply. Until limited by order and judgment of the court, potable Basin water
22 will be exhausted and land subsidence will continue.

23
24 32. Upon information and belief, the cross-defendants have, and continue to pump,
25 appropriate and divert water from the natural supply of the Basin, and/or claim some interest in
26 the Basin water. The Public Water Suppliers are informed and believe, and upon that basis
27 allege, that cross-defendants' combined extraction of water exceeds the Basin's safe yield.

1 33. Upon information and belief, each cross-defendant claims a right to take water and
2 threatens to increase its taking of water without regard to the Public Water Suppliers' rights.
3 Cross-defendants' pumping reduces Basin water tables and contributes to the deficiency of the
4 Basin water supply as a whole. The deficiency creates a public water shortage.

5
6 34. Cross-defendants' continued and increasing extraction of Basin water has resulted
7 in, and will result in a diminution, reduction and impairment of the Basin's water supply, and land
8 subsidence.

9
10 35. Cross-defendants' continued and increasing extraction of Basin water has and will
11 deprive the Public Water Suppliers of their rights to provide water for the public health, welfare
12 and benefit.

13
14 **THERE IS A DISPUTE AMONG THE PARTIES REGARDING THE EXTENT AND**
15 **PRIORITY OF THEIR RESPECTIVE WATER RIGHTS**

16 36. The Public Water Suppliers are informed and believe, and thereon allege, there are
17 conflicting claims of rights to the Basin and/or its water.

18
19 37. The Public Water Suppliers are informed and believe, and thereon allege, that
20 cross-defendants who own real property in the Basin claim an overlying right to pump Basin
21 water. The overlying right is limited to the native safe yield of the Basin. The Public Water
22 Suppliers allege that, because subsidence is occurring in the Basin, cross-defendants have been
23 pumping, and continue to pump water in amounts greater than the Basin's safe yield.

24
25 38. The Public Water Suppliers are informed and believe, and thereon allege, they
26 have appropriative and prescriptive rights to groundwater in the Antelope Valley Basin. The
27 Public Water Suppliers are informed and believe, and thereon allege, they and/or their
28 predecessors-in-interest, have pumped water from the Antelope Valley Basin for more than five

1 years prior to the filing of this cross-complaint.

2
3 39. The Public Water Suppliers have pumped water from, and/or stored water in the
4 Antelope Valley Basin, by reasonable extraction means. They have used the Basin and/or its
5 water for reasonable and beneficial purposes; and they have done so under a claim of right in an
6 actual, open, notorious, exclusive, continuous, uninterrupted, hostile, adverse use and/or manner
7 for a period of time of at least five years and before filing this cross-complaint.

8
9 40. To provide water to the public, the Public Water Suppliers have and claim the
10 following rights:

11
12 (A) The right to pump groundwater from the Antelope Valley Groundwater
13 Basin in an annual amount equal to the highest volume of groundwater extracted by each of the
14 Public Water Suppliers in any year preceding entry of judgment in this action;

15 (B) The right to pump or authorize others to extract from the Antelope Valley
16 Groundwater Basin an amount of water equal in quantity to that amount of water previously
17 purchased by each of the Public Water Suppliers from the Antelope Valley-East Kern Water
18 Agency; and which has augmented the supply of water in the Basin in any year preceding entry of
19 judgment in this action.

20 (C) The right to pump or authorize others to extract from the Antelope Valley
21 Groundwater Basin an amount of water equal in quantity to that amount of water purchased in the
22 future by each of the Public Water Suppliers from the Antelope Valley-East Kern Water Agency
23 which augments the supply of water in the Basin; and

24 (D) The right to pump or authorize others to extract from the Antelope Valley
25 Basin an amount of water equal in quantity to that volume of water injected into the Basin or
26 placed within the Basin by each of the Public Water Suppliers or on behalf of any of them.

FIRST CAUSE OF ACTION

(Declaratory Relief – Prescriptive Rights – Against All Cross-Defendants Except the United States And Other Public Entity Cross-Defendants)

41. The Public Water Suppliers re-allege and incorporate by reference each and all of the preceding paragraphs as though fully set forth herein.

42. For over fifty years, the California Supreme Court has recognized prescriptive water rights. The Public Water Suppliers allege that, for more than five years and before the date of this cross-complaint, they have pumped water from the Basin for reasonable and beneficial purposes, and done so under a claim of right in an actual, open, notorious, exclusive, continuous, hostile and adverse manner. The Public Water Suppliers further allege that each cross-defendant had actual and/or constructive notice of these activities, either of which is sufficient to establish the Public Water Suppliers' prescriptive rights.

43. Public Water Suppliers contend that each cross-defendant's rights to pump water from the Basin are subordinate to the Public Water Suppliers' prescriptive rights and to the general welfare of the citizens, inhabitants and customers within the Public Water Suppliers' respective service areas and/or jurisdictions.

44. An actual controversy has arisen between the Public Water Suppliers and cross-defendants, and each of them. Public Water Suppliers allege, on information and belief, that each cross-defendant disputes the Public Water Suppliers' contentions, as described in the immediately preceding paragraph.

45. Public Water Suppliers seek a judicial determination as to the correctness of their contentions and a finding as to the priority and amount of water they and each cross-defendant are entitled to pump from the Basin.

SECOND CAUSE OF ACTION

(Declaratory Relief – Appropriative Rights – Against All Cross-Defendants)

46. The Public Water Suppliers re-allege and incorporate by reference each and all of the preceding paragraphs as though fully set forth herein.

47. Public Water Suppliers allege that, in addition or alternatively to their prescriptive rights, they have appropriative rights to pump water from the Basin.

48. Appropriative rights attach to surplus water from the Basin.

49. Surplus water exists when the pumping from the Basin is less than the safe yield. It is the maximum quantity of water which can be withdrawn annually from a groundwater Basin under a given set of conditions without causing an undesirable result. “Undesirable results” generally refer to gradual lowering of the groundwater levels in the Basin, but also includes subsidence.

50. Persons and/or entities with overlying rights to water in the Basin are only entitled to make reasonable and beneficial use of the Basin’s native safe yield.

51. An actual controversy has arisen between the Public Water Suppliers and cross-defendants, and each of them. The Public Water Suppliers allege, on information and belief, that all cross-defendants, and each of them, seek to prevent the Public Water Suppliers from pumping surplus water.

52. The Public Water Suppliers seek a judicial determination as to the Basin’s safe yield, the quantity of surplus water available, if any, the correlative overlying rights of each cross-defendant to the safe yield and a determination of the rights of persons an/or entities with

overlying, appropriative and prescriptive rights to pump water from the Basin.

THIRD CAUSE OF ACTION

(Declaratory Relief – Physical Solution – Against All Cross-defendants)

53. The Public Water Suppliers re-allege and incorporate by reference each and all of the preceding paragraphs as though fully set forth herein.

54. Upon information and belief, the Public Water Suppliers allege that cross-defendants, and each of them, claim an interest or right to Basin water; and further claim they can increase their pumping without regard to the rights of the Public Water Suppliers. Unless restrained by order of the court, cross-defendants will continue to take increasing amounts of water from the Basin, causing great and irreparable damage and injury to the Public Water Suppliers and to the Basin. Money damages cannot compensate for the damage and injury to the Basin.

55. The amount of Basin water available to the Public Water Suppliers has been reduced because cross-defendants have extracted, and continue to extract increasingly large amounts of water from the Basin. Unless the court enjoins and restrains cross-defendants, and each of them, the aforementioned conditions will worsen. Consequently, the Basin's groundwater supply will be further depleted, thus reducing the amount of Basin water available to the public.

56. California law makes it the duty of the trial court to consider a "physical solution" to water rights disputes. A physical solution is a common-sense approach to resolving water rights litigation that seeks to satisfy the reasonable and beneficial needs of all parties through augmenting the water supply or other practical measures. The physical solution is a practical way of fulfilling the mandate of the California Constitution (Article X, section 2) that the water resources of the State be put to use to the fullest extent of which they are capable.

1 57. This court must determine, impose and retain continuing jurisdiction in order to
2 enforce a physical solution upon the parties who pump water from the Basin, and thereby prevent
3 irreparable injury to the Basin. Available solutions to the Basin problems may include, but are
4 not limited to, the court appointment of a watermaster, and monetary and metering and
5 assessments upon water extraction from the Basin. Such assessments would pay for the purchase,
6 delivery of supplemental supply of water to the Basin.

7
8 **FOURTH CAUSE OF ACTION**

9 **(For Declaratory Relief – Municipal Priority – Against All Cross-Defendants)**

10 58. The Public Water Suppliers re-allege and incorporate by reference each and all of
11 the preceding paragraphs as though fully set forth herein.

12
13 59. The Public Water Suppliers have rights to pump water from the Basin to meet
14 existing public water needs, and also to take increased amounts of Basin water as necessary to
15 meet future public needs. The Public Water Suppliers' rights to Basin water exist both as a result
16 of the priority and extent of their appropriative and prescriptive rights, and as a matter of law and
17 public policy of the State of California: "It is hereby declared to be the established policy of this
18 State that the use of water for domestic purposes is the highest use of water and that the next
19 highest use is for irrigation." (*Water Code* §106.)

20
21 60. *Water Code* Section 106.5 provides: "It is hereby declared to be the established
22 policy of this State that the right of a municipality to acquire and hold rights to the use of water
23 should be protected to the fullest extent necessary for existing and future uses. . . ."

24
25 61. Under *Water Code* sections 106 and 106.5, the Public Water Suppliers have a prior
26 and paramount right to Basin water as against all non-municipal uses.

1 62. An actual controversy has arisen between the Public Water Suppliers and cross-
2 defendants. The Public Water Suppliers allege, on information and belief, that cross-defendants
3 dispute the contentions in Paragraphs 1 through 43, inclusive, of this cross-complaint. The Public
4 Water Suppliers are informed and believe, and on that basis allege, that the majority of the cross-
5 defendants pump groundwater from the Basin for agricultural purposes.

6
7 63. The Public Water Suppliers seek a judicial determination as to the correctness of
8 their contentions and to the amount of water the parties may pump from the Basin. The Public
9 Water Suppliers also seek a declaration of their right to pump water from the Basin to meet their
10 reasonable present and future needs, and that such rights are prior and paramount to the rights, if
11 any, of cross-defendants to use Basin water for irrigation purposes.

12
13 **FIFTH CAUSE OF ACTION**

14 **(Declaratory Relief – Storage Of Imported Water – Against All Cross-defendants)**

15 64. The Public Water Suppliers re-allege and incorporate by reference each and all of
16 the preceding paragraphs as though fully set forth herein.

17
18 65. The Public Water Suppliers purchase and use water from the State Water Project.
19 State Project water is not native to the Basin. Importing State Project water decreases the Public
20 Water Suppliers' need to pump water from the Basin. The Public Water Suppliers' purchase and
21 delivery of State Project water is the reason it has been brought to the Basin. The Public Water
22 Suppliers pay a substantial annual cost to import State Project water; this amount is subject to
23 periodic increases.

24
25 66. The Public Water Suppliers allege there is underground space available in the
26 Basin for storing imported State Project water.

68. An actual controversy has arisen between the Public Water Suppliers and cross-defendants. The Public Water Suppliers allege, on information and belief, that cross-defendants dispute their contentions in Paragraphs 1 through 39, of this cross-complaint.

69. The Public Water Suppliers seek a judicial determination as to the correctness of their contentions that they may store imported State Project water in the Basin, recapture such imported State Project water, and that they have the sole right to pump or otherwise use such imported State Project water.

SIXTH CAUSE OF ACTION

(Declaratory Relief – Recapture Of Return Flows

From Imported Water Stored in The Basin – Against All Cross-defendants)

70. The Public Water Suppliers re-allege and incorporate by reference each and all of the preceding paragraphs as though fully set forth herein.

71. Some of the State Project water typically returns and/or enters the Basin, and will continue to do so. This water is commonly known as “return flows.” These return flows further augment the Basin’s water supply.

72. The Public Water Suppliers allege there is underground space available in the Basin to store return flows from imported State Project water.

SEVENTH CAUSE OF ACTION

(Unreasonable Use Of Water - Against All Cross-Defendants Except Public Entity Cross-Defendants)

76. The Public Water Suppliers re-allege and incorporate by reference each and all of the preceding paragraphs as though fully set forth herein.

77. The California Constitution (Article X, Section 2) provides the cardinal principle of California water law, superior to any water rights priorities and requires that water use not be unreasonable or wasteful. The reasonable use of water depends on the facts and circumstances of each case; what may be reasonable in areas of abundant water may be unreasonable in an area of scarcity; and, what is a beneficial use at one time may become a waste of water at a later time.

78. The Public Water Suppliers are informed and believe, and on that basis allege, that some cross-defendants' use of water is unreasonable in the arid Antelope Valley and therefore

1 constitutes waste, unreasonable use or an unreasonable method of diversion or use within the
2 meaning of the California Constitution (Article X, section 2). Such uses are thereby unlawful.

3
4 79. An actual controversy has arisen between the Public Water Suppliers and cross-
5 defendants. The Public Water Suppliers allege, on information and belief, that the cross-
6 defendants dispute their contentions in Paragraphs 1 through 43 of this Cross-Complaint.

7
8 80. The Public Water Suppliers seek a judicial declaration that cross-defendants have
9 no right to any unreasonable use, unreasonable methods of use, or waste of water. Cross-
10 defendants' rights, if any, must be determined based on the reasonable use of water in the
11 Antelope Valley rather than upon the amount of water actually used.

12 **EIGHTH CAUSE OF ACTION**

13 **(Declaratory Relief Re Boundaries Of Basin)**

14
15 91. The Public Water Suppliers re-allege and incorporate by reference each and all of
16 the preceding paragraphs as though fully set forth herein.

17
18 92. An actual controversy has arisen between the Public Water Suppliers and cross-
19 defendants, and each of them, regarding the actual physical dimensions and description of the
20 Basin for purposes of determining the parties rights to water located therein. The Public Water
21 Suppliers allege, on information and belief, that cross-defendants dispute the Public Water
22 Suppliers' contentions, as set forth in Paragraphs 1 through 38, inclusive, of this cross-complaint.

23 93. The Public Water Suppliers seek a judicial determination as to the correctness of
24 their contentions and a finding as to the actual physical dimensions and description of the Basin.

25 **PRAYER FOR RELIEF**

26 WHEREFORE, the Public Water Suppliers pray for judgment as follows:

27 1. Judicial declarations consistent with the Public Water Suppliers' contentions in the
28

1 First, Second, Third, Fourth, Fifth, Sixth, Seventh and Eighth Causes of Action in this cross-
2 complaint;

3
4 2. For preliminary and permanent injunctions which prohibit cross-defendants, and
5 each of them, from taking, wasting or failing to conserve water from the Basin in any manner
6 which interferes with the rights of the Public Water Suppliers to take water from or store water in
7 the Basin to meet their reasonable present and future needs;

8
9 3. For prejudgment interest as permitted by law;

10
11 4. For attorney, appraisal and expert witness fees and costs incurred in this action;
12 and

13
14 5. Such other relief as the court deems just and proper.

PROOF OF SERVICE

I, Kerry V. Keefe, declare:

I am a resident of the State of California and over the age of eighteen years, and not a party to the within action; my business address is Best Best & Krieger LLP, 5 Park Plaza, Suite 1500, Irvine, California 92614. On January 10, 2007, I served the within document(s):

[PROPOSED] FIRST-AMENDED CROSS-COMPLAINT OF PUBLIC WATER SUPPLIERS FOR DECLARATORY AND INJUNCTIVE RELIEF AND ADJUDICATION OF WATER RIGHTS

- ☒ by posting the document(s) listed above to the Santa Clara County Superior Court website in regard to the Antelope Valley Groundwater matter.
- ☐ by placing the document(s) listed above in a sealed envelope with postage thereon fully prepaid, in the United States mail at Irvine, California addressed as set forth below.
- ☐ by causing personal delivery by ASAP Corporate Services of the document(s) listed above to the person(s) at the address(es) set forth below.
- ☐ by personally delivering the document(s) listed above to the person(s) at the address(es) set forth below.
- ☐ I caused such envelope to be delivered via overnight delivery addressed as indicated on the attached service list. Such envelope was deposited for delivery by Federal Express following the firm's ordinary business practices.

I am readily familiar with the firm's practice of collection and processing correspondence for mailing. Under that practice it would be deposited with the U.S. Postal Service on that same day with postage thereon fully prepaid in the ordinary course of business. I am aware that on motion of the party served, service is presumed invalid if postal cancellation date or postage meter date is more than one day after date of deposit for mailing in affidavit.

I declare under penalty of perjury under the laws of the State of California that the above is true and correct.

Executed on January 10, 2007, at Irvine, California.

Kerry V. Keefe
