CLASS ACTION

Santa Clara Case No. 1-05-CV-049053

**DECLARATION OF MARK RITTER,
INDIVIDUALLY AND AS SUCCESSOR
TRUSTEE OF THE RITTER FAMILY
TRUST IN SUPPORT OF WATER USAGE**

21 I, MARK RITTER, declare as follows:

22 1. I am an adult over the age of eighteen am a resident in the County of Los Angeles,
23 State of California.

24 2. I am the Successor Trustee of the Ritter Family Trust (which was a trust created by
25 my parents, Edgar and Paula Ritter). The complete name of the Ritter Family Trust is "The Edgar
26 Carl Ritter and Paula Elaine Ritter Family Trust dated October 6, 1987".

27 3. I became the Successor Trustee of the Ritter Family Trust when my mother, Paula
28

1 Ritter, passed away in 2010. My father predeceased my mother.

2 4. I caused to be prepared and recorded an "Affidavit – Death of Trustee" on January
3 29, 2015, which document was recorded in the Official Records of Los Angeles County,
4 California on September 4, 2015 as document number 20151098381. On the same date, I
5 executed a "Grant Deed" from the Ritter Family Trust to myself and my spouse, Dana E. Ritter,
6 husband and wife as joint tenants. This document was recorded in the Official Records of Los
7 Angeles County, California on September 4, 2015 as document number 20151098382.

8 5. My spouse and I are currently in the process of preparing a revocable trust and, as
9 soon as we have completed preparation of that trust, the Property referenced below will be
10 transferred to our trust.

11 6. My family, whether it be through my parents, the Ritter Family Trust, a
12 partnership between my parents and Forrest Godde, and myself personally through my business
13 known as R R Ranch (which is a partnership between myself and Gonzalo Rodriguez) have all
14 grown alfalfa on real property which is located at or near 51201 90th Street West, Lancaster,
15 California ("Property"). The Property upon which is alfalfa is grown comprises 150 acres and is
16 served by two agricultural wells known as Martinez East Well and Martinez West Well.

17 7. As I understand it, my parents Edgar and Paula Ritter first purchased an interest in
18 the Property in or about the mid-1970s. My attorney is in the process of examining title records
19 to determine exactly when the interest was initially acquired and to determine a chain of title of
20 ownership of the Property.

21 8. I further understand that the Martinez East Well and Martinez West Well have
22 served the Property since the time of the original purchase and that there is no other source of
23 water for the Property.

24 9. I have been involved in farming on the Property since the time of its acquisition by
25 my parents.

26 10. The Property upon which alfalfa is grown consists of a total of 150 acres, and all
27 of it is used for agricultural purposes, specifically, over the years, growing alfalfa. A true and
28 correct copy of the most recent Property tax bill to show the recorded acreage is attached hereto

1 as Exhibit "A."

2 11. To grow the alfalfa crop on the Property, the Trust uses water from the following
3 two wells:

4 a. Martinez East Well. This is a 75 horsepower, L & B pump with a GE motor. The
5 pump bears number D03615 and the motor bears number RXJ405113. This pump
6 further operates via Southern California Edison Service Account # 023-4018-26,
7 and draws its power from meter 3412M-1012. No other piece of equipment draws
8 any power from this meter other than this particular well, and this particular well is
9 solely dedicated to the pumping of water for the agricultural purposes of growing
10 alfalfa on the Property.

11 b. Martinez West Well. This is a 100 horsepower, L & B pump with a GE motor.
12 The pump bears number 11357 and the motor bears number NHJ6918252. This
13 pump further operates via Southern California Edison Service Account # 023-
14 2380-24, and draws its power from meter 345M-1034. No other piece of
15 equipment draws any power from this meter other than this particular well, and
16 this particular well is solely dedicated to the pumping of water for the agricultural
17 purposes of growing alfalfa on the Property.

18 12. The amount of water that is used to grow alfalfa crops on the Property has been
19 quantified by using a Southern California Edison well test and usage figures, comprised from the
20 Property's Southern California Edison bills from 1988 through July 2015. A true and correct
21 copy of the billing history for the Martinez East Well from January 1988 through July 2015 is
22 attached hereto as Exhibit "B." A true and correct copy of the billing history for the Martinez
23 West Well from January 1988 through July 2015 is attached hereto as Exhibit "C."

24 13. On Exhibit "B" and "C", from January 1988 through December 2003, the
25 Customer Name is reflected as Ritter & Godde. Ritter & Godde was a partnership between my
26 parents and the Godde's, which partnership only grew alfalfa on the Property. That partnership
27 ended in either 2009 or 2010 after the death of Mr. Godde and just a few months prior to the
28 death of my mother. After December 2003, the partnership R R Ranch leased the property and

1 conducted all of the farming operations. At that time, the Customer Name on the SCE records
2 was changed to R R Ranch.

3 14. I also recently obtained, directly from Mr. Rick Koch, who is employed by
4 Southern California Edison, copies of all of the Hydraulic Test Results for both the Martinez East
5 Well and the Martinez West Well. True and correct copies of the test results that were forwarded
6 to me from Mr. Koch at my request for the Martinez East Well are attached hereto as Exhibit "D"
7 and the test results for the Martinez West Well are attached hereto as Exhibit "E". As is shown
8 by these Exhibits, Hydraulic Tests were regularly and periodically performed on each of these
9 wells since at least 1990 with the last such tests being performed on March 27, 2012.

10 15. I have also been informed that Mr. Koch has regularly testified both in person and
11 through declarations in this case in regards to the validity of these Hydraulic Tests to show the
12 amount of water actually pumped from a particular well, which calculation I understand involves
13 dividing the results of the Hydraulic Test in regards to the kilowatt hours used to pump an acre
14 foot of water and dividing that measurement by kilowatt hours used according to the billing
15 records referenced above in paragraph 10.

16 16. Taking the results of the Hydraulic Tests, excluding incomplete years, and with the
17 kilowatt hours used per acre foot taken from the most recent test data before the kilowatt hour
18 read date, a summary of the amount of water pumped from 1992 through 2014 is attached hereto
19 as Exhibit "F". The data summarized by Exhibit "F" is drawn from the billing records attached
20 hereto as Exhibits "B" and "C" as well as the Hydraulic Tests attached hereto as Exhibits "D" and
21 "E".

22 17. As summarized in Exhibit "F", the amount of acre-feet of water pumped for
23 agricultural purposes from 1992 through 2014, a period of 23 years, is 18,475.06 acre-feet.
24 Dividing that figure by 23 years yields an average annual use of 803.3 acre-feet per year.

25 18. For the years 2011 and 2012, I used 814.09 and 1087.64 acre-feet, respectively.

26 19. I believe that 803.3 acre-feet per year is representative of the current amount of
27 water that is necessary to farm 150 acres of alfalfa on the Property and is what I expect to use this
28 year and in the future going forward.

20. It is my assertion that the Property should be entitled to a minimum annual supply of 803.3 acre feet a year from the Antelope Valley Groundwater Basin, stemming from the overlying water rights attributable to the Property's location over the groundwater basin in issue in this Case.

21. With a confirmation from this Court of the annual entitlement of 803.3 acre feet per year, I intend to continue my irrigated farming of alfalfa on the Property.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration was executed on November 9, 2015 at Lancaster, California.

Account Overview For 023-4018-26

Account Profile Information

Name / Address Information

Customer Name: R R RANCH
Customer Address: 51201 90TH ST W
LANCASTER, CA 93538
Service Account Name: R R RANCH
Service Account Address: 51201 90TH ST
LANCASTER, CA 93538

Customer / Account Information

Customer Number: 0-937-7838
Customer Account Number: 25-892-0951
Service Account Number: 023-4018-26
Installed Service Number: 0052-155-85
Site Number: 00702-85-00
Project ID: 3588191
L.R. Number: 3883229
Csg Csb Number: 62-36-703-7725-01

Service Account Properties

Account Status: ACTIVE
Direct Account: NO
Facility ID: 0139
Meter Number: 3412M001012
Meter Phase: 3
Service Voltage: 480

Annual Summary

(Most recent 12 Months)

Annual kWh Usage: 241,277
Annual Max kW: 72
Annual Max kW: UNAVAILABLE
Annual Max kW: 0
Power Factor: 100.0
Annual Bill Total: \$23,824.04
Average Cost/kWh: \$0.08874

Billing Summary

Data displayed in this report is current as of the date of the most recent billing period seen in the Billing Summary section below. Account activity subsequent to this date may impact the data presented in this report.

* The average cost/kWh value is determined by dividing the total bill amount by the total quantity of kWh usage. The total bill amount, and therefore the average cost/kWh, contains all charges including, but not limited to, energy charges, demand charges, service charges, late payment charges, and applicable taxes.

This rate analysis is based on applicable Southern California Edison (SCE) rates and is provided to show the potential bill impact to help you evaluate your current rate and/or compare alternative SCE rates or rate options. While this rate analysis provides a current rate calculation, it is based on certain assumptions for usage and applicable rate factors. The results of this analysis are based on actual historical energy consumption under assumptions about future energy consumption patterns and amounts. SCE can neither predict nor guarantee any actual cost savings or increases due to the changes in usage variable or applicable rate factors such as: operating hours, equipment, kW or charges, weather patterns, service voltage, firm service level, taxes, and other facilities charges. Changes to these assumptions will affect actual costs. This rate analysis is intended to compare selected rate schedules and may not include all of your rate options. Please contact SCE for more information about this analysis or your available rate options. If you have a SCE account representative, please contact your SCE account representative for more information about this analysis or your available rate options.

Account Overview For 023-4018-26

Billing Summary (continued)

Date displayed in this report is current as of the date of the most recent billing period seen in the Billing Summary section below. Account activity subsequent to this date may impact the data presented in this report.

* The average certain kWh value is determined by dividing the total bill amount by the total quantity of kWh usage. The total bill amount, and therefore the average certain kWh, excludes all charges including, but not limited to, energy charges, demand charges, service charges, late payment charges, and applicable Landed.

This rate analysis is based on applicable Southern California Edison (SCE) rates and is provided to illustrate potential bill impacts to help you evaluate your current rate and/or compare alternative SCE rates or rate options. While this rate analysis provides accurate rate calculations, it is based on certain assumptions for usage and applicable rate classes. The results of this analysis are based on actual historical energy consumption and/or assumptions about future energy consumption patterns and amounts. SCE can neither predict nor guarantee any actual cost savings or increases due to the changes to usage variables or applicable rate factors such as: operating hours, equipment, kWh charges, weather patterns, service options, firm service levels, taxes, and other facilities charges. Changes to these numerous variables will affect actual costs. This rate analysis is intended to compare selected rate schedules and may not include all of your rate options. Please contact SCE for more information about this analysis or your available rate options. If you have a SCE account representative, please contact your SCE account representative for more information about this analysis or your available rate options.

L. R. Number: 3687332
CIS CIS Number: 52-38-703-7585-01

Service Account Properties

Account Status: ACTIVE
Old Account: NO
Facility SIC: 0139
Meter Number: 345M001034
Meter Phase: 3
Service Voltage: 480

Annual Summary

(Most recent 12 Months)

Annual kWh Usage: 343,287
Annual Max kW: 110
Annual Max kW: UNAVAILABLE
Annual Max kW: 0
Power Factor: 100.0
Annual kWh Price: \$33,374.18
Average Consumption: \$0.09722

Billing Summary

Date displayed in this report is current as of the date of the most recent billing period seen in the Billing Summary section below. Account activity subsequent to this date may impact the data presented in this report.

* The average consumption value is determined by dividing the total bill amount by the total quantity of kWh usage. The total bill amount, and therefore the average consumption, contains all charges including, but not limited to, energy charges, demand charges, service charges, rate payment charges, and applicable taxes.

This rate analysis is based on applicable Southern California Edison (SCE) rates and is provided to illustrate potential bill impacts to help you evaluate your current rate and/or compare alternative SCE rates or rate options. While this rate analysis provides accurate rate calculations, it is based on certain assumptions for usage and applicable rate factors. The results of this analysis are based on actual historical energy consumption and/or assumptions about future energy consumption patterns and amounts. SCE can neither predict nor guarantee any actual cost savings or increases due to the changes to usage variables or applicable rate factors such as: opening hours, equipment, LVAS charges, weather patterns, service voltage, firm service levels, taxes, and added facilities charges. Changes to these numerous variables will affect actual costs. This rate analysis is intended to compare selected rate schedules and may not include all of your rate options. Please contact SCE for more information about this analysis or your available rate options. If you have a SCE account representative, please contact your SCE account representative for more information about this analysis or your available rate options.

Account Overview For 023-2380-24

Billing Summary (continued)

Data displayed in this report is current as of the date of the most recent billing period shown in the Billing Summary section below. Amounts billable subsequent to this date may impact the data presented in this report.

* The Average kWh value is determined by dividing the total bill amount by the total quantity of kWh usage. The total bill amount and therefore the average kWh, contains all charges including, but not limited to, energy charges, demand charges, service charges, late payment charges, and applicable taxes.

This rate analysis is based on applicable Southern California Edison (SCE) rates and is provided to illustrate potential bill impacts to help you evaluate your current rate and/or compare alternative SCE rates or rate options. While this rate analysis provides accurate rate calculations, it is based on certain assumptions for usage and applicable rate periods. The results of this analysis are based on actual historical energy consumption and/or assumptions about future energy consumption patterns and amounts. SCE can neither predict nor guarantee any actual cost savings or increases due to the changes in usage variables or applicable rate factors such as, operating hours, equipment, kWh charges, weather patterns, service voltage, firm service levels, taxes, and add-on facilities charges. Changes in these usage variables will affect actual costs. This rate analysis is intended to compare and contrast the calculated and may not include all of your rate options. Please contact SCE for more information about this analysis or your available rate options. If you have a SCE account representative, please contact your SCE account representative for more information about this analysis or your available rate options.

The following energy efficiency analysis is presented as an aid to your cost accounting. This is an estimate based on the conditions present during the Edison pump test performed on July 9, 2009, billing history for the past 12 months, and your current rate of TOU-P-2-8-1.

Assuming that water requirements will be the same as for the past year, and all operating conditions (annual hours of operation, head above, and water pumping level) will remain the same as they were at the time of the pump test, it is estimated that:

1. Overall plant efficiency can be improved from 85.4% to 89.0%.
2. This can save you up to 14,292 kWh and \$1,007.16 annually.
3. These kWh savings translate to a 6.2-ton decrease in CO₂ emissions.

	Existing	Plant Efficiency Improved	Savings
Total kWh	277,092	262,800	14,292
kW Input	88.00	62.60	3.40
kWh per Acre Foot	512	580	32
Acre Feet per Year	453		
Average Cost per kWh	\$0.07		
Average Cost per Acre Foot	\$43.10	\$40.86	\$2.22
Overall Plant Efficiency (%)	85.4	89	
Total Annual Cost	\$19,828.67	\$18,519.52	\$1,007.16

It is sincerely hoped that this information will prove helpful to you, and that your concerns over maintaining optimum energy efficiency will be continued. If you have any questions regarding this report, please contact RICK KOCH at (805)864-7312.

Results	Test 1	Test 2
Discharge Pressure, PSI	51.4	83
Standing Water Level, Feet	242.4	242.4
Drawdown, Feet	11.4	11.2
Discharge Head, Feet	118.7	145.8
Pumping Water Level, Feet	253.8	253.8
Total Head, Feet	372.5	299.1
Capacity, GPM	822	779
GPM per Foot Drawdown	72.1	69.6
Acre Feet Pumped in 24 Hours	3.833	3.443
kW Input to Motor	95.5	98.8
HP Input to Motor	128.1	129.8
Motor Load (%)	118.1	119.7
Measured Speed of Pump, RPM	1,789	
kWh per Acre Foot	831	878
Overall Plant Efficiency (%)	60.4	60.5

Test 1 is the normal operation of this pump at the time of the above test(s). The other results were obtained by throttling the discharge.

Meter: 346M-1034

The following energy efficiency analysis is presented as an aid to your cost accounting. This is an estimate based on the conditions present during the Edison pump test performed on March 27, 2012, billing history for the past 12 months, and your current rate of TOU-P-2-S-1.

Assuming that water requirements will be the same as for the past year, and all operating conditions (annual hours of operation, head above, and water pumping level) will remain the same as they were at the time of the pump test, it is estimated that:

1. Overall plant efficiency can be improved from 60.4% to 70.0%.
2. This can save you up to 44,159 kWh and \$3,401.78 annually.
3. These kWh savings translate to a 18-ton decrease in CO₂ emissions.

	Existing	Plant Efficiency Improved	Savings
Total kWh	321,158	277,008	44,150
kW Input	98.50	82.37	16.13
kWh per Acre Foot	631	544	87
Acre Feet per Year	509		
Average Cost per kWh	\$0.08		
Average Cost per Acre Foot	\$48.62	\$41.83	\$6.80
Overall Plant Efficiency (%)	60.4	70	
Total Annual Cost	\$24,745.07	\$21,343.29	\$3,401.78

It is sincerely hoped that this information will prove helpful to you, and that your concerns over maintaining optimum energy efficiency will be continued. If you have any questions regarding this report, please contact RICK KOCH at (805)654-7312.
