All parties who participated in the Phase IV trial, with the exception of the Wood Class, have also stipulated to the above amounts of groundwater pumped. A copy of the stipulation is attached hereto as Exhibit "A". Notwithstanding the stipulation, the court finds that the evidence presented during the Phase IV trial supports each party's 2011 and 2012 groundwater production amount as stated herein.

GRANITE CONSTRUCTION COMPANY

During the Phase IV trial, the Public Water Suppliers indicated that they dispute the amount of groundwater pumped by Granite Construction Company ("Granite") at its Littlerock Quarry. In response, Granite agreed to install a meter for each of its wells at its Littlerock Quarry within 30 days after the Phase IV trial to measure groundwater pumping for a period of one year. At the conclusion of the one year period Granite and the Public Water Suppliers will compare the meter readings against Granite's 2011 and 2012 product volumes to estimate Granite's groundwater use in 2011 and 2012, and report the findings to the court if such findings differ materially from 400 acre-feet per year. For that reason, the court reserves jurisdiction to amend this decision based on the meter readings as to the amount of groundwater pumped by Granite in

1 2011 and 2012. In the meantime, the agreement of the parties and the finding of the court is that
2 Granite Construction is deemed to have pumped 400 acre feet of groundwater in 2011 and 2012,
3 respectively.

4 THE WOOD CLASS

5 During the Phase IV trial, the Court-appointed expert had not completed its analysis of
6 groundwater pumping by the Wood Class. It did not present any evidence in the Phase IV trial.
7 Consequently, the Court defers the determination of the Wood Class groundwater pumping in
8 2011 and 2012 to a later time to be determined.
