Cal. Const., art. XIV, § 3; Littleworth and Garner, California Water (1995)  
p. 52.....5

## I. INTRODUCTION

Despite Little Rock Sand and Gravel, Inc.'s ("LS&G") convoluted arguments regarding the parties' pre-judgment claims, resolution of this dispute is simple and straightforward. The Court's jurisdiction and duty is to interpret the Judgment, i.e., the Exhibit 4 Production Right allocated to "Granite Construction Company (Little Rock Sand and Gravel, Inc.)." The undisputed evidence, including the declarations of Messers McLachlan, Hughes, Zimmer, Joyce and Kuhs, and the February 20, 2015, email admission from Ted Chester to counsel for the United States that the allocation is "joint," establishes that the Exhibit 4 allocation to Granite Construction Co. ("**Granite**") and LS&G is simply that, "joint." LS&G has offered no extrinsic evidence to aid in interpreting the Exhibit 4 joint allocation. The law creates a presumption that Granite and LS&G are equal cotenants to the 234 acre-feet (AF). (Civ. Code § 686; *Caito v. United California Bank* (1978) 20 Cal.3d 694, 705.) LS&G has offered no evidence to overcome the presumption. Therefore, Granite and LS&G share the 234 AF Production Right equally. Any other result would constitute an impermissible amendment to the Judgment.

Not surprisingly, LS&G once again frames this dispute as a landlord/tenant dispute. But this is not a landlord/tenant issue. Granite is a landowner Stipulating Party that the Court found has a reasonable and beneficial use for water and established its overlying right. Granite does not claim water rights associated with land it leases from LS&G (the "**Leased Property**"). And the lease has absolutely no bearing on LS&G's latest post-judgment water grab. Nor do the parties' pre-judgment water rights have any bearing on the stipulated Exhibit 4 allocation since the parties waived their overlying rights when they signed the Stipulation for Entry of Judgment and Physical Solution ("**Stipulation**") and accepted the Judgment and Physical Solution's terms. Rather, since LS&G reneged on an oral division of the 234 AF, Granite and LS&G share the negotiated Exhibit 4 Production Right equally—unless, of course, this Court finds LS&G is a non-stipulating party, in which case LS&G is entitled to nothing.

LS&G's claim that it put all Stipulating Parties on notice of the conditional nature of its signature is untrue and irrelevant. In any case, LS&G could not unilaterally alter the terms of the Stipulation or Judgment. In fact, LS&G's own evidence establishes that LS&G did not have any

1 agreement with the Stipulating Parties or with the Court to condition its acceptance of the  
2 Stipulation and Judgment on a post-judgment trial of the Exhibit 4 Production Rights.  
3 Additionally, correspondence among counsel negotiating the Stipulation, including Mr. Chester,  
4 show that the Stipulating Parties rejected LS&G's proposals to allocate the entire 234 AF to  
5 LS&G and, after that proposal was rejected, to reserve this dispute in the Stipulation.

6 The rest of LS&G's brief is a hodgepodge of inconsistent arguments, incorrectly cited  
7 legal authorities, and misquoted evidence. For example:

- 8 • LS&G seeks to quiet title to an Exhibit 4 Production Right as of the very same day  
9 this Court entered judgment quieting title to all water rights in the Antelope Valley.
- 10 • LS&G claims ownership of a post-judgment Production Right based on arguments  
11 regarding the parties' pre-judgment water rights, not the Judgment or Stipulation.
- 12 • LS&G claims overlying appurtenant water rights based on LS&G's status as a tenant  
13 but argues that Granite has no water rights because it is also a tenant.
- 14 • LS&G claims a priority water right following a judgment in which LS&G stipulated  
15 that all rights (except the Federal Reserve right) are of equal priority.
- 16 • LS&G seeks rights under the Judgment but claims not be bound by the Judgment  
17 because its signature was "conditional."
- 18 • LS&G seeks rights under the Judgment but has not filed a motion, as the Judgment  
19 requires to invoke the Court's reserved jurisdiction.
- 20 • LS&G claims that the Court's rulings in its Statement of Decision regarding the  
21 Willis Class apply to Granite, even though Granite is not a Willis Class member.
- 22 • LS&G claims a right to water without providing a scintilla of evidence of any current  
23 or future beneficial need for water.

24 The simple uncontroverted fact is that on March 31, 2014, Granite and LS&G reached a  
25 handshake agreement (the "**Agreement**") on how to divide the 234 AF during the global  
26 settlement process, advised counsel for the other parties present that they had reached such an  
27 agreement, and the parties then advised the Court of the global settlement. Several months later,  
28 LS&G sought to renege on the Agreement and, in a series of letters to Granite's CEO, attempted

1 to extract a higher allocation. It is as if LS&G had ulterior motives and a separate plan for  
2 achieving them. Regardless of LS&G's motivations or tactics, the bottom line is that LS&G  
3 signed a stipulation it had no intention of honoring, claimed it had an unresolved dispute with  
4 Granite, then stood idly by while Judgment was entered, and now seeks to invoke this Court's  
5 equity to adjudicate a pre-judgment water dispute post-judgment. Equity should not save LS&G  
6 from its own untrustworthy dealings, dilatory tactics and the express terms of the Stipulation it  
7 signed.

8 Below, we begin with a discussion of Granite's water rights before the Judgment and its  
9 negotiations for its Production Rights. Next we ask the Court to address two preliminary matters  
10 before it considers the merits of LS&G's Opening Brief—namely, that LS&G's Opening Brief is  
11 procedurally defective in the absence of a motion and that LS&G has confirmed that it did not  
12 intend to be a Stipulating Party. Turning to the merits, we then address the false premises upon  
13 which LS&G's position is based. Lastly, we set forth Granite's position that the parties hold the  
14 Exhibit 4 allocation jointly and equally.

## 15 II. STATEMENT OF FACTS REGARDING GRANITE'S RIGHTS

### 16 A. Granite Owns Land In The AVAA, Including Land Adjacent To The Leased 17 Property That Is Part Of Granite's Littlerock Quarry.

18 Granite is a landowner Stipulating Party that negotiated overlying Production Rights  
19 under the Judgment and Physical Solution ("**Judgment**") as stated on Exhibit 4. As described in  
20 detail in the Memorandum in support of Granite's pending motion to interpret and enforce the  
21 Judgment ("**Granite's Motion**"), Granite owns about 217 acres of land within the AVAA,  
22 including about 67 acres immediately adjacent to Leased Property. (See Memorandum in  
23 Support of Motion by Granite ("**Memo**"), Apr 13, 2018, pp. 2-3.) In 2011, Granite amended its  
24 mining and reclamation plan for its Littlerock Quarry to include 55 acres of Granite's adjacent  
25 land. At the Littlerock Quarry, Granite is mining its own property, using water for dust control  
26 and to process Granite's rock and sand materials ("aggregates"). Granite will continue to use the  
27 wells and water produced therefrom to support mining operations on Granite's land and  
28 processing operations on the Leased Property into the foreseeable future. (*Ibid.*) Thus, at the time

1 of the global settlement negotiations, Granite had overlying water rights associated with land that  
2 is part of its Littlerock Quarry in addition to overlying rights associated with the 145 acres on  
3 which it operates its Big Rock Quarry.

4 The Court in part found in its Statement of Decision that Granite and “each stipulating  
5 Landowner Party” has “proven their respective land ownership or other appropriate interest in  
6 the Basin and reasonable use and established their overlying right.” (Statement of Decision, p.  
7 10, ll. 14-16.)

8 **B. Granite Negotiated With All Other Stipulating Parties For Allocations Of Overlying**  
9 **Production Rights To Granite Based On Granite’s Land Ownership And Its**  
10 **Current and Future Need For Groundwater.**

11 When Granite negotiated the 234 AF allocation for Granite’s Littlerock Quarry with the  
12 other Stipulating Parties, Granite’s status was as a landowner, producer, and user of water in the  
13 AVAA with a then-current and future need for groundwater to support its operations at two  
14 quarries. During the Phase 4 Trial Granite submitted evidence of its pumping and water use at  
15 both its Littlerock Quarry and Big Rock Quarry during the years 2011 and 2012, which showed  
16 pumping at Littlerock Quarry of more than 400 AF per year in 2011 and 2012 and approximately  
17 16 AF per year at its Big Rock Quarry for landscape maintenance during the same two years. As  
18 noted in the Supplemental Declaration of William Taylor, Granite continues to operate the  
19 Littlerock Quarry and will transition operations to the Big Rock Quarry over time as it phases out  
20 mining at Littlerock. Thus, Granite’s need for water for its operations in the Antelope Valley for  
21 the foreseeable future will remain relatively constant at more than 400 AF per year.

22 Granite’s negotiated Exhibit 4 allocations for its Big Rock and Littlerock Quarries were  
23 not based strictly on the individual 2011-2012 pumping histories at the two locations.<sup>1</sup> Instead,  
24 Granite negotiated allocations based on Granite’s ownership of land with a current and future  
25 need for water, its status as an economic driver in the community, and based on the relative

26  
27 <sup>1</sup> Granite originally had a single allocation listed on Exhibit 4 as of March 31, 2014, but broke  
28 out the allocation for the Big Rock Quarry when the dispute with LS&G arose and LS&G  
asserted it was also entitled to Granite’s entire allocation, including the portion negotiated for the  
Big Rock Quarry. (Kuhs Opp. Decl., ¶¶ 4-5, 13.)

1 needs of the other Stipulating Parties.<sup>2</sup> Thus, although Granite's 2011-2012 pumping history at  
2 Big Rock was relatively small (about 16 AF/year) since mining operations had not yet  
3 commenced there, Granite negotiated a Production Right of 126 AF for Big Rock and 234 AF  
4 for Granite's Littlerock Quarry.

5 **C. Granite Gave Up Valuable Consideration As A Landowner In Exchange For The**  
6 **Stipulation With All Other Stipulating Parties, Including The Public Water**  
7 **Suppliers, The United States And Other Landowners.**

8 In agreeing to the Stipulation, Granite gave up, among other things, its right to challenge  
9 the prescription claims of the Public Water Suppliers ("PWS"), the Federal Reserve Right and  
10 the quantities of the correlative rights claims of other landowners.<sup>3</sup> Granite had compiled  
11 evidence regarding the PWS's pumping history and could have made compelling arguments  
12 against their entitlement to prescriptive rights as against Granite as well as regarding the  
13 quantification of their prescriptive rights. And some of the stipulating landowner parties had  
14 questionable claims. For example, Mr. Burrows—another client of Ted Chester, LS&G's  
15 counsel—submitted evidence of alleged water use in 2011 and 2012 on his orchard of dead  
16 peach trees with non-operational water distribution facilities. According to the Phase 4 finding,  
17 Mr. Burrows pumped only a stipulated 100 AF per year. In exchange for the terms of the  
18 Stipulation and Judgment, Granite and other Stipulating Parties agreed to the allocation to Mr.  
19 Burrows of 295 AF. Granite also gave up the right to contest the Judgment under which  
20 overlying water rights are no longer correlative, but instead are now quantified and transferrable.  
21 Granite agreed to permanent transferrable rights only as part of the Judgment providing the  
22 corresponding Production Rights.  
23  
24

25 <sup>2</sup> This is consistent with the court's holding in *Tehachapi-Cummings County Water Dist. v.*  
26 *Armstrong* (1975) 49 Cal.App.3d 992, 1001, wherein the court said that the "proportionate share  
27 of each owner is predicated not on his past use over a specified period of time, nor on the time he  
28 commenced pumping, **but solely on his current reasonable and beneficial need for water.**"  
(emphasis added; accord Cal. Const., art. XIV, § 3; Littleworth and Garner, California Water  
(1995) p. 52.)

<sup>3</sup> Granite's counsel participated extensively in the Phase 5 Trial.

### III. PRELIMINARY MATTERS

There are two significant issues that the Court should address before considering the merits of LS&G's arguments: (A) LS&G's Opening Brief was filed without a motion, and (B) LS&G's conditional signature means that LS&G is not a Stipulating Party.

#### A. LS&G's "Opening Brief" Filed Without A Motion Is Procedurally Defective.

LS&G is not entitled to the relief prayed for in its First Amended complaint filed in the add-on action ("FAC") because LS&G has not filed a motion with the Court. In Section 6.5 of the Judgment, the Court reserved jurisdiction "for the purpose of enabling the Court, *upon a motion of a Party or Parties* . . . to make such further or supplemental order or directions as may be necessary or appropriate to interpret, enforce, administer or carry out" the Judgment. (Emphasis added.) Thus, Granite and LS&G stipulated, and the Court ordered, that "the issues and disputes between [Granite] and [LS&G] . . . raised in the pleadings filed in the add-on case shall be resolved by law and motion practice pursuant to Paragraph 6.5 of the Judgment and Physical Solution entered in the AV Cases." (Stipulation and Order for Management of Post-Judgment Dispute, Oct 9, 2017, ¶ 1.) On January 31, 2018, the Court set a briefing schedule and hearing date for *motions* in the add-on case, including an April 13, 2018, deadline for filing *motions* and supporting papers. (Notice of Ruling, Feb 7, 2018.) Accordingly, in the absence of a noticed motion by LS&G, the Court lacks jurisdiction to grant LS&G relief.

The lack of a motion for specified relief and the basis therefor violates due process and also creates uncertainty regarding the relief and basis for the relief LS&G seeks. On the one hand, in its FAC, LS&G seeks to "quiet title" to the joint 234 AF Production Right as of the date the Judgment was entered. (FAC, ¶ 25.) As discussed in Granite's Motion, an order "quieting title" to the joint Production Right in LS&G's name alone would amend the Judgment, which the Court lacks jurisdiction to do. On the other hand, based on its "Opening Brief," LS&G seeks to "quiet title" to a post-Judgment Production Right based on facts supporting LS&G's claims to pre-judgment correlative overlying water rights. LS&G's claims must fail because this Court

lacks jurisdiction to grant such relief, however, because such claims are merged with the Judgment which already quieted title to all pre-judgment water rights in the basin.<sup>4</sup>

**B. LS&G Confirms The “Conditional Submission” Of Its Signature To The Stipulation, Meaning LS&G Is Not A Stipulating Party.**

Granite’s Memo sets forth the facts and evidence showing that LS&G is not a Stipulating Party. (Memo, pp. 8-9.) Most significantly, LS&G principal George Lane testified in deposition that LS&G “absolutely” did not intend to be bound by all the Stipulation’s terms, particularly the Exhibit 4 allocation. (*Ibid.*) LS&G’s Opening Brief confirms that LS&G did not intend to be a Stipulating Party and should be removed from Exhibit 4.

**1. “Conditional” Is How LS&G Characterizes Its Submission Of Its Signature To The Stipulation.**

Consistent with Mr. Lane’s non-committal approach to the Stipulation, in its Opening Brief LS&G confirms that LS&G’s signature to the Stipulation was “conditional.” (Opening Brief (“**Op. Br.**”), p. 20, l. 17.) LS&G says it “submitted its signature to the Stipulation . . . with the reservation that title to the Allocation ‘remains unresolved’ and that it ‘will be addressed and resolved at a later time.’” (*Id.* at p. 11, ll. 9-11; see Declaration of Ted Chester (“**Chester Decl.**”), ¶¶ 25-26 and Ex. I.) In schoolyard terms, LS&G claims it had its fingers crossed behind its back.<sup>5</sup>

Consistent with its lack of good faith, LS&G’s claim that it informed “all parties” of its attempted unilateral reservation is false. Its counsel sent the email containing the reservation *only to counsel for the United States*, and not to Granite or any other Stipulating Party. Mr. Chester, in his declaration in support of LS&G’s Opening Brief, falsely states that in his “February 20, 2015 email, by which [he] submitted Little Rock’s signature to the Stipulation,” a copy of which is attached to his declaration as Exhibit I, he “informed all parties” of Little Rock’s purported “reservation.” (Chester Decl., ¶¶ 25-26.) As is plain from Exhibit I to Mr. Chester’s declaration,

<sup>4</sup> Had LS&G filed a motion, it would have been limited to a 15 page brief. (Cal. Rules of Court, rule 3.1113(d).) LS&G’s Opening Brief is 24 pages, which the Court may refuse to consider due to its length. (Rules 3.1113(d), (g) & 3.1300(d).) Granite, however, is compelled to respond.

<sup>5</sup> LS&G’s equivocal “conditional” view of the Stipulation is akin to LS&G’s position regarding the parties’ pre-Judgment Agreement, i.e., that LS&G’s agreement to the division was conditional and therefore not binding.

1 however, he sent that email only to James Dubois, counsel for the United States. A later email  
2 from the United States to the Stipulating Parties indicated that LS&G had signed the Stipulation  
3 but did not mention the conditional submission of LS&G's signature. (Declaration of Robert G.  
4 Kuhs in Support of Opposition to Op. Br., ("**Kuhs Opp. Decl.**"), ¶ 18 & Ex. HH.)

5 **2. LS&G Is Either Fully Bound By The Stipulation Or Is Not A Stipulating**  
6 **Party.**

7 A fundamental purpose of the Stipulation was to settle all disputes and end all litigation  
8 among the Stipulating Parties regarding water rights in the Basin. The Stipulation provides in  
9 pertinent part:

10 a. The Judgment is a determination of all rights to Produce and store  
Groundwater in the Basin.

11 b. The Judgment resolves all disputes in this Action among the  
12 Stipulating Parties.

13 (Stipulation, p. 1.) These stipulated facts constitute judicial admissions and are therefore  
14 conclusive both as to the global determination of groundwater rights and absence of dispute,  
15 including the determination of LS&G and Granite's groundwater rights and the absence of  
16 dispute as between Granite and LS&G. (See *Barsegian v. Kessler & Kessler* (2013) 215  
17 Cal.App.4th 446, 452 ["Facts to which adverse parties stipulate are judicially admitted" and  
18 "[are] therefore conclusive."].)

19 LS&G's claim that it unilaterally reserved an issue for future litigation with another  
20 landowner Stipulating Party is both contrary to these express provisions and a legal  
21 impossibility. A party to a stipulation for entry of judgment may not unilaterally reserve issues  
22 for post-judgment litigation. (*Ellena v. State of California* (1977) 69 Cal.App.3d 245, 260 [An  
23 exception to the normal res judicata effect of a stipulated judgment "requires that an otherwise  
24 included issue be withdrawn by an express reservation."].)<sup>6</sup> A stipulation "results in a judicial  
25 admission removing issues from the case." (*In re Marriage of Hahn* (1990) 224 Cal.App.3d  
26 1236, 1239, citing 1 Witkin, Cal. Evidence (5th ed. 2012) Hearsay, § 101, p. 925 and cases cited

27 <sup>6</sup> The *Ellena* court held that a stipulated judgment in condemnation precluded later litigation by  
28 the landowner for severance damages because there was no express language in the stipulation  
withdrawing the severance damage issue from the scope of the stipulated judgment. (*Ibid.*).

1 therein.) “A stipulated judgment is as conclusive as to the matters in issue it determines as a  
2 judgment after trial.” (*Sargon Enterprises, Inc. v. University of Southern California* (2013) 215  
3 Cal.App.4th 1495, 1507 [holding that because the stipulated judgment there did not reserve any  
4 issues for further determination the judgment was final on all issues before the court].) Here,  
5 neither the Stipulation nor the Judgment expressly reserved LS&G’s claimed Exhibit 4 dispute  
6 for post-judgment litigation.

7 Before considering granting LS&G any relief, the Court should decide whether LS&G is  
8 a Stipulating Party bound by all the terms of the Stipulation and Judgment. If LS&G is a  
9 Stipulating Party, it may not accept the benefits—including provisions in the Physical Solution  
10 that are only available by stipulation such as the right to transfer Production Rights and the right  
11 to Carry Over rights from year to year—while selectively rejecting certain of the burdens, such  
12 as the joint allocation to landowners Granite and LS&G. (*City of Barstow v. Mojave Water*  
13 *Agency* (2000) 23 Cal.4th 1224, 1256, fn. 17 [Where a party desires “to participate in the  
14 [physical solution], it must, for this purpose, refrain from asserting its existing water rights and it  
15 **must accept all of the terms** of the [physical solution] judgment . . .” (emphasis added)];<sup>7</sup> Civ.

16  
17 <sup>7</sup> In *Barstow*, the California Supreme Court addressed the rights of the so-called Cardozo  
18 appellants and Jess Ranch appellants in the Mojave Basin. Jess Ranch pumped over 18,000 AF  
19 of water per year to support its trout raising operations and ancillary agricultural property. (*Id.* at  
20 p. 1239.) The stipulating parties there contested the amount of water Jess Ranch put to beneficial  
21 use. The trial court concluded that for purposes of Jess Ranch’s joining the stipulated physical  
22 solution, it would calculate the consumptive amount used annually at 7,480 AF, substantially less  
23 than the amount Jess Ranch produced. On appeal, Jess Ranch argued that it wished to participate  
24 in the physical solution but contended that it had been prevented from doing so because its  
annual production rights were not calculated on the same basis as other producers. (*Id.* at p.  
1254.) The Court of Appeal agreed with Jess Ranch and the Supreme Court reversed, finding  
that the trial court did not abuse its discretion as to Jess Ranch. (*Id.* at p. 1256.) Jess Ranch then  
argued that if the Supreme Court reversed the Court of Appeal judgment, it must, on remand,  
require the trial court to consider water priorities under the physical solution and judgment. (*Id.*  
at p. 1256, fn. 17.) The Supreme Court rejected the argument stating:

As the Court of Appeal observed, the physical solution ‘establishes a  
system of water regulation for the stipulating parties that is independent of  
their water rights, if any, under traditional application of riparian,  
overlying or appropriative priorities. **Since Jess Ranch seeks to  
participate in the system established by the [physical solution], it must  
waive its existing water rights in order to do so. Thus, the question of  
whether it has existing rights is irrelevant for this purpose. If Jess  
Ranch desires to participate in the [physical solution], it must, for this  
purpose, refrain from asserting its existing water rights and it must**

1 Code § 1589 [“A voluntary acceptance of the benefits of a transaction is equivalent to a consent  
2 of all the obligations arising from it, so far as the facts are known, or ought to be known, to the  
3 person accepting.”]; see also § 3521 [“He who takes the benefit must bear the burden.”].

4 Here, the Court must reject LS&G’s argument that it may “conditionally” accept portions  
5 of the Stipulation and Judgment while reserving its right to assert and litigate its pre-judgment  
6 water rights. Like the Jess Ranch appellants in *Barstow*, if LS&G seeks to participate in the  
7 Judgment and Physical Solution, it must waive its pre-judgment water rights and “accept all of  
8 the terms” of the Judgment and Physical Solution applicable to all stipulating parties.

#### 9 IV. ARGUMENT ON THE MERITS

##### 10 A. LS&G’s Position Is Based On Several False Premises.

11 LS&G uses its Opening Brief to construct a straw man—that Granite contends that it is  
12 entitled to water rights that are associated only with the Leased Property—and then spends many  
13 pages attacking its straw man. Granite does not claim water rights associated with the Leased  
14 Property. Meanwhile, LS&G’s position that it is entitled to all 234 AF of the joint allocation to  
15 “Granite Construction Company (Little Rock Sand & Gravel, Inc.)” is based on several false  
16 premises, including misleading uses of ellipses to distort the meaning of the Stipulation,  
17 Judgment and Statement of Decision. LS&G’s false premises include: (i) the joint Exhibit 4  
18 allocation is an allocation only to the Leased Property; (ii) Granite did not claim or possess  
19 overlying water rights associated with Granite’s own land; (iii) LS&G is entitled to Production  
20 Rights as a tenant on two of the four leased parcels; (iv) the pre-judgment lease between LS&G  
21 and Granite trumps the Judgment and Production Right allocation to Granite; (v) the other  
22 Stipulating Parties intended to grant the 234 AF solely to LS&G; (vi) the allocations in Exhibit 4  
23 were based solely on the Stipulating Parties’ land ownership and pumping histories; (vii) LS&G  
24 has water rights of a higher “priority” than Granite; and (viii) Granite is member of the Non-  
25 Pumper Class (“**Willis Class**”), or should be treated as one.

---

26 **accept all of the terms of the [physical solution] judgment that are**  
27 **applicable to all stipulating parties.”**

28 (*Ibid.*, emphasis added.)

1           **1.     The Exhibit 4 Allocation To “Granite Construction Company (Little Rock**  
2           **Sand & Gravel, Inc.)” Is An Allocation To The Identified Producers, Not To**  
3           **Specific Property As LS&G Contends.**

4           The thrust of LS&G’s position is that the allocation to Producer “Granite Construction  
5           Company (Little Rock Sand and Gravel, Inc.)” belongs entirely to LS&G because the allocation  
6           was to the Leased Property. (Op. Br., p. 1, ll. 14-15; see FAC, ¶ 20.) LS&G’s position is  
7           obviously a false premise since the Judgment grants Overlying Production Rights to identified  
8           *Producers*, not property. Exhibit 4 lists Overlying Production Rights by “Producer Name”  
9           organized alphabetically. If the Stipulating Parties’ intent was to allocate water to LS&G as a  
10          landowner, there was no reason to list “Granite Construction Company” first and without  
11          parenthesis around Granite.

12           **2.     Granite Claimed Overlying Rights To Groundwater For Its Own Land**  
13           **Included In The Littlerock Quarry Independent Of Any Rights Associated**  
14           **With The Leased Property.**

15          LS&G’s contention that the allocation belongs to LS&G alone is based on another false  
16          premise: that Granite only claimed water rights associated with the Leased Property and did not  
17          claim water rights for Granite’s own land associated with the Littlerock Quarry. As set forth in  
18          Granite’s Memo, Granite owns several parcels, including 67 acres of land adjacent to the Leased  
19          Property, 55 of which are part of Granite’s Littlerock Quarry. (See Memo, pp. 2-3.) As owner of  
20          that land at the time of the global settlement discussions and entry of Judgment, Granite had  
21          correlative, overlying water rights independent of the Leased Property.

22          In an apparent effort to mislead the Court into believing that Granite claimed only  
23          overlying rights for the Leased Property, in its Opening Brief LS&G states that during the Phase  
24          4 trial Granite claimed an overlying right for the Leased Property but omits that Granite claimed  
25          water rights for Granite’s own land:

26                   GCC submitted the Declaration of William Taylor in Lieu of Deposition  
27                   Testimony for Phase 4 Trial, which stated, “Granite claims an overlying  
28                   right to groundwater for the property listed in Exhibit A”, which list  
                    included the five parcels that compose the Leased Land. . . .

( Op. Br., p. 7, ll. 14-16.) What LS&G does not tell the Court is that the Exhibit A referenced in  
Mr. Taylor’s declaration also lists the five parcels Granite owns associated with the Littlerock  
Quarry, two Granite parcels associated with Granite’s Big Rock Quarry and a local headquarters

1 parcel. (LS&G's Request for Judicial Notice, Ex. 18, Ex. A thereto.) Granite expressly claimed  
2 overlying groundwater rights for its own property.

3 Granite is not merely LS&G's tenant, and LS&G's argument that a tenant using only a  
4 landlord's water rights does not acquire the landlord's water rights is misplaced. As noted above,  
5 Granite does not claim LS&G's water rights or water rights derivative of the Leased Property. At  
6 the time of the global settlement discussions, Granite had water rights associated with its own  
7 land other than the Leased Property and signed the stipulation in its capacity as a landowner.  
8 And, as noted above the Court found in its Statement of Decision that Granite had proven its  
9 reasonable use of water and had established its overlying rights.

10 LS&G argues that Granite's "ownership of the Adjacent Land is irrelevant, because, as a  
11 tenant leasing Little Rock's water rights, [Granite] cannot acquire title to water rights arising  
12 from the Leased Land that are adverse to Little Rock," citing *Fryer v. Fryer* (1944) 63  
13 Cal.App.2d 343, 346, 348; *Swartzbaugh v. Sampson* (1936) 11 Cal.App.2d 451, 462 and *Storrow*  
14 *v. Green* (1918) 39 Cal.App. 123, 126-27. ( Op. Br., p. 15, ll. 19-25; p. 17, ll. 17-23.) LS&G's  
15 reliance on these cases is misplaced for several reasons. First, Granite is not claiming water  
16 rights associated with the Leased Property. Second, none of the authorities cited are on point.  
17 *Fryer*, concerned alleged prescriptive rights to a water well.<sup>8</sup> Here by contrast, Granite is not

18 <sup>8</sup> Sara Fryer owned lots 1, 2, 3 and 4 of Tract 2154. (63 Cal.App.2d at p. 344.) For about 30 years  
19 prior thereto, the defendants, who were Mrs. Fryer's sons, were the owners of lot 6 of the same  
20 tract. In order to secure a loan, defendants needed evidence of water rights appurtenant to lot 6.  
21 In support of the loan, Mrs. Fryer executed an agreement reciting that the well located on lot 2  
22 would be maintained to deliver water to lot 6. (*Id.* at p. 345.) The agreement further provided that  
23 it might be cancelled after the mortgage had been fully paid. (*Id.* at p. 345-46.) Mrs. Fryer  
24 subsequently conveyed lots 1, 2, 3 and 4 to her three other children who later cancelled the water  
25 supply contract after the mortgage had been paid. When a controversy regarding the well arose,  
26 the owner of lot 2 sued for declaratory relief to stop defendants from using water from the well  
27 on lot 2 to irrigate lot 6. In response, the defendants asserted a prescriptive right to use the water  
28 developed on lot 2 for irrigation of lot 6. (*Id.* at p. 346.) The court of appeal affirmed the trial  
court's ruling against defendants on their claim of prescription, holding that defendants could  
gain no right to the well by prescription since their prior use was by permission under the written  
agreement. Defendants also argued they had established a right to use water from the well on lot  
2 to irrigate lot 6 under the correlative rights doctrine. The court acknowledged that the  
defendants had a right to develop and use water from a common pool under their land but since  
the agreement had been terminated, defendants had no right to continue taking water from the  
well on lot 2 for irrigation on lot 6. (*Id.* at p. 348.)

1 asserting prescriptive rights against LS&G. *Swartzbaugh* is not remotely on point as that case  
2 arose out of a co-tenant's baseless fear of losing her interest in leased premises to another lessee  
3 by prescription. The court of appeal recited the general rule that a lessee in possession of real  
4 property cannot hold adversely to the landlord while under the lease. (11 Cal.App.2d at p. 462.)<sup>9</sup>  
5 Again, these are not our facts. LS&G's reliance on *Storrow* is also misplaced as it involved  
6 claims of adverse use.<sup>10</sup> In summary, neither *Fryer*, *Swartzbaugh*, nor *Storrow* hold, as LS&G  
7 suggests, that Granite's ownership of Adjacent Land is irrelevant to resolution of Granite's water  
8 rights.

9 **3. Because Granite's Land Overlies the Basin, There Is No Legal Requirement**  
10 **That Granite Extract Water from Its Own Property.**

11 LS&G argues that since Granite extracted water from the Leased Property, the Exhibit 4  
12 Production Right must belong exclusively to LS&G. ( Op. Br., p. 15, l. 14 to p. 16, l. 8.) To the  
13 contrary, it is well-settled that so long as a property owner's property overlies the basin, there is  
14 no legal requirement that the method of extraction or diversion be located on a specific parcel. (1  
15 Slater, California Water Law and Policy (2017) § 3.13[1][b], p. 3-45.) Thus, an overlying water  
16 right holder may extract groundwater from other land overlying the basin provided no  
17  
18  
19

---

20 <sup>9</sup> In *Swartzbaugh*, one co-tenant brought an action to cancel two leases executed by her co-tenant  
21 giving lessee exclusive possession of the leased property for an extended period of time without  
22 plaintiff's consent. The appellate court affirmed the trial court's granting of defendant's non-suit,  
23 holding that where one tenant leases common property to a stranger to title the other tenants in  
24 common cannot cancel the lease or recover exclusive possession of the entire property. (*Id.* at p.  
25 461.) The appellant had expressed a fear that she may lose her interest in the leased premises to  
26 the tenant by prescription.

27 <sup>10</sup> In *Storrow*, the plaintiff brought an action for a decree that the plaintiff possessed an interest in  
28 a right-of-way in and over a strip of land and to enjoin defendant from interfering with plaintiff's  
use and enjoyment. (39 Cal.App. at p. 124.) Defendant responded that he had acquired all of  
plaintiff's interest in the right-of-way by adverse use. (*Id.* at p. 125.) The trial court entered  
judgment for plaintiff finding that the adverse use had not been for the period prescribed by  
statute and the appellate court affirmed.

1 intervening land owner is harmed. (*Id.* at § 3.13[3], p. 3-47; Hutchins, *The California Law of*  
2 *Water Rights* (1956) p. 475.)<sup>11</sup>

3 Here, LS&G confuses the existence of an overlying water right with the means and  
4 location of diversion. It is undisputed that prior to entry of Judgment both Granite and LS&G  
5 owned land overlying the Basin and thus both held overlying groundwater rights. Is it also  
6 undisputed that Granite installed and operated the means of extraction, i.e., the groundwater  
7 wells and used the water to process its aggregates. However, since the means of extraction is  
8 mere plumbing and not a part of the groundwater right (1 *Rogers & Nichols, Water for*  
9 *California* (1967) § 251, p. 360, citing *Garvey Water Co. v. Huntington Land & Improv. Co.*  
10 (1908) 154 Cal. 232, 241-42) neither ownership of the wells nor place of extraction resolves the  
11 issue before the court. The only relevance of pumping history was to establish self-help and  
12 defeat claims of prescription (since overlying rights may be reduced only by prescription). Here,  
13 however, all Stipulating Parties, including Granite resolved the PWSs' claims of prescription by  
14 the Stipulation and resulting Judgment.<sup>12</sup>

15  
16  
17 <sup>11</sup> In *Burr v. Maclay Rancho Water Co.* (1908) 154 Cal. 428, 433 the Court considered the  
18 meaning of language in several deeds reserving all "artesian water that may be developed on said  
19 land" overlying a common groundwater supply. In defining the overlying right, the Court held  
20 that so long as the overlying water was used on parcels overlying the basin, the point of diversion  
did not have to be on a specific overlying parcel. The Court reasoned that the common supply of  
the correlative right and the fact that the point of diversion did not result in injury to another  
water right holder:

21 Plaintiff's respective blocks of land are all situated over the basin in  
22 question and each block is entitled to sufficient water from the basin for  
the necessary use thereon. **The taking of it all by means of wells on one**  
23 **lot, instead of boring wells on each and obtaining for each the**  
**necessary water from its own well, would be a mere technical** and  
24 wholly unsubstantial departure from the terms of the reservation, unless  
some special injury results from the location of the respective wells.

25 (*Id.* at p. 434, emphasis added.) A party with an appropriative right may also change the place of  
26 extraction, provided others are not injured by the change. (*City of San Bernardino v. City of*  
*Riverside* (1921) 186 Cal. 7, 28-29; *Barton v. Riverside W.Co.* (1909) 155 Cal. 509, 517.)

27 <sup>12</sup> Indeed, if the point of extraction was the *sine quo non* of overlying rights, as LS&G argues,  
28 LS&G could only claim water rights on one parcel. (Declaration of George M. Lane, ¶¶ 11-12,  
23 [Of the 3 parcels LS&G does own, A, B and C, there is a water well only on Parcel C.] )

1                   **4.       LS&G Does Not Own All Of The Leased Property; LS&G Is A Tenant**  
2                   **Subleasing Two Of The Four Parcels Alleged In The Complaint.**

3                   LS&G alleges in its *Verified* First Amended Complaint that “at all relevant times herein  
4                   mentioned” LS&G “was and is the owner” of four parcels identified as Parcels 1 through 4 and  
5                   defined as the “Little Rock Property.” (FAC, ¶ 1.) Those verified allegations are *false* and “Little  
6                   Rock Property” is a misnomer. As LS&G admits in its Opening Brief and in discovery, LS&G  
7                   does not own and has never owned two of the parcels that comprise the Leased Property. (Op.  
8                   Br., pp. 2-3; see also Supplemental Declaration of Robert G. Kuhs (“**Supp. Kuhs Decl.**”), ¶¶ 8-  
9                   10 & Ex. N; Lane Depo., pp. 51-53, 65-67 (Ex. K).) Thus, to support its 13th-hour water grab  
10                  LS&G now suggests that all these legal entities are the alter ego of George Lane.<sup>13</sup>

11                   **5.       The Lease For The Leased Property Does Not Bear On The Production Right**  
12                   **In The Judgment.**

13                  LS&G argues that the lease for the Leased Property is the only agreement governing  
14                  Granite’s and LS&G’s water rights pertaining to Granite’s Littlerock Quarry. (Op. Br., p. 18, ll.  
15                  3-28.) This is a false premise for at least four reasons. First, the lease does not address the water  
16                  rights that were appurtenant to Granite’s own land. Second, as noted above, the 234 AF  
17                  Production Right was not allocated to the Leased Property and Granite does not claim water  
18                  rights associated with the Leased Property. Third, the stipulated Judgment is an agreement (the  
19                  only one) governing Granite’s and LS&G’s respective water rights in the AVAA. Fourth, the  
20                  lease predates the adjudication and does not address the adjudication or the parties’ rights under  
21                  the Judgment. The lease was initially entered into in 1987 while the first complaint in the  
22                  consolidated cases was filed in 1999. Although the lease was amended in 2010 to extend the  
23                  term, neither the lease nor the amendments address which party gets credit in the adjudication for  
24                  the pumping or use of groundwater or how the parties are to divide any allocation that may be  
25                  granted pursuant to the adjudication.<sup>14</sup>

26                  <sup>13</sup> LS&G goes for far as to argue that “Lane Family entity” Monte Vista (also Mr. Chester’s  
27                  client) was “deprived of any allocation under the Judgment,” and that the remedy for counsel’s  
28                  negligence is to transfer Granite’s Production Right to Monte Vista. (Op. Br., p. 17, ll. 3-16.)

<sup>14</sup> Granite is not denying LS&G’s title to the lands LS&G owns. LS&G has admitted that it owns  
                  only two of the four parcels that Granite leases from LS&G. Nor is Granite seeking to void  
                  LS&G’s rights to water, to the extent LS&G has such rights.

1           **6.     The Stipulating Parties Intended To Give Granite Production Rights For Use**  
2           **In Connection With Its Little Rock Quarry And Did Not Intend To Allocate**  
3           **All 234 AF To LS&G.**

4           As confirmed by counsel for several of the Stipulating Parties in declarations filed in  
5           opposition to LS&G's prior post-Judgment motion (copies attached to the Appendix  
6           accompanying Granite's Motion), based upon Granite's ownership of land and its beneficial use  
7           of water on that land independent of the Leased Property, as well as Granite's beneficial use of  
8           water at the Littlerock Quarry, the Stipulating Parties collectively agreed to allocate Production  
9           Rights to Granite as stated on Exhibit 4. There is absolutely no evidence that the Stipulating  
10          Parties intended to allocate all 234 AF of the Production Right to LS&G.

11           **7.     The Exhibit 4 Allocations Were The Product Of Negotiations That Took Into**  
12           **Account Many Factors, Including Current And Future Need For Water, Not**  
13           **Just Past Pumping History And Land Ownership.**

14          The Stipulating Parties agreed to the Exhibit 4 allocations following a long negotiation  
15          process involving hundreds of parties. In negotiating the various allocations of Production  
16          Rights, the parties took into account a myriad of factors pertaining to each producer and user of  
17          water, including, primarily, their current and future need for water. The Phase 4 production  
18          quantities were merely a starting point for negotiations. If the parties had agreed to base the  
19          allocations solely on the 2011-2012 pumping histories there would have been no need for  
20          negotiations. The 2011-2012 pumping data was not representative for many producers. Thus,  
21          each Producer received an agreed allocation based on each Producer's ability to negotiate with  
22          the other Settling Parties. In the words of counsel for AGWA, Mr. Fife, actual pumping numbers  
23          were only a factor, and Exhibit 4 was not based on any formula, it was a product of negotiations:

24                 While [Phase IV discovery] was partially relevant for the Exhibit 4  
25                 negotiations, there was a lot of information available to everyone about  
26                 everyone that we developed through the Robie proctoscope process and  
27                 elsewhere. Even then, actual pumping numbers were only one part of the  
28                 equation, to the extent that 'equation' is even a relevant word -- personally  
                I think 'fist fight' would be a better description.

(M. Fife email to J. Dubois and R. Kuhs, Dec. 18, 2014 (Kuhs Opp. Decl., ¶ 17 & Ex. GG.)

1 That Exhibit 4 is the product of negotiations not an equation is illustrated by the  
2 allocation to Granite for its Big Rock Quarry and many other producers.<sup>15</sup> Although Granite had  
3 pumped only about 16 AF per year at its Big Rock Quarry in 2011 and 2012, based on Granite's  
4 overall need for water to support its operations in the Antelope Valley and Granite's plans to  
5 transition operations from Littlerock to Big Rock over time in compliance with mining permit  
6 conditions, Granite was able to negotiate a 126 AF allocation for its Big Rock Quarry and a 234  
7 AF allocation for its Littlerock Quarry. LS&G's claims were also taken into account in the  
8 negotiations, thus resulting in a joint allocation of 234 AF. If LS&G wished for the allocation to  
9 be stated differently, it was incumbent on LS&G to negotiate a different stipulated allocation,  
10 litigate its dispute with Granite before Judgment was entered, or withdraw its conditional  
11 signature. Having accepted the Judgment as written, LS&G is bound by its terms. To hold  
12 otherwise would jeopardize the certainty the Judgment created for all parties.

13 **8. Granite's Production Rights Are Of Equal Priority To LS&G's.**

14 A theme of LS&G's Opening Brief is that its water rights are of a higher "priority" than  
15 Granite's. (See Op. Br., p. 12, ll. 9-15; pp. 14-17.) LS&G's references to "priority" reflect a  
16 misunderstanding of water law and the Judgment. Before the Judgment, Granite and LS&G were  
17 overlying owners with correlative rights of equal priority. (See *Barstow*, supra, 23 Cal.4th 1224,  
18 1240 ["One with overlying rights has rights superior to that of other persons who lack legal  
19 priority, but is nonetheless restricted to a reasonable beneficial use."]; *Pasadena v. Alhambra*  
20 (1949) 33 Cal.2d 908, 925.)<sup>16</sup> After the Judgment, Granite and LS&G hold Production Rights of  
21 equal priority, as Section 5.1 of the Judgment expressly states: "all the Production Rights  
22 established by this Judgment are of equal priority, except the Federal Reserved Water Right . . . ,  
23 and with the reservation of the Small Pumper Class Members' right to claim a priority under

24  
25 <sup>15</sup> See, e.g., Exhibit 4 allocations to Sheldon Blum, Burrows/300 A 40 H LLC, County Sanitation  
26 District, Sunrise Ranch, LLC, Van Dam Family, Copa De Oro Land Company, Healy,  
27 Rosamond Ranch.

28 <sup>16</sup> LS&G's reliance on *Barstow* and *Pasadena* to support its priority argument is misplaced  
because in both cases the discussions of priorities concerned the relative priorities of different  
classes of water rights, i.e., overlying, appropriative and prescriptive. Here, both Granite and  
LS&G held overlying water rights, which have equal priority.

1 Water Code section 106.” (Judgment and Physical Solution, p. 15, ll. 23-26.) The Judgment is  
2 dispositive.

3 **9. Granite Is A Landowner Stipulating Party And Not A Member Of The Willis**  
4 **Class As LS&G Misleadingly Suggests.**

5 Employing an intentionally misleading use of ellipses, LS&G argues that the Court’s  
6 December 23, 2105 Statement of Decision precludes any allocation to Granite. ( Op.Br., p. 17, ll.  
7 23-26.) To the contrary, the portion of the Court’s Statement of Decision that LS&G quotes, on  
8 page 14, explicitly refers to the Willis Class not to Granite. LS&G intentionally omitted the  
9 phrase “*of the Willis Class*” in the middle of the quotation and replaced those words with  
10 ellipses. Granite is absolutely not a member of the Willis Class. Granite is a Stipulating Party and  
11 an overlying landowner that has exercised its overlying rights, both at its Big Rock Quarry and at  
12 the Littlerock Quarry.

13 Additionally, LS&G’s assertion that Granite has not shown that it has used any  
14 groundwater on its land is false. As explained in the Declarations of William Taylor previously  
15 submitted to the Court in opposition to LS&G’s prior post-judgment motion and in support of  
16 Granite’s pending motion, LS&G’s land at the Littlerock Quarry is “played out” and Granite is  
17 currently mining its own land, which operations require water, including for dust control.<sup>17</sup>

18 **B. Given LS&G’s Conduct And The Inequity Of Its Plea, Equity Is The Last Thing**  
19 **LS&G Should Seek To Invoke.**

20 A judicial declaration that LS&G holds title to all 234 AF of the Production Right  
21 allocated jointly to “Granite Construction Company (Little Rock Sand & Gravel, Inc.)” would be  
22 fundamentally inequitable for many reasons.  
23  
24  
25

26 <sup>17</sup> See Declaration of William Taylor in Opposition to Lane Family’s Motion for Post Judgment  
27 Supplemental Order Re Granite Construction Company, ¶¶ 12-13; Supplemental Declaration of  
28 William Taylor in Support of Motion By Granite Construction Company to Interpret and Enforce  
the Judgment and to Partition the Exhibit 4 “Granite Construction Company (Little Rock Sand  
And Gravel, Inc.)” Production Right, ¶ 5.)

1           **1.       Granting LS&G's Requested Relief Would Retroactively Void Granite's**  
2           **Overlying Water Rights Associated With Its Adjacent Land and Provide A**  
3           **Windfall To LS&G.**

4           As discussed above and in Granite's Motion, Granite is an overlying landowner of 67  
5           acres adjacent to the Leased Property, 55 acres of which is part of the Littlerock Quarry and is  
6           actively being mined with a need for water. A declaration that LS&G is the owner of all 234 AF  
7           of Production Rights would effectively void Granite's pre-judgment overlying rights and post-  
8           Judgment Production Rights. Such a declaration would relegate Granite, with respect to those  
9           overlying rights, to the same status as a party that failed to appear in the coordinated actions.  
10          Such a result would be remarkably inequitable given Granite's active and good faith  
11          participation in the litigation and global settlement negotiations and its support of the Judgment.

12           **2.       LS&G's Position Would Deprive Granite Of The Benefit Of Its Bargain**  
13           **With The Other Stipulating Parties.**

14          Granite negotiated the 234 AF allocation with all Stipulating Parties, and granted those  
15          parties rights in exchange. By entering into the Stipulation, Granite settled all claims of all  
16          Stipulating Parties, compromising Granite's rights in exchange for the benefits of the Stipulation  
17          and Judgment. (See Stipulation, ¶ 2b.) As noted above, Granite settled its claims to groundwater  
18          with all Stipulating Parties and the Stipulating Parties allocated water to Granite for its Littlerock  
19          Quarry based on Granite's status as a fee owner with a current and future beneficial need for  
20          water. (See section II, supra.) Granite as a fee owner resolved all prescription claims by the  
21          Public Water Suppliers and all claims by and among all settling overlying land owners, including  
22          LS&G. Allowing LS&G to retroactively re-litigate its pre-judgment correlative rights or post-  
23          Judgment Production Rights for Granite's Littlerock Quarry would strip Granite of the benefit of  
24          its bargain with all other Stipulating Parties.

25          By asking the Court to declare that the 234 AF belongs exclusively to LS&G, LS&G is  
26          inviting the Court to effectively void the Judgment and reopen negotiations among all Stipulating  
27          Parties or, at a minimum, with all other clients of Ted Chester, LS&G's counsel.  
28

1                   **3.     LS&G’s Position Would Leave Granite With Insufficient Water For Its**  
2                   **Operations In The AVAA.**

3                   Granite signed the Stipulation believing it had reached an agreement that would provide  
4                   sufficient water for Granite’s needs. If LS&G is granted all 234 AF and Granite 0, as LS&G  
5                   requests, Granite will not have sufficient water for its operations in the Antelope Valley which  
6                   violates public policy (see e.g., *Barstow, Supra*, [“public interest requires that there be the  
7                   greatest number of beneficial uses which the supply can yield...”] Granite needs water for both  
8                   its Littlerock Quarry and, going forward, for its Big Rock Quarry as it transitions its operations  
9                   from Littlerock to Big Rock. The 126 AF allocated in Exhibit 4 for Big Rock is grossly  
10                  insufficient for Granite’s operations. (See Supp. Taylor Decl., ¶ 7.)

11                   **4.     LS&G Would End Up With A Windfall That It Can Only Monetize—234 AF**  
12                   **Of Water For Which It Has No Reasonable And Beneficial Use Or Need.**

13                  As discussed in Granite’s Motion, LS&G has no reasonable and beneficial use for any of  
14                  the 234 AF of Production Rights. The Leased Property is a played out empty pit and has no  
15                  future water need. Any water allocated to LS&G will not be used on the Leased Property, but  
16                  instead will likely be monetized and transferred to other water users. In short, this is a transparent  
17                  water grab.

18                   **5.     LS&G Would Be Rewarded For Its Failure To Negotiate With Granite In**  
19                   **Good Faith, Its “Conditional Submittal” Of Its Signature To The Stipulation,**  
20                   **And Its Refusal To Support The Judgment And Honor Its Plain Terms.**

21                  LS&G’s lack of good faith is well-documented. From leading the other settling parties to  
22                  believe that Granite and LS&G had agreed on an allocation as between them so that the group  
23                  reported the global settlement to the Court, to LS&G later reneging on the Agreement, and from  
24                  its “conditional submittal” of its signature on the Stipulation to its Opening Brief in connection  
25                  with the present matter, LS&G at all times has conducted itself inequitably.

26                  As discussed in the Declaration of Robert G. Kuhs in Opposition the Lane Family’s  
27                  Motion (“**Kuhs Decl.**”), LS&G first offered to divide the 234 AF as 90 AF to Granite and 144  
28                  AF to LS&G, without conditions. (Kuhs Decl., Mar 8, 2016, ¶ 7.) When Granite countered with  
a slightly higher allocation to Granite, LS&G agreed to Granite’s proposed division of the 234  
AF but asked Granite to assume the risk of any reduction in the allocation, a risk that never

1 materialized. Granite agreed to accept the risk and asked LS&G to allow Granite also to have the  
2 benefit of any future increase (which also did not materialize). (*Ibid.*) Thus, while Mr. Chester  
3 correctly noted in his declaration replying to Mr. Kuhs's declaration that the parties did not have  
4 a "final agreement," Mr. Chester did not dispute that the parties had agreed on how they would  
5 divide the allocation if it remained at 234 AF.<sup>18</sup>

6 On March 31, 2014, counsel for Granite and LS&G informed the other settling parties  
7 that Granite and LS&G had reached an agreement as to an allocation of the 234 AF, and on April  
8 4, 2014, the settling parties announced a global settlement to the Court.<sup>19</sup> LS&G did not at that  
9 time speak up and claim it had not reached an agreement with Granite. Later, LS&G reneged on  
10 the agreed division of the 234 AF.

11 When LS&G suggested that the stipulating parties leave an opening in the Stipulation to  
12 allow LS&G to litigate its dispute with Granite, Mr. McLachlan, counsel for Richard Wood and  
13 the Small Pumper Class, in an email exchange on November 24, 2014, "made it clear to Mr.  
14 Chester that . . . Mr. O'Leary [counsel for the United States] and [Mr. McLachlan] were not  
15 willing to leave Exhibit 4 open to future litigation." (Declaration of M. McLachlan, ¶ 8.) When  
16 LS&G later submitted its signature to the Stipulation, in an email Mr. Chester sent only to  
17 counsel for the United States, LS&G attempted unilaterally to reserve a dispute with Granite for  
18

19  
20 <sup>18</sup> Although the parties had not agreed on which party would bear the risk of a decrease or have  
21 the benefit of an increase in the allocation, the parties agreed on how they would divide the 234  
AF. Since the allocation was not later decreased or increased the remaining issue became moot.

22 <sup>19</sup> Mr. Chester in his reply declaration claims that he personally made no statement to anyone  
23 about Granite and LS&G having reached an agreement and notes that counsel for the other  
24 Settling Parties in their declarations do not state "that they heard me or Robert Kuhs state that we  
25 had reached an agreement." (Reply Declaration of Ted Chester, ¶ 8.) To the contrary, Mr.  
26 McLachlan specifically recalls "As a necessary part of the allocation settlement between the  
27 stipulating parties, Ted Chester and Robert Kuhs reached an agreed allocation of the 234 acre-  
28 feet as between Granite, with Granite retaining 100 acre-feet and LS&G receiving the balance." (Declaration of M. McLachlan, ¶ 6.) Mr. Chester also ignores that numerous other counsel all  
declare that Mr. Kuhs and Mr. Chester had reached an agreed allocation, a statement they could  
not make had they not been informed of such an agreement. (Declarations of Zimmer, Joyce,  
Hughes.)

1 future litigation, none of the Stipulating Parties agreed that LS&G could reserve for later  
2 litigation a dispute with another Stipulating Party or submit its signature conditionally.

3 Significantly, although the Court on January 7, 2015, had reserved the Granite/LS&G  
4 dispute “for further discussion after ruling on the Final Approval Hearing of the Wood Class  
5 Settlement,” at no time after submitting its signature to counsel for the U.S. on February 20,  
6 2015, until the Lane Family filed their post-judgment motion on January 31, 2016, did LS&G  
7 submit a dispute with Granite for resolution by the Court.<sup>20</sup> LS&G was fully aware of Granite’s  
8 position at the time Judgment was entered. Only after Judgment was entered did LS&G spring to  
9 life claiming it had reserved a pre-judgment dispute for post-judgment resolution.

10 **C. If The Court Concludes That There Was No Agreement Between The Parties On**  
11 **Allocating The 234 AF, Then The Parties Hold The 234 AF Jointly And Equally.**

12 **1. There Was An Oral And Handshake Agreement To Allocate the 234 AF.**

13 In opposing the Lane Family’s prior motion seeking 100% of the jointly-allocated 234  
14 AF, Granite set forth the facts and supporting evidence showing that the parties had decided how  
15 to allocate the 234 AF as long as it remained 234 AF. (Opposition of Granite, Mar 8, 2016;  
16 Declarations of R. Kuhs, M. McLachlan, B. Joyce, J. Hughes and R. Zimmer) The only  
17 unresolved question was which party would bear the risk of further pre-judgment adjustments to  
18 Exhibit 4. As to the 234 AF, however, it is undisputed that the parties were in agreement on the  
19 quantities of their respective shares.

20 **2. However, If The Court Concludes That There Was No Other Agreement,**  
21 **Then The Parties Are Joint Tenants With Equal Shares Of The 234 AF.**

22 As set forth in Granite’s Memo, if LS&G is not bound by the parties’ handshake  
23 agreement of allocation, then the only fair, logical, and legal conclusion is that Granite and  
24 LS&G hold equal shares of the 234 AF. (Memo, pp. 9-11.) This is because the Stipulation and  
25 Judgment must be interpreted like a contract, and Exhibit 4 is the only agreement regarding the

26 <sup>20</sup> Although LS&G filed a CMC Statement on October 6, 2015 (on the eve of an October 7,  
27 2015, case management conference) claiming that the Granite/Lane dispute was alive and well,  
28 LS&G did not speak up at the case management conference or at any time thereafter to request  
judicial resolution of the dispute. Instead, LS&G remained silent about the dispute through the  
final prove-up trial and allowed the Court to enter Judgment based on the Stipulation.

1 234 AF. A consent judgment is interpreted according to the rules governing contract  
2 interpretation. (*Pardee Construction Co. v. City of Camarillo* (1984) 37 Cal.3d 465, 471.) Thus,  
3 “parol evidence is not admissible to change the legal effect of a judgment or the record of it in  
4 any material respect.” (*Kirkpatrick v. Harvey* (1942) 51 Cal.App.2d 170, 173; accord *Cottom v.*  
5 *Bennett* (1963) 214 Cal.App.2d 709, 716.) “[T]he primary object of all interpretation is to  
6 ascertain and carry out the intention of the parties.” (*City of Manhattan Beach v. Superior Court*  
7 (1996) 13 Cal.4th 232, 238 (*City of Manhattan Beach*)). To ascertain the intent of the parties, the  
8 court must first resort to the language of the contract itself. (*Rancho Pauma Mutual Water Co. v.*  
9 *Yuima Municipal Water Dist.* (2015) 239 Cal.App.4th 109, 115.)

10 Contemporaneous communications among counsel negotiating the written terms of the  
11 Stipulation, including Messrs. Chester, Kuhs and McLachlan and counsel for other parties,  
12 establish (i) that the Stipulating Parties rejected LS&G’s proposal to reserve its dispute with  
13 Granite for post-judgment litigation (ii) that Mr. Chester admitted in multiple settlement  
14 communications that the Exhibit 4 allocation to Granite and LS&G was joint, and (iii) that the  
15 Stipulating Parties intended the allocation to be joint, not solely to LS&G. (See Kuhs Opp. Decl.,  
16 ¶¶ 3-18 & Exs. U-HH.)

17 Should the Court determine the allocation to “Granite Construction Company (Little  
18 Rock Sand & Gravel, Inc.)” is joint,<sup>21</sup> because the Judgment is otherwise silent as to the parties’  
19 respective shares, and because there is no extrinsic evidence of any other intended division, then  
20 as a matter of law Granite and LS&G are equal cotenants. (Civ. Code § 686 [“Every interest  
21 created in favor of several persons in their own right is an interest in common,” unless acquired  
22 in a way not involved here.]; *Caito v. United California Bank* (1978) 20 Cal.3d 694, 705; “When  
23 two or more persons take as tenants in common under an instrument silent as to their respective  
24

25 <sup>21</sup> It would be reasonable to interpret Exhibit 4 as providing that the allocation is to Granite, since  
26 Granite is listed first, i.e., primary, while LS&G appears second and only in a parenthetical to  
27 identify the place of extraction. This is particularly reasonable when read in conjunction with the  
28 line above on Exhibit 4 listing the allocation to “Granite Construction Company (Big Rock  
Facility).” It would be more reasonable, however, to conclude that the allocation at issue is joint.  
It would be unreasonable, however, to conclude that the parties intended the allocation is to  
LS&G alone.

1 shares, a presumption arises their shares are equal.”

2 LS&G claims that it is entitled to all 234 AF of the Production Right based solely on  
3 LS&G’s ownership of two of the four parcels that constitute the Leased Property, including the  
4 pre-Judgment correlative water rights that once were appurtenant to those three parcels. But the  
5 Judgment brought comprehensive change to water rights in the AVAA. Upon entry of the  
6 Judgment, overlying appurtenant correlative rights were extinguished and replaced by quantified,  
7 transferrable Production Rights. (See Judgment, art. 16 [rights transferable, no longer  
8 appurtenant]; see also *Barstow*, supra, 23 Cal.4th at 1256, fn 17 [parties to a physical solution  
9 waive all existing groundwater rights].) Thus, the Stipulating Parties, including LS&G, may not  
10 assert their pre-judgment overlying rights against any other party (see *ibid*), as LS&G is  
11 attempting to do here.

## 12 V. CONCLUSION

13 For the foregoing reasons, the Court should deny LS&G the relief it seeks.

**PROOF OF SERVICE  
STATE OF CALIFORNIA, COUNTY OF KERN**

I, Valerie Hanners, declare:

I am employed in the County of Kern, State of California. I am over the age of 18 and am not a party to the within action; my business address is Kuhs & Parker, 1200 Truxtun Avenue, Suite 200, Bakersfield, California 93301.

On May 11, 2018, I caused the foregoing document(s) described as **OPPOSITION TO "OPENING BRIEF" OF LITTLE ROCK SAND AND GRAVEL, INC. RE TITLE TO GROUNDWATER ALLOCATION** to be served on the parties in this action, as follows:

All Parties in the Antelope Valley Groundwater Cases  
(Electronic service via Glotrans)

X (BY ELECTRONIC SERVICE) by serving the document(s) listed above via Antelope Valley Watermaster Electronic Document Service – (www.avwatermaster.org) c/o Glotrans, to all parties appearing on the electronic service list for the Antelope Valley Groundwater case. Electronic service is complete at the time of transmission. My electronic notification email address is [vhanners@kuhsparkerlaw.com](mailto:vhanners@kuhsparkerlaw.com)

\_\_\_\_ (BY U.S. MAIL) on May 11, 2018, at Bakersfield, California, pursuant to C.C.P. section 1013(a), I: \_\_\_\_\_ deposited the sealed envelope with the United States Postal Service, with the postage fully prepaid.

\_\_\_\_ placed the envelope for collection and mailing, following our ordinary business practices. I am readily familiar with this business's practice for collecting and processing correspondence for mailing. On the same day that correspondence is place for collection and mailing, it is deposited in the ordinary course of business with the United States Postal Service, in a sealed envelope with postage fully prepaid.

\_\_\_\_ (BY EMAIL TRANSMISSION) on May 11, 2018, at approximately \_\_\_\_ p.m. to:

\_\_\_\_ (BY FACSIMILE TRANSMISSION) on May 11, 2018 at approximately \_\_\_\_ p.m., pursuant to Rule 2008 of the California Rules of Court. The telephone number of the sending facsimile machine was 661/322-2906. A transmission report (copy attached hereto) was properly issued by the sending facsimile machine, and the transmission was reported as completed and without error.

\_\_\_\_ (BY PERSONAL SERVICE) on May 11, 2018 pursuant to C.C.P. section 1011, I caused such envelope to be delivered by hand personally to the addressee(s):

\_\_\_\_ (BY OVERNIGHT COURIER) on May 11, 2018 pursuant to C.C.P. section 1013I(d), I caused such envelope with delivery fees fully prepared to be sent by Federal Express to **Theodore A. Chester, Jr. at Musick, Peeler & Garrett, LLP.**

\_\_\_\_ (STATE) I declare under penalty of perjury under the laws of the State of California that the above is true and correct, and that the foregoing was executed on May 11, 2018, in Bakersfield, California.

  
Valerie Hanners
