

Area of deposition during
Pliocene; note constriction
at 35° latitude, well north of
fault

FIGURE 77.—Paleogeographic map of western Mojave Desert region—Pliocene time.

Dibblee, 1967, Fig. 77

Areas of deposition during the Pleistocene time; note well-developed ridge between Antelope & Fremont basins

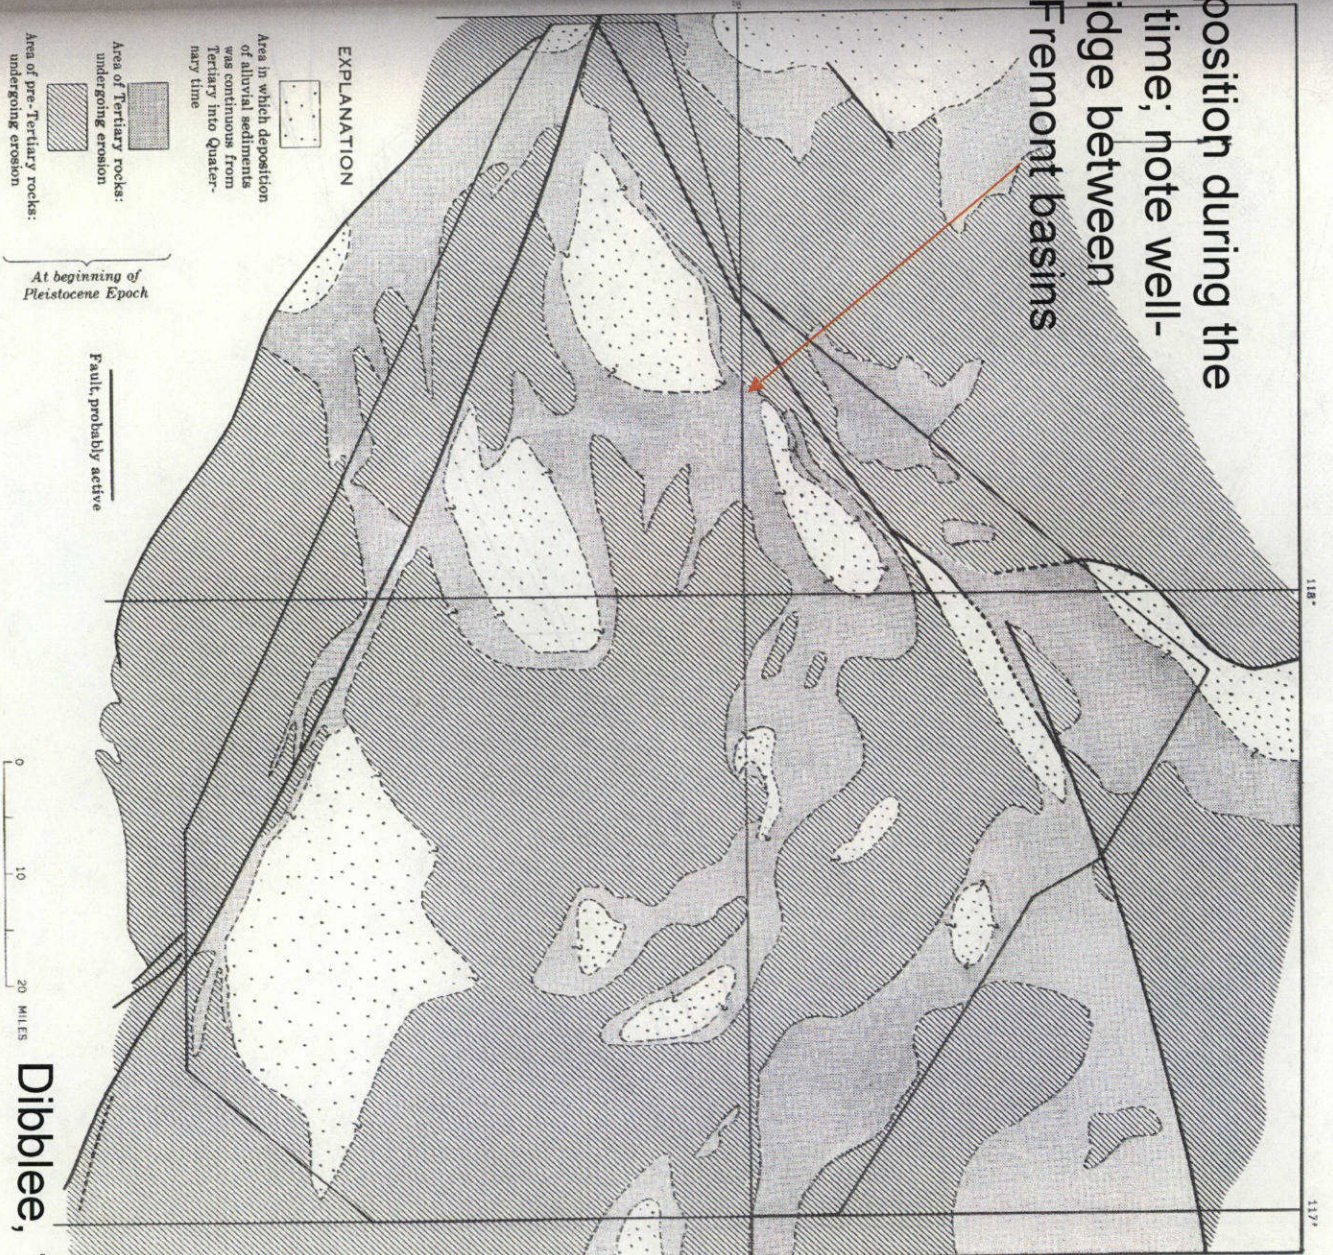

FIGURE 78.—Paleogeographic map of western Mojave Desert region—beginning of Pleistocene time.

Dibblee, 1967, Fig. 78

Faulting developed later during Pleistocene & well south of 35° latitude

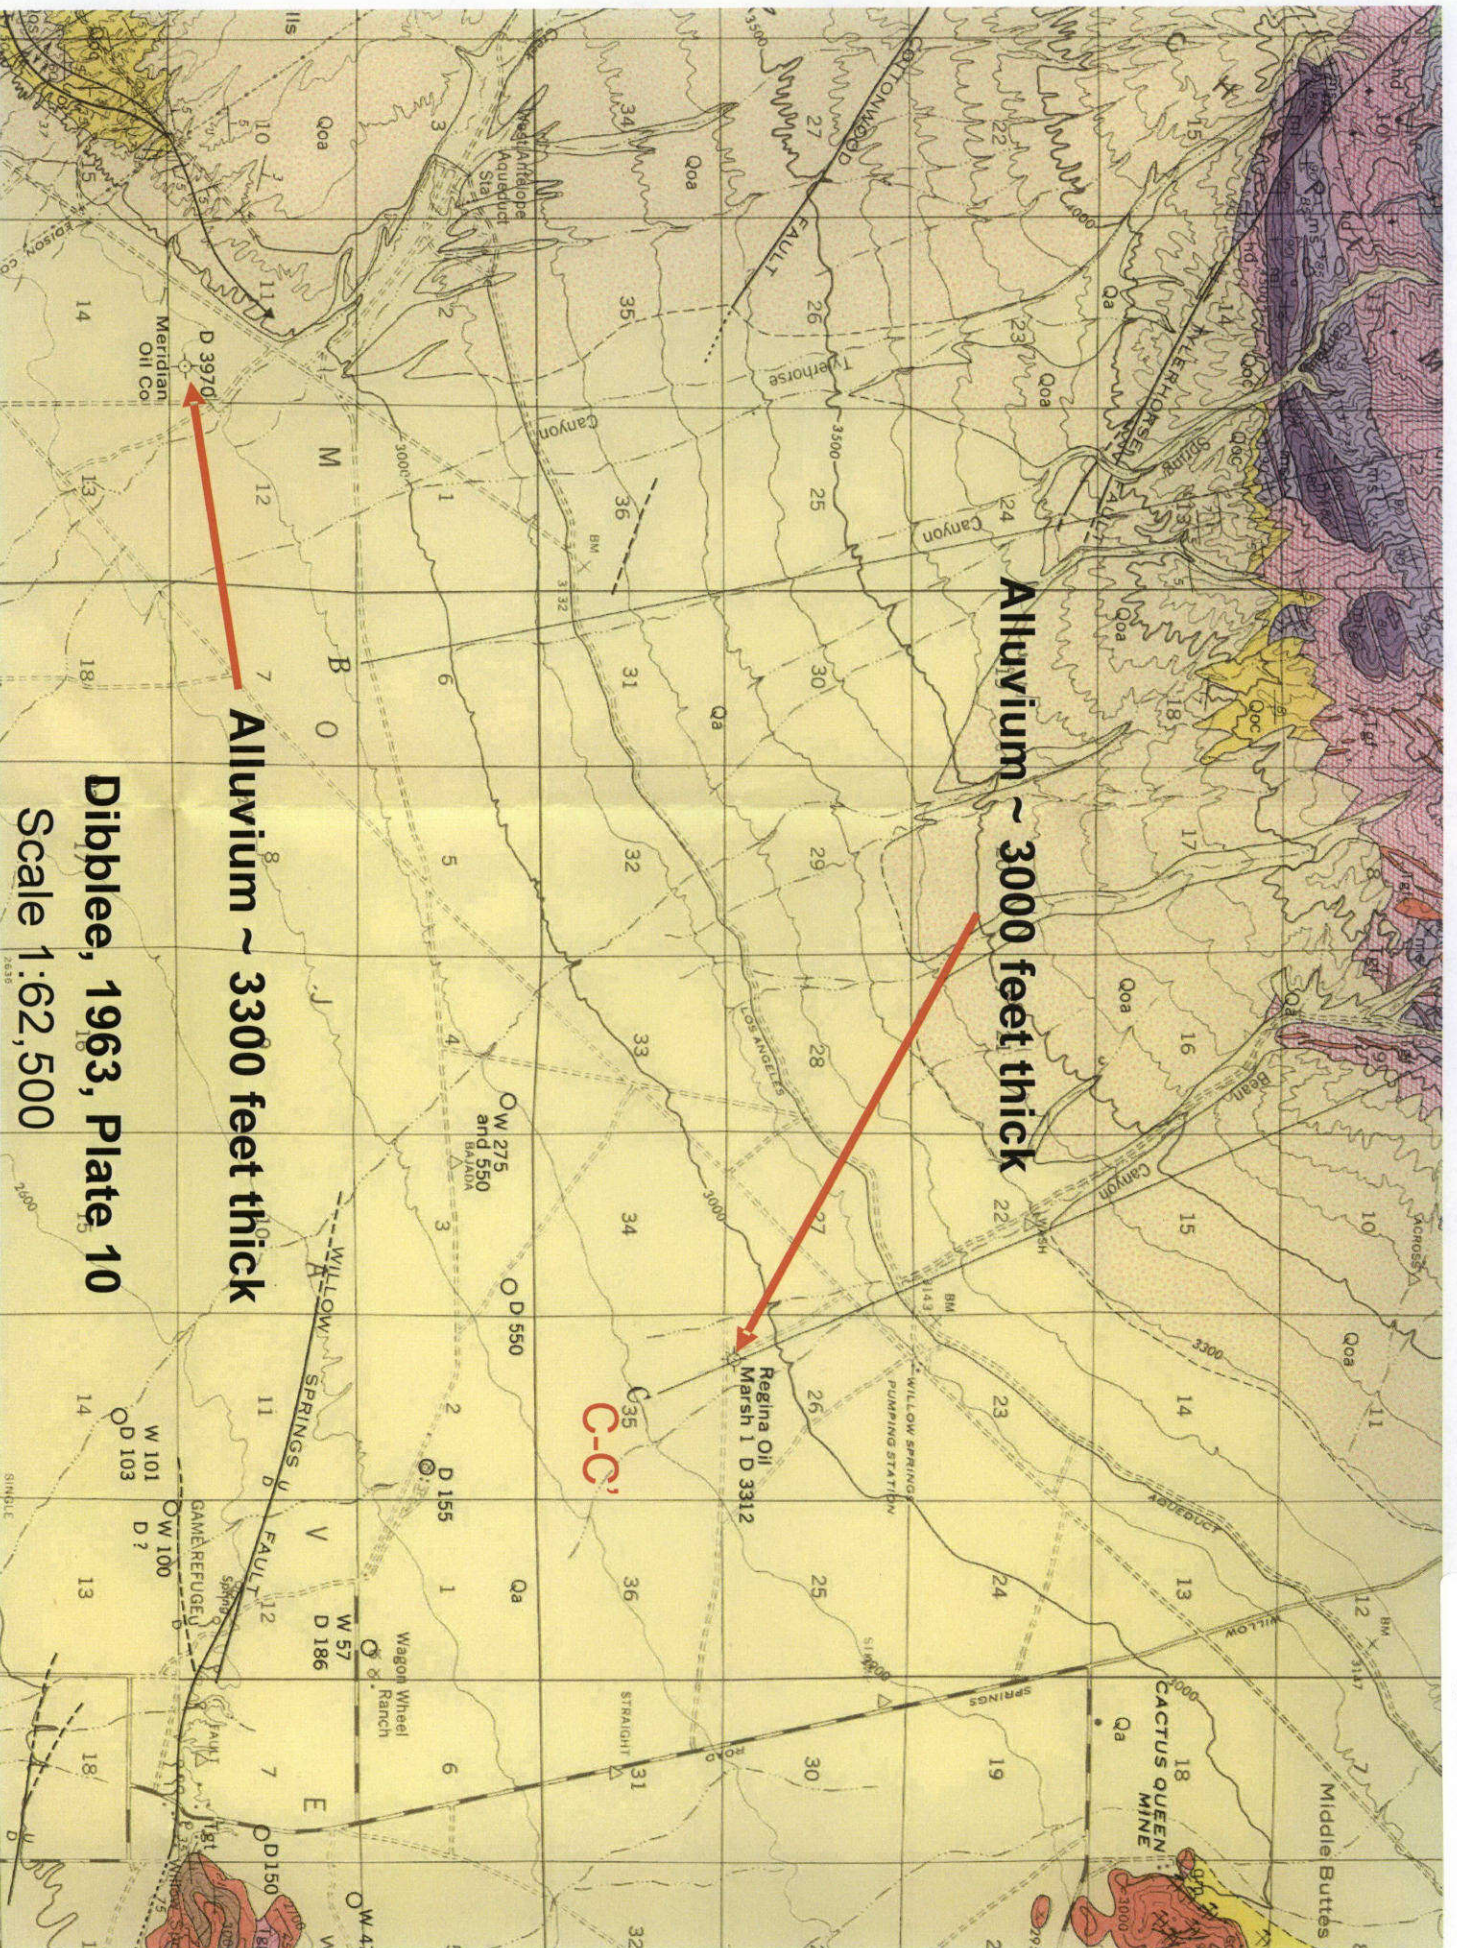

FIGURE 79.—Paleogeographic map of western Mojave Desert region—Pleistocene time.

Dibblee, 1967, Fig. 79
