GENERAL INFORMATION

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles, and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Notice of Groundwater Extraction and Diversion is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) if annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices that are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write to the address on the top of this form, or telephone (916) 341-5300.

TABLE 1: AGRICULTURAL WATER USE WORKSHEET (Optional)

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) to applied water depth (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

CROP	COLUMN 1	COLUMN 2	COLUMN 3
	ACRES	AVERAGE APPLIED WATER DEPTH (acre-feet per acre)	AMOUNT PUMPED (acre-feet) (column 1 X column 2)
CONVERSION FACTORS One acre-foot (af) = 43,560 cubic feet = 325,900 gallons One miner's inch is approximately 9 gallons per minute. An acre-foot covers one acre of land, one foot deep			TOTAL IRRIGATION USE

TABLE II: AVERAGE DEPTH OF WATER APPLIED TO IRRIGATE EACH CROP (acre-feet per acre)¹
